Introduction

The International Cartographic Exhibition (ICE) in Florence is organized as part of the 30th International Cartographic Conference (ICC).

All exhibits are physically displayed at the Italian Geographic Military Institute from 13th to 17th December 2021, and virtually at www.geografia-applicata.it.

As usual, the Exhibition is structured according to the following categories:

1. Maps on Panels (MP)
2. Charts on Panels (CP)
3. Atlases (AT)
4. Digital Products (DP)
5. Digital Services (DS)
6. Educational Cartographic Products (EP)
7. Other Cartographic Products (OC)

As in its previous editions, the Exhibition was able to attract great interest and it encouraged a widespread participation within the world of cartography. Despite the countless difficulties of the last two years of pandemic, the thirty-two National/Affiliate Members from twenty-six different countries that accepted the International Cartographic Association's invitation to this unmissable biennial appointment, worked hard to produce and present high-quality cartographic products and services.

It is to their precious contribution that we owe the immense value of the Exhibition, whose visitors are given the chance to experience a multitude of points of view, perspectives and approaches, while virtually travelling around the world. Indeed, whereas the *fil rouge* of the Exhibition is the cartographic representation of different aspects of reality through different means and communication materials, in this edition an array of themes and focuses makes the proposed products especially interesting and provides the visitors with a varied and meaningful journey in the cartography world.

Such a diversity of cartographic products ranges from physical, political or theme-based world maps to representations of the surface of other celestial bodies, from plain topographic maps to Digital Elevation Models, from geomorphological maps to land use and land cover inventories, from historical maps to the ones designed using the most modern and advanced technologies, from tourist maps to orienteering ones. This impressive variety also applies to the other categories according to which exhibits are organised, whose peculiarities reflect countries' geographic distinctive traits, their history, their (cartographic) traditions and innovations, their aesthetics, cultural symbols, education systems and, over all, their view of themselves and of other local, regional and national identities. Wandering between the numerous map panels, exploring the digital products and services, leafing

through the atlases and learning about how cartography is, now more than ever, a useful learning tool in uncountable contexts, will be an enriching experience, from both a professional and a personal point of view, and a precious chance of exchange and interaction, which we hope everyone will enjoy.

In order to grant visibility to as many cartographic products as possible, even if exceeding the set number of entries officially being accepted from each ICA member, the Local Organizing Committee (LOC) has decided to welcome additional materials in an Out-of-Competition section, without compromising the fairness of the contest.

Furthermore, with the purpose of offering the possibility of viewing the Exhibition in a virtual way also to those who will participate in the conference with remote connections, the Exhibition has been combined, for the first time, with a specific online platform. All this was possible thanks to the cooperation between the Ge.Co. - University of Trento and the LabGeo - University of Florence, that took care, respectively, of the systematic acquisition and collection of all the cartographic products and of the design and implementation of the dedicated website.

The unexpectedly rich cartographic production presented by a number of participants to this year's Exhibition, despite current times, as well as their strong enthusiasm and interest in the event, testify the key role that cartography nowadays plays on the international scene, as both an analytical and communicative tool. This also emerges from the very high quality of the received materials, which proves the significant value accorded worldwide to the process of searching for and experimenting new and innovative representation techniques and technologies.

In conclusion, we hope that this Exhibition, set up in a moment of great difficulties in terms of logistics and connections, could nevertheless represent a moment of fertile scientific and cultural exchange and dialogue. Our aspiration is that the effort made by all of us for the success of this arduous edition will prove to be fruitful in the best enhancement and valorization of the meritorious cartographic products on display.

Andrea Cantile and Elena Dai Prà

AUSTRIA

MAPS ON PANELS

AUT_MP1 Carnic Main Crest [original title: 57/1 Karnischer Hauptkamm]

Type of material	Paper
Scale (if relevant)	1:25,000
Dimensions (mm)	1040 x 700
Author(s)	Werner Beer, Martin Ladner
Published by	Alpenvereineinskarten, Österreichischer Alpenverein
Date of publication	2020
Language(s) of the legend	German, Italian
Abstract/Description (in English or French; 100 words max)	<p>Specially detailed map for summer and winter mountain climbers (mountaineers, hikers and ski tourers). The characteristic is the large scale (usually 1:25,000), high accuracy, and a great wealth of terrain detail in the high mountains (rock, rubble, glaciers, etc.). The contour interval is 20 metres. The mountaineer should therefore be able to orient himself well using Alpine Club maps, both on the marked trails or in open terrain, e.g., away from the marked routes. Combined issue with path markings and ski routes (purple ribbon), double sided. Designed with ESRI ArcGIS Pro.</p>

AUT_MP2 *Map for hiking, biking and ski mountaineering in Kalkalpen National Park*

[Original title: Wanderkarte Nationalpark Kalkalpen]

Type of material	Paper ("Sora matt plus", matte coated, 100g/m ²)
Scale (if relevant)	1:35,000
Dimensions (mm)	1089 x 720
Author(s)	Nikolai Hafner
Published by	CARTO.AT
Date of publication	July 2019
Language(s) of the legend	German

Abstract/Description (in English or French; 100 words max)

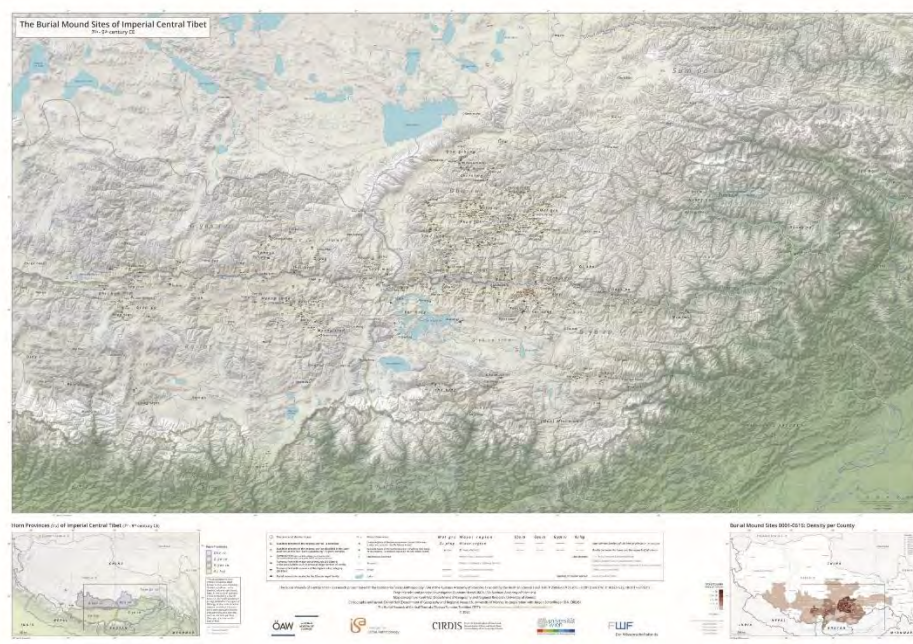

The map gives detailed information for hiking, biking, and ski mountaineering. The relief representation contains generalized contour lines (brown on covered areas, black on rock and scree) with an equidistance of 20m derived from a 10m DEM based on airborne laserscanning data. Scree and rock depictions are generated automatically. The filtered relief shading derived from a 50m DEM contains atmospheric perspective and hypsometric tinting. The back of the map features six large format photographic panoramas with more than 150 labeled objects like peaks, lakes, huts, and cirques. The photographs provide an excellent insight into the natural scenery of Kalkalpen National Park.

