109

HU17 Globes and Atlases

Atlas of Literary History

Atlas

Scale: various

Size (cm): 28 x 20

Number of sheets: 40

Edition: 5

Publisher: Cartographia Ltd. Budapest, Hungary. 2004
Languages: Hungarian

The Atlas of Literary History, first published in 2000 for the school age group of 10-18, is a pioneering product that presents literary data with quotations from Hungarian and international (especially European) poetry and other literary works together with representative examples of contemporary art. Its didactic novelty is ensured by the connection between several school subjects (literature, art history, geography), unifying them into a single piece of work. This atlas of Cartographia Ltd. is believed to be a unique work of its kind on the global scene both from the aspects of cartography and education.

Overview block-map sheet for the Land Parcel Identification System /LPIS/ Tokaj and vicinity

Paper

Scale: 1:10.000

Size (cm): 93 x 150

Number of sheets: 1

Publisher: Institute of Geodesy, Cartography and Remote Sensing (FÖMI). Budapest, Hungary. 2003

Languages: Hungarian

The Institute of Geodesy, Cartography and Remote Sensing (FÖMI) has developed the land Parcel Identification System (LPIS) for the proper identification of agricultural parcels in Hungary, by the date of the EU-accession. The database consists of 300.000.

HU52 Scientific Maps (geological, forest, seismic)

Ethnic Map of Present Territory of Vojvodina/Serbia

Paper

Scale: 1:350.000

Size (cm): 84 x 115

Number of sheets: 1

Edition: 1

Authors: Mr. Károly Kocsis /Budapest, Mr. Saa Kicoev /Novi

Publisher: Hungarian Academy of Sciences, Geographical Research Institute., Budapest, Hungary. 2004

Languages: Hungarian and English

This ethnic map of the Serbian territory of Vojvodina presents the change of spatial pattern of minority inhabitants from the middle ages through the upheavals of World War II and of the Balkan wars of the 1990s to the present. Data are based on the 2002 census of Serbia and Montenegro. Historically this ethnically very colourful area (besides the majority Serbs the largest minorities include Hungarians, Croats, Romanians, Czechs, Slovaks and Ruthenes), witnessed an accelerated growth in the proportion of Serbian ethnicity on the expense of minorities during the period of 1991-2002.

HU53 Scientific Maps (geological, forest, seismic)

Tectonostratigraphic terrane and paleoenvironment maps of the Circum-Pannonian region

Paper

Scale: 1:2.500.000

Size (cm): 61 x 37

Number of sheets: 4

Publisher: Geological Institute of Hungary. Budapest, Hungary. 2004

Languages: English

The tectonostratigraphic terrane map series of the basement of the Pannonian Basin and of its surrounding Alpin-Carpathian-Dinaridic mountain chains has been elaborated by the national representatives of the countries lying into the relevant area. The terrane pattern of the region is shown on paleo environment maps of four successive.

HU54 Scientific Maps (geological, forest, seismic)

Geological map of the Gemer-Bükk area

Paper

Scale: 1:100.000

Size (cm): 84 x 115

Colours: 4

Number of sheets: 1

Authors: Mr. György Less /Budapest, Mr. Jan Mello /Bratislava (editors) and others

Publisher: Geological Institute of Hungary. Budapest, Hungary. 2004

Languages: English

The Geological map of the Gemer-Bükk area of 1:100.000 scale, issued by the Geological Institute of Hungary in 2004, has been edited in co-operation with the Dionz túr Geological Institute of the Slovak Republic. Fundamental changes in the knowledge of the stratigraphy and structure of the area in the last 30 years are outlined in a unified manner first time in this work. The backbone of the work is a "classical" geological map covering about 6000 km² in NE Hungary and SE Slovakia. The unified legend consists of 117 stratigraphic units (grouped according to their age – spanning from Ordovician to Quaternary – and rock type), structural and other signs. Specific overprint marks the metamorphism of particular units. Five geological cross-sections and a tectonic scheme of 1:600.000 scale help to understand the extremely complicated structure of the region.

HU55 Thematic Map

Lake Balaton and Surroundings

Paper

Scale: 1:200.000

Size (cm): 70 x 46

Number of sheets: 1

Publisher: Institute of Geodesy, Cartography and Remote Sensing (FÖMI). Budapest, Hungary. 2000

Languages: English

The objective of the European Environment Agency (EEA) is to provide policy makers with timely and relevant environmental information. The CORINE Land Cover (CLC) database initiated by the Commission in 1985 should be maintained and regularly updated. The map displayed shows the area around the largest lake of Central Europe and classes the land area into 28 land cover categories. The map is based on a LANDSAT ETM-7 satellite imagery taken on 18 August 2000. The EEA and the Joint Research Centre (JRC) launched the IMAGE2000 and CLC2000 Project, which include the updating of the CLC database. The satellite image 'snap shot' of Europe (IMAGE2000) is the principal material to undertake the updating of CLC database for the year 2000 (CLC2000) and to identify main LC changes occurring in Europe within the period 1990-2000. The project covers the area of 29 European countries with the total of 4.4 Mkm² with 25 ha spatial resolution. CLC-changes database has 5 ha spatial resolution. The dissemination and use of the I&CLC2000 products is defined in an agreement

between the EEA, the European Commission and the participating countries.

HU56 Topographic Maps

Topographic map; sheet L-33-46-B Zalaegerszeg North

Paper

Scale: 1:50.000

Size (cm): 68 x 49

Colours: 4

Number of sheets: 1

Edition: 1

Publisher: Ministry of Defence Mapping Company. Budapest, Hungary. 2004

Languages: Hungarian and English

The publishing of the new edition of the 1:50.000 scale topographic maps has started in 2004. As the result of the completion of the entirely new series of the maps, applying the WGS 84 datum and the UTM projection system will come out in 2005. These maps are being made completely with digital technology revising and updating previous edition and they include the marginal information in English as well.