AUT_MP3.1 *The Burial Mound Sites of Imperial Central Tibet*

Type of material	Paper
------------------	-------

Scale (if relevant)	1:800,000
Dimensions (mm)	1148 x 800, folded to 287 x 200
Author(s)	Karel Kriz, Guntram Hazod
Published by	Austrian Academy of Sciences
Date of publication	November 2020
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	<p>The map is the result of a cooperation between the Institutes for the Cultural and Intellectual History of Asia (IKGA) and Social Anthropology (ISA) of the Austrian Academy of Sciences and the Department of Geography and Regional Research of the University of Vienna. It illustrates the position of the more than 600 burial mound fields of the Central Tibetan region that have been registered so far by the project “The Burial Mounds of Central Tibet” at IKGA and ISA. The entries, historically related to the time of the Tibetan Empire (7th–9th century CE), reveal a tumulus landscape of enormous concentration in the relatively small geographic area of Central Tibet – the heartland of the Tibetan Empire. The 44-page supplement gives insight in the general topic of the burial mound history and includes a listing of the sites and their principal classifications.</p>

AUT_MP3.2

Austrian Map, Tulln an der Donau, NM-3-12-19

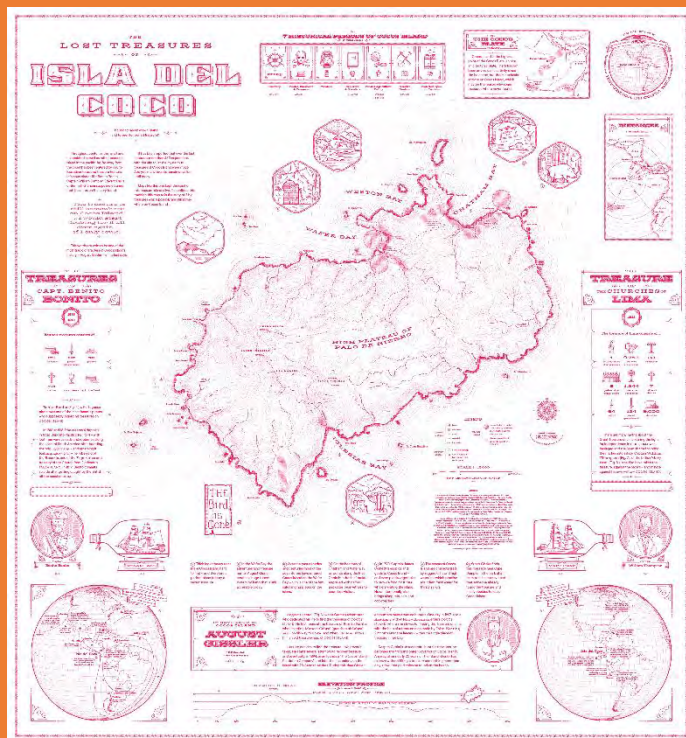

Type of material	Paper
Scale (if relevant)	1:50,000
Dimensions (mm)	8100 x 5800

Author(s)	Federal Office of Metrology and Surveying (BEV)
Published by	Federal Office of Metrology and Surveying (BEV) in cooperation with the Institute of Military Geography (IMG)
Date of publication	2021
Language(s) of the legend	German, English
Abstract/Description (in English or French; 100 words max)	Since 2021 the Austrian Map ÖK50-UTM has been created in a new production process. To a large extent, the cartographic model 1:50,000 - Vector (KM50-V) is automatically derived from the Digital Landscape Model (DLM) and forms the digital image of the Austrian territory in the scale 1:50,000. Furthermore, the legend has been redesigned with many new symbols and the names have been visualized with a different font and colored letters for the various types of objects. Since 2020 the Austrian Map series has been published in a new official cooperate design.

AUT_MP4.1 <i>The lost treasures of Isla del Coco</i>	
Type of material	Paper
Scale (if relevant)	
Dimensions (mm)	889 x 948
Author(s)	Jakob Listabarth
Published by	North American Cartographic Information Society (NACIS)
Date of publication	November 2020
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	This map continues the tradition of innumerable treasure maps of the Isla del Coco. For centuries, countless treasure hunters have adventured to recover the mysterious riches suspected on the island – based merely on treasure maps, written records or stories. Following this tradition, the map also addresses the relationship

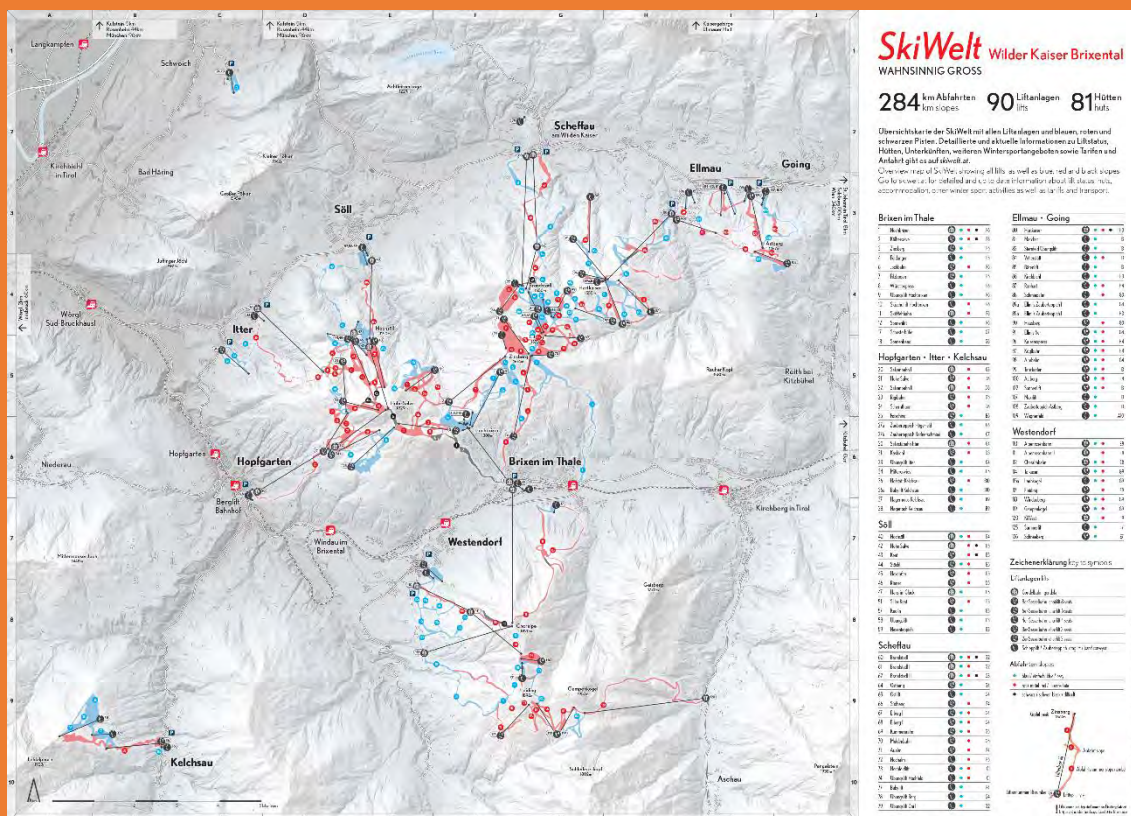

between maps and reality: usually, cartographers aim to create maps which are as close as possible to reality. At the same time, they shape perception, and thus reality itself.

AUT_MP4.2

SkiWelt Wilder Kaiser

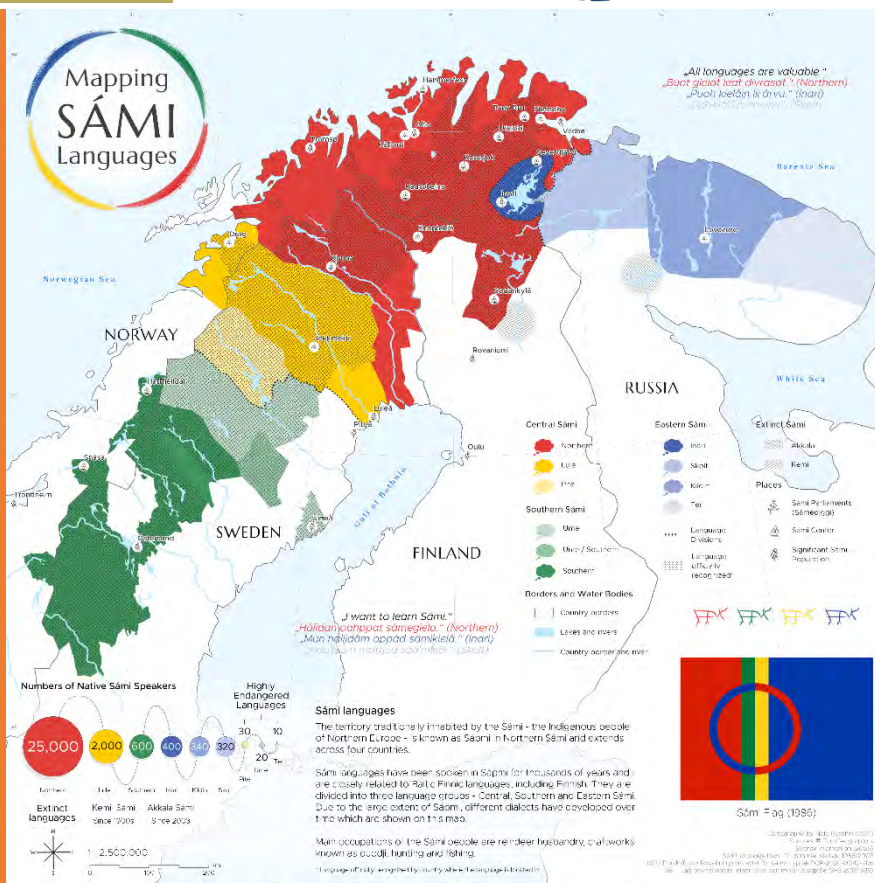

Type of material	Paper
Scale (if relevant)	1:46.000
Dimensions (mm)	590 x 420
Author(s)	Jenny Janssen
Published by	TU Wien
Date of publication	2019
Language(s) of the legend	German and English
Abstract/Description (in English or French; 100 words max)	The orientation and navigation plan for the Tyrolean ski area SkiWelt Wilder Kaiser Brixenthal offers a new perspective of the SkiWelt. The plan can be seen as an alternative to the usual panoramic maps, which are often unsuitable for orientation and navigation due to their perspective distortions of the topography. The map is fully geo-referenced and uses open-source vector and raster GIS data. It is intended for users who want to gain a better geographical understanding and mental map of the area to orient themselves and navigate the lifts and slopes, either in advance or on-site.

AUT_MP4.3

Mapping SAMI languages

Type of material	Paper
Scale (if relevant)	-
Dimensions (mm)	594 x 594
Author(s)	Nele Peschel
Published by	TU Wien
Date of publication	July 2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	The map's purpose is to make people aware of Indigenous people and their living spaces located within national borders. It is important to know about contemporary societies and different cultures. Only with this knowledge, we can respect other ways of living. The map shows Sápmi, the territory inhabited by the Sámi, the Indigenous peoples of Northern Europe. Their homeland encompasses the Lapland region in Sweden, Norway, Finland, and the Kola peninsula in Russia. The choropleth map shows the different Sámi languages in a simple way using the traditional Sámi colors.

ATLASES

AUT_AT1

Austria's Society and Social Environment
[Original title: Österreich, Raum und Gesellschaft - Vermessung der Landschaft, Porträts der Regionen]

Type of material	Paper
Number of pages	664, within is an atlas of Austria 1:200,000 (70 pages)
Dimensions (mm)	263 x 287
Author(s)	Martin Seger, Thomas Hafner
Published by	Naturwissenschaftlicher Verein für Kärnten in cooperation with Österreichische Geographische Gesellschaft
Date of publication	December 6, 2019

Language(s) of the text	German
Abstract/Description (in English or French; 100 words max)	Focus of the book is to provide Austria's diverse regional identities, combining spatial, economic and social information within a multiparadigmatic narrative. The first part of the book (100 pages) analyses socioeconomic and regional parameters. The second part (surveying of the landscape, 70 pages) is the volume's cartographic highlight: The atlas "Landcover Austria" consists of 30 overlapping map sheets based on an own database with more than 50 thematic layers. Part 3 presents Austria's constitutive unites (Bundesländer). In total, the atlas contains more than 400 thematic maps. The title is on the longlist of scientific books in Austria, 2021.

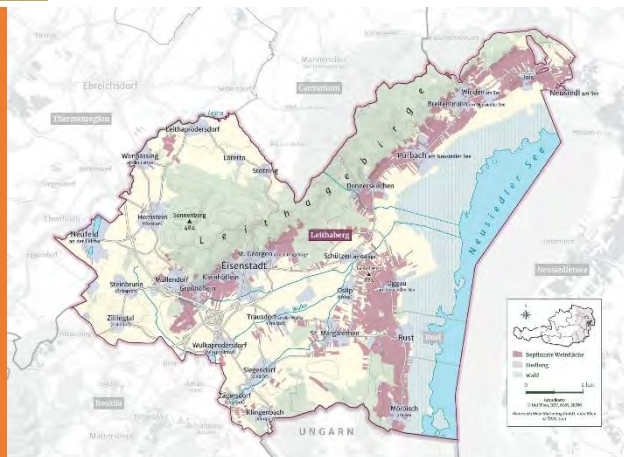

AUT_AT2	<i>SDGs in action - a generations view</i>
Type of material	Paper
Number of pages	164
Dimensions (mm)	300x300
Author(s)	Markus Jobst
Published by	Jobstmedia Präsentation Verlag
Date of publication	December 2021
Language(s) of the text	German and English
Abstract/Description (in English or French; 100 words max)	The atlas "SDGs in action – a generations view" is designed as a bilingual book. From our perspective, the views on SDGs coming from various generations and expressed as maps are a valuable documentation how we experience today's problems. The ICA Commission on Map Production and Geoinformation Management, together with the Research Unit Cartography of the TU Wien and some schools, have started an initiative to collect the generation's

view on SDGs and its expression in maps. The aim is a continuously edited collection in print and digital form, which illustrates the range of perspectives on the SDGs and their motivations for establishing a sustainable world. Website: <http://sdggeneration.cartography.at/>

AUT_AT3		Austrian Vineyard Maps
Type of material	Series of currently 17 printed maps	
Number of pages	17	
Dimensions (mm)	Depending on the winegrowing region (from 525 x 455 to 735 x 1040)	
Author(s)	University of Vienna, Plan&Land, Austrian Wine	
Published by	Austrian Wine Marketing Board in collaboration with University of Vienna	
Date of publication	June 17, 2021	
Language(s) of the text	German, English	
Abstract/Description (in English or French; 100 words max)	Printed single vineyard maps of all Austrian winegrowing regions showing all single vineyards that have been legally defined as such. Available as set (folded to A4) or single maps (poster or folded to A4).	

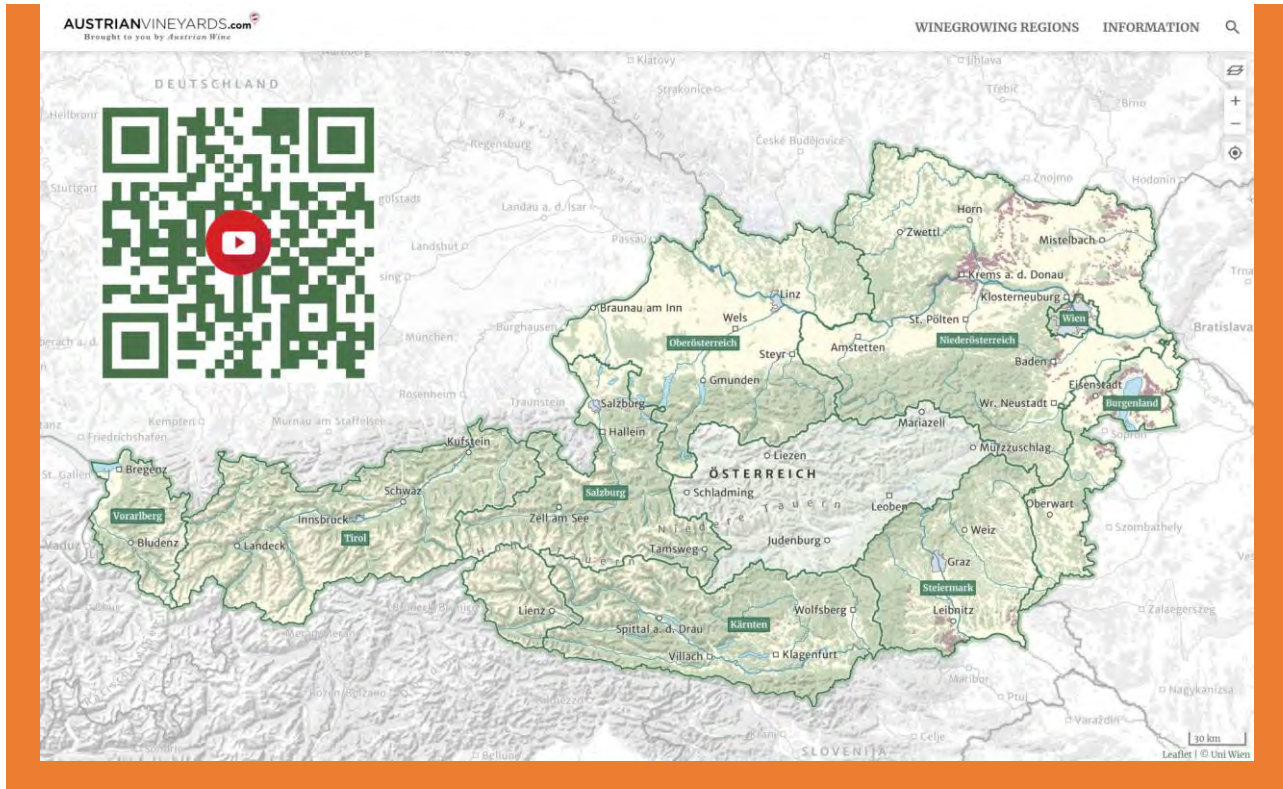

DIGITAL PRODUCTS

AUT_DP1

Austrian Vineyards

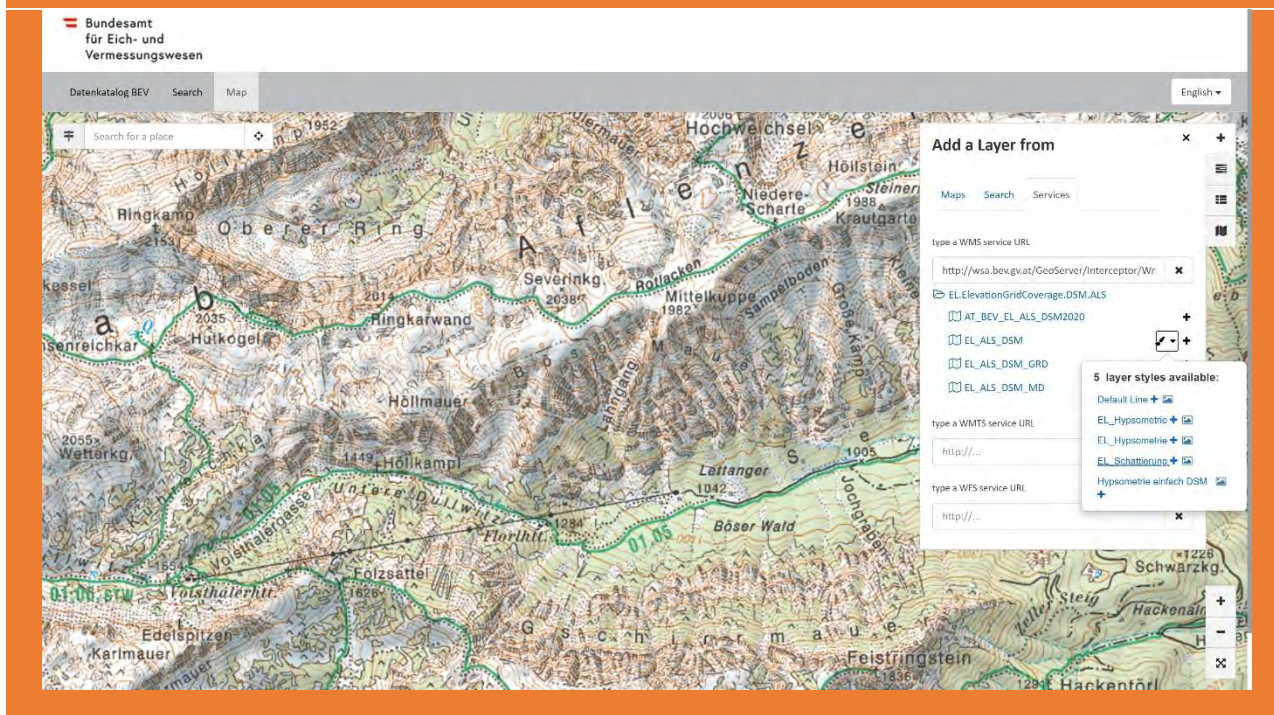

Type	Website
File format (10 words)	Online Atlas with an interactive web-based user interface
Author(s)	University of Vienna, Plan&Land, Austrian Wine
Published by	Austrian Wine Marketing Board, https://www.austrianvineyards.com in collaboration with University of Vienna
Date of publication or most recent update	June 2021
Scale	-
Language(s) of the presentation	German and English
Abstract/Description (in English or French; 100 words max)	The origin of a wine is extremely important within the wine industry. It is a key indication of the quality and is generally closely linked to the wine's terroir. The narrower and more specific the origin, the higher the quality that can be ascribed to the wine. Presenting the origins of Austrian wines in a complete, correct and attractive way to meet different needs is a prerequisite for successful wine marketing and was the motivation behind this project. With this in mind, the Austrian Wine Marketing Board launched a project to digitally record and present all origins of wine in Austria in a uniform manner. The results are now available as printed maps of the Rieds in each winegrowing region and the digital online viewer, available at https://www.austrianvineyards.com .

DIGITAL SERVICES

AUT_DS1 <i>Official Data Catalogue of the Austrian Federal Office of Metrology and Surveying</i>	
Type of service	Geoportal with different kind of standardized services
Format (10 words)	Included file types differ according to the various product specifications
Software platform	GeoNetwork/Geoserver
URL web link	https://data.bev.gv.at URL for the map view: https://data.bev.gv.at/geonetwork/srv/ger/catalog.search#/map
License	CC-BY-4.0
Author(s)	Federal Office of Metrology and Surveying
Published by	Federal Office of Metrology and Surveying
Date of publication or most recent update	July 19, 2021 & continuous updates
Scale	-
Language(s) of the presentation	English
Abstract/Description (in English or French; 100 words max)	The Directive (EU) 2019/1024 of the European Parliament and of the Council creates a legal framework on open data and the re-use of public sector information. The Austrian Federal Office of Metrology and Surveying implemented this legal framework with its new

geoportal at data.bev.gv.at. The objectives are to enhance the access to data following FAIR principles with standardized interfaces (downloads and APIs), to make these datasets unambiguously referable with persistent identifiers (www.doi.org) and to allow an easy overview of the data on a map – with the Austrian Map as a basemap.

BELGIUM

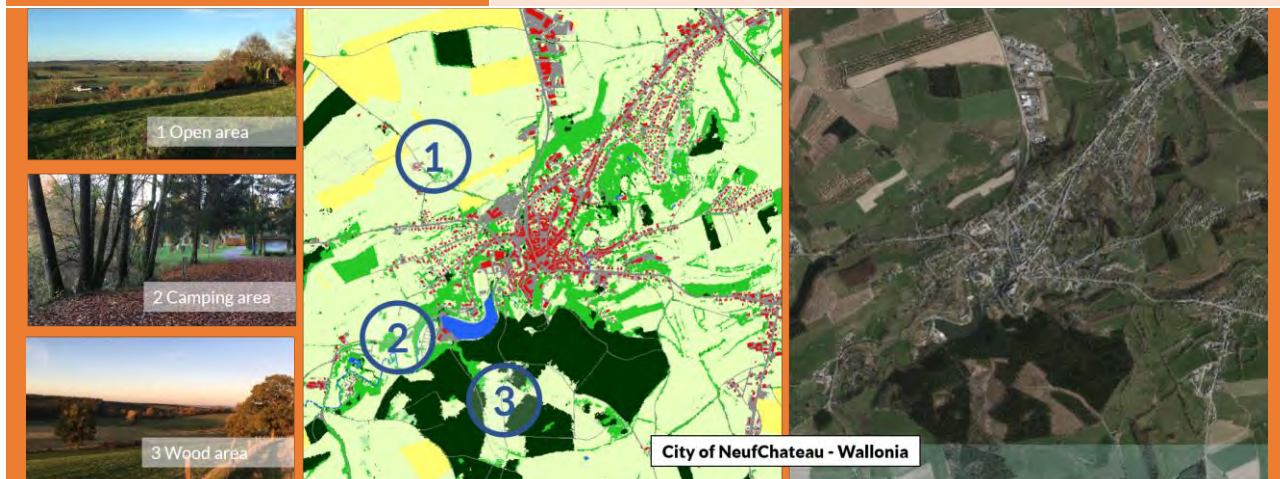

MAPS ON PANELS

BEL_MP1		<i>The Our valley at the border triangle</i>
Type of material	Paper pretex	
Scale (if relevant)	1:25000	
Dimensions (mm)	50 mm x 80 mm (recto/verso) -->100mm x 80mm	
Author(s)	Tourismusagentur Ostbelgien, National Geographic Institute	
Published by	Tourismusagentur Ostbelgien, National Geographic Institute	
Date of publication	25/06/2020	
Language(s) of the legend	German, dutch, french, english	
Abstract/Description (in English or French; 100 words max)	<p>This map includes a series of six maps, showing the network of walks. The topographic background was produced on the basis of data at 1:50 000, then symbolized with a specific symbolization at 1:25 000. This allows a light background which guarantees a highlighting of the thematic overlay. This is notable when we compare the mapping of Belgium and those of border areas that have not benefited from this treatment. The thematic overlay shows the “node points” network, in which each crossroads is numbered (also materialized in the field). This system allows very simple preparation of the hikes (difficulty, mileage, etc.).</p>	

DIGITAL PRODUCTS

BEL_DP1 <i>Land cover and Land Use maps for Wallonia (WALOUS)</i>	
Type	digital maps (raster 1m and vector)
File format (10 words)	Rest service, WMS service
Operating system	No restriction
License	CC-BY
Author(s)	Céline Bassine, Julien Radoux, Pierre Defourny, Taïs Grippa, Moritz Lennert, Eléonore Wolff, Benjamin Beaumont, Eric Hallot
Published by	Service Public de Wallonie (http://geoportail.wallonie.be/catalogue/a0ad23a1-1845-4bd5-8c2f-0f62d3f1ec75.html)
Date of publication or most recent update	01/11/2020
Scale	1m raster
Language(s) of the presentation	french (subtitle english)
Abstract/Description (in English or French; 100 words max)	To support regional public and private entities, the Public Service of Wallonia (PSW) produced two maps of land cover (LC) and land use (LU) based on aerial photos and satellite imagery. Indeed, such LCLU maps are important for climate reporting, flood mapping, land take monitoring, forest management, among others. The last LCLU map of Wallonia produced in 2007 from cadastral and agricultural information did not distinguish information on LC from LU. Walous project (Wallonia Land Cover and Use) funded by the PSW provide a comprehensive view of the Walloon territory in 2018.

OTHER CARTOGRAPHIC PRODUCTS

BEL_OC1

The History of Belgium in 100 Old Maps

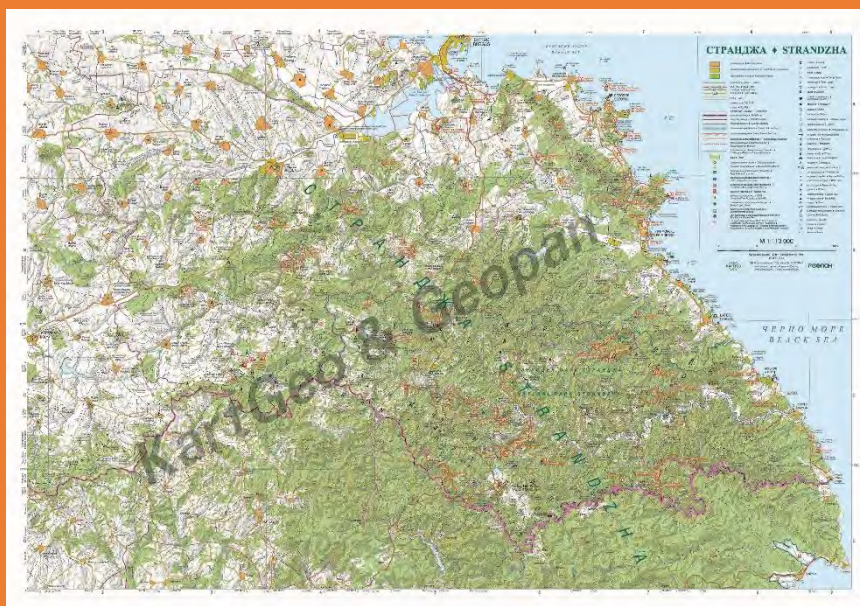

Author(s)	Philippe De Maeyer, Michèle Galant, Bram Vannieuwenhuyze, Guy Vanthemsche
Type	Book
Dimensions (mm)	340x 280
Published by	Dutch edition by Lannoo Publishers; French edition by Editions Racine
Date of publication	30 October 2021
Language(s) of the product	French, Dutch
Abstract/Description (in English or French; 100 words max)	This book makes the history of Belgium visible by means of 100 special old maps. From an Ortelius map on the Roman settlements to the official map with the Belgian language borders from 1964. The combination of historical maps, beautiful illustrations and informative texts, composed by some of the country's best historians and cartographic historians, tells the story of our history in a clear and accessible way.

BULGARIA

MAPS ON PANELS

BGR_MP1	<i>Strandzha – Petrova niva</i>
Type of material	paper
Scale (if relevant)	1:110 000
Dimensions (mm)	700x1000
Author(s)	KartGeo Ltd. and Geopan Ltd.
Published by	KartGeo Ltd. and Geopan Ltd.
Date of publication	10 August 2021
Language(s) of the legend	Bulgarian and English
Abstract/Description (in English or French; 100 words max)	A detailed tourist map of Strandzha mountain with the Western Blacksea coastline from cape Phoros to Igneada. It represents a territory of 7356.8 square km. The map covers the whole geographic boundaries of Strandzha Mountain on the territory of the Republic of Bulgaria and part of the mountain on the territory of the Republic of Turkey. It represents road network, trekking routes, protected areas, tourist chalets and shelters, hotels, archaeological sites, shipwrecks, waterfalls, springs and other natural landmarks and places of interest. The historical area Petrova niva and its adjacent territories are presented in detail on the reverse, scale 1:40 000.

BGR_MP2

Rhodope Range of Alabak

Type of material	paper
Scale (if relevant)	1:40 000
Dimensions (mm)	700x1000
Author(s)	KartGeo Ltd. and Bikearea
Published by	KartGeo Ltd., Bikearea, Alabak
Date of publication	20 September 2021
Language(s) of the legend	Bulgarian and English

Abstract/Description (in English or French; 100 words max)

A detailed tourist map presenting up-to-date information about the range of Alabak located in the beautiful Rhodope Mountains. The focus is on the tourist locations Varvara, Velingrad and Yundola. It includes a huge amount of information about tourist chalets and shelters, protected areas, natural landmarks, historical sites, etc. The map shows all marked trekking and bike routes with colours and numbers (for the bike routes). All routes are described in detail on the reverse.

BGR_MP3

Antarctica Nature Map

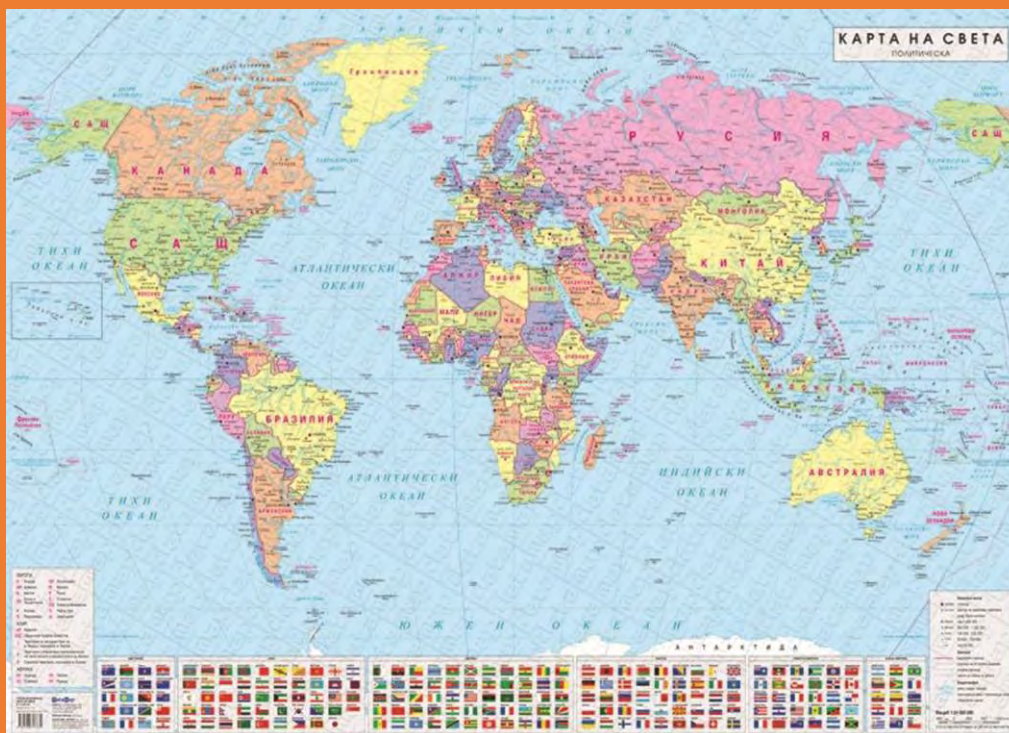

Type of material	paper
Scale (if relevant)	1:10 000 000
Dimensions (mm)	700x1000
Author(s)	DataMap-Europe Ltd.

Published by	DataMap-Europe Ltd.
Date of publication	1.September 2020
Language(s) of the legend	Bulgarian
Abstract/Description (in English or French; 100 words max)	The map is designed on the base of the newest researches of the region. The shade relief is used for good representation of the relief. The polar stations are checked for the actual information by scientists from Bulgarian Antarctic Institute. The map is used mainly for education in Bulgarian schools.

BGR_MP4	Political Map of the World
Type of material	paper
Scale (if relevant)	1:24 000 000
Dimensions (mm)	1400x1000
Author(s)	DataMap-Europe Ltd.
Published by	DataMap-Europe Ltd.
Date of publication	1.August 2020

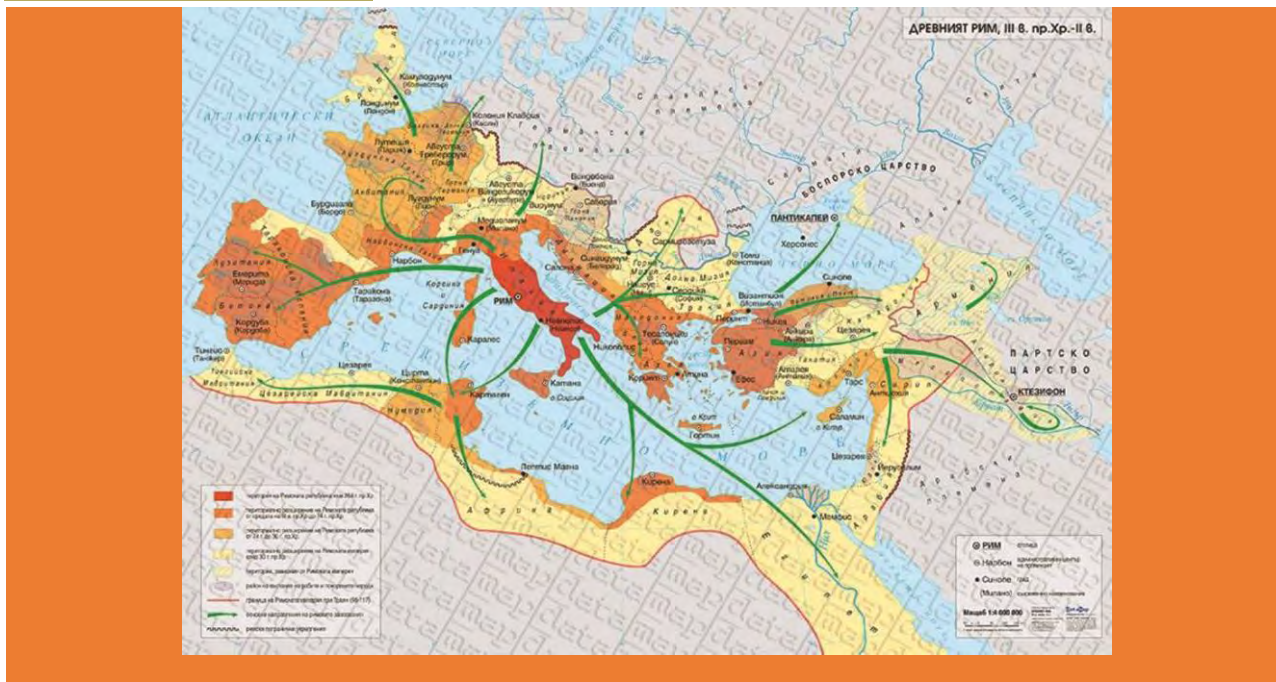

Language(s) of the legend	Bulgarian
Abstract/Description (in English or French; 100 words max)	The map is double-sided laminated, with plastic strips and cord on the top strip for hanging. The newest data for country borders and capital names is used. The flags of all counties of the world are presented on the south part of the map.

BGR_MP5	<i>Early era in Italy. Roman Republic III-II century BC</i>
Type of material	paper
Scale (if relevant)	1:1 500 000
Dimensions (mm)	1400x1000
Author(s)	DataMap-Europe Ltd.
Published by	DataMap-Europe Ltd.
Date of publication	15.October 2020
Language(s) of the legend	Bulgarian
Abstract/Description (in English or French; 100 words max)	The map is designed for the education in the Bulgarian schools. The historical content is represented by appropriate cartographic technics and methods of representation. The symbols and labels are in calculated readable sizes. The rich historic information is represented by readable and understandable way for students.

BGR_MP6 <i>Ancient Rome, 3rd century BC - II c.</i>	
Type of material	paper
Scale (if relevant)	1:4 000 000
Dimensions (mm)	1400x1000
Author(s)	DataMap-Europe Ltd.
Published by	DataMap-Europe Ltd.
Date of publication	15.October 2020
Language(s) of the legend	Bulgarian
Abstract/Description (in English or French; 100 words max)	The map is designed for the education in the Bulgarian schools. The historical content is represented by appropriate cartographic technics and methods of representation. The symbols and labels are in calculated readable sizes. The rich historic information is represented by readable and understandable way for students.

BGR_MP7 Unification of Italy, 1859-1870 Unification of Germany, 1866-1871

Scale (if relevant)	1:1 600 000
Dimensions (mm)	1000x1400
Author(s)	DataMap-Europe Ltd.
Published by	DataMap-Europe Ltd.
Date of publication	15.October 2020
Language(s) of the legend	Bulgarian
Abstract/Description (in English or French; 100 words max)	The map is designed for the education in the Bulgarian schools. The historical content is represented by appropriate cartographic technics and methods of representation. The symbols and labels are in calculated readable sizes. The rich historic information is represented by readable and understandable way for students.

EDUCATIONAL PRODUCTS

BGR_EP1 *Atlas Geography and Economics for 5., 6. and 7. grades*

Author(s)	Temenoujka Bandrova
Type	Atlas
Dimensions (mm)	240x310
Published by	DataMap-Europe Ltd
Date of publication	1 September 2021
Language(s) of the product	Bulgarian
Abstract/Description (in English or French; 100 words max)	The Atlas contains more than 100 maps made by modern technologies, some of which are combined with shadow relief and satellite images. It is designed for the secondary school stage. The first section - 5th grade, covers Geographical information; Planet Earth; Nature of the Earth; Geography of society and economy and Africa. The section for 6th grade, includes the rest of the continents. The third section - 7th grade, deals with Europe, the Balkans and Bulgaria. It provides information on nature, water and soil, climate, flora and fauna, population, economy, transport, trade and tourism, other topics covering the full curriculum.

BGR_EP2 *Atlas Geography and Economics for 10. grade*

Author(s)	Temenoujka Bandrova
Type	Atlas
Dimensions (mm)	155x240
Published by	DataMap-Europe Ltd
Date of publication	1 August 2019
Language(s) of the product	Bulgarian
Abstract/Description (in English or French; 100 words max)	The Atlas is designed for detailed study of the nature, population, settlements and economy of Bulgaria. Geographic information systems and the latest statistical data for the mapping of the studied material were used. It contains many additional graphs and diagrams that show visually and summarized the information in the various sections. The topics are presented in 90 maps. The atlas is made on the basis of the curriculum approved by the Ministry of Education and Science and the state educational requirements for 10th grade.

BGR_EP3 *Atlas History and Civilizations for 10. grade*

Author(s)	Nikola Djulgerov and Temenoujka Bandrova
Type	Atlas

Dimensions (mm)	155x240
Published by	DataMap-Europe Ltd
Date of publication	15 August 2019
Language(s) of the product	Bulgarian
Abstract/Description (in English or French; 100 words max)	The atlas contains 76 maps presenting the rich Bulgarian history. Its content fully covers the curriculum approved by the Ministry of Education and Science for 10th grade. The maps have been developed on the basis of the latest historical research and data using Geographic Information Systems. Geographical base is presented accurately and reliably, and for easier orientation in orography a shade relief obtained on the basis of a 3D model on the territory is presented.

Alex McPhee's Province of Alberta

Type of material	stock paper, laminated or non-laminated
Scale (if relevant)	1:800,000
Dimensions (mm)	1067 x 1727
Author(s)	Alex McPhee
Published by	Prairie Heart Maps
Date of publication	January 2021
Language(s) of the legend	English

Abstract/Description (in English or French; 100 words max)

Alex McPhee's Province of Alberta is a reference map in classic style, showing a well-rounded overview of Canada's fourth-largest province. Elevations, hydrography, and the world-famous Canadian Rockies share space with unique landmarks like the St. Paul UFO Landing Pad. Special attention is paid to Alberta's Indigenous geography, with historic treaty boundaries and surrendered reserve lands appearing on a general-purpose wall map for the first time ever. McPhee's Alberta was created entirely using open data and free software.

CAN_MP9

Harvest Moon Trailway (Nova Scotia)

Type of material	Stock paper
Scale (if relevant)	1:85,000
Dimensions (mm)	1524 x 610

Author(s)	Marcel Morin
Published by	Lost Art Cartography
Date of publication	2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	The 110-km Harvest Moon Railway traverses the Annapolis Valley through beautiful towns along a former railbed, connecting the Landscape of Grand Pré UNESCO World Heritage Site to the historic seaside town of Annapolis Royal. The Harvest Moon Railway sits on the former railbed known as the Dominion Atlantic Railway, first built in 1894. This was one the earliest examples of rail tourism in Canada, carrying tens of thousands of tourists from the United States through the Land of Evangeline, a part of the landscape popularly captured in Henry Wadsworth Longfellow's epic poem Evangeline, A Tale of Acadie.

CAN_MP10	<i>Nature in the City map: A NatureHood Guide to Many Adventures, 1st Ed.</i>
Type of material	Stock paper
Scale (if relevant)	n/a
Dimensions (mm)	813 x 610
Author(s)	Greater Victoria NatureHood / Kathleen Burton
Published by	Capital Regional District
Date of publication	2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	This map tells stories of urban habitats, captivating species and local parks to explore. Environmental information is woven together with original artwork by Kristi Bridgeman and designed by a team of Victoria NatureHood community partners led by Kathleen Burton as project manager and lead writer. The team consisted

of individuals from the District of Saanich, the Capital Regional District and Victoria Natural History Society. The map committee was honoured to work with SENĆOTEN language revivalist ŚW,XELOSELWET Tiffany Joseph and Erich Kelch, First Nations Relations, community engagement coordinator, CRD. Place names in both SENĆOTEN and Lekwungen languages are located throughout the map, and species names are found on the species list.

CAN_MP11		Acadian Deportation in 1755	
Type of material	Paper stock		
Scale (if relevant)	1:3,500,000		
Dimensions (mm)	841 x 594		
Author(s)	Kevin Chen		
Published by	Centre for Geographic Sciences, Nova Scotia		
Date of publication	2021		
Language(s) of the legend	English		

Abstract/Description (in English or French; 100 words max)

There are two objectives for making this map. Firstly, it will assist in creating a preliminary understanding for people who are unaware of the history of the Acadian deportation from Nova Scotia during the 18th century. Secondly, for people who are already aware of this history, it may provide the information in a more vivid form, including, for example, the population patterns of Acadian resettlements along the Atlantic coast of North America.

CAN_MP12 Using Simplified Maps to Explore the COVID-19 Pandemic in Canada

Dimensions (mm)	810*575
Author(s)	Map Institute of Hubei Province Qingdao Geotechnical Investigation & Surveying Research Institute
Published by	Hunan Map Publishing House Co., Ltd.
Date of publication	10/11/2020
Language(s) of the legend	Chinese
Abstract/Description (in English or French; 100 words max)	Conversate with original concepts with civilization and nature, apply traditional techniques of China to bring out

combined maps of natural resources, refer to landscape to portray the charms of mountains, use the blue and white porcelain to render perpetuation of water, deploy New Year wood-block print to explore the verdant forest, refer to gilded lacquer to spray the beaming field, use precious glamor of enamel-ornamented lakes to decorate the beauty of lakes and adopt ancient bronze to inscribe magnificence of grass.

CHARTS ON PANELS

CHN_CP1	<i>Aeroamphibious Map of Jiaozhou Bay</i>
Type of material	Acrylic, raster
Scale (if relevant)	1:120 000
Dimensions (mm)	500*500
Author(s)	Qingdao Geotechnical Investigation & Surveying Research Institute
Published by	Qingdao Geotechnical Investigation & Surveying Research Institute
Date of publication	20/04/2021
Language(s) of the legend	Chinese
Abstract/Description (in English or French; 100 words max)	A combination of sea, land and air of Jiaozhou Bay, the piece of works applies multiple layers of rotatable

transparent acrylic to layer complex information and bring out three-dimensional spatial relationship. Its bottom layer is inlaid with four variable gratings to bring out dynamic trends of tides. This map unshackles constraints of traditional maps and realizes combination of being static and still and four-dimensional integration.

ATLASES

CHN_AT1

[*University Atlas of East China Normal University*]

Type of material	Thematic Atlas with High-end printing papers and acrylic cover sleeve
Number of pages	219
Dimensions (mm)	260 x 30 x 290
Author(s)	Xi TANG, Shan LI, Shiyuan XU, Gongzhuo DU, Xiaoyi ZHU, Yongqing YIN, Feiran SUN, Ping HUANG, Yinda ZHENG, Weimin YANG, Yongxing SUN, Yuming HUANG, Yue HANG, Xueer WU, Meilin LIU, Ziwei JIANG, Yisu LIANG, Xuli YANG, Zhirui ZHANG
Published by	Chinese Map Publishing House; East China Normal University Press

Date of publication	30 August 2021
Language(s) of the text	Chinese
Abstract/Description (in English or French; 100 words max)	This item would be the world first atlas bear the name 'University' as its mapping theme, which illustrates the 70-year progress of ECNU. It succeeds in an 'Integrative and Narrative Information Design' concept, which establishes a dramatic storytelling script, and combines diverse forms of data visualization and infographics. It achieves visual harmony on its layouts by the fusion of several types of 'boundaries' among physical objects, spatial scales, and story scenarios. All the design solutions allow flexible cross-scale synergy, timeline coherence, and thematic counterpoint. This atlas is not a traditional portrayal of a campus, but is a powerful propaganda paradigm to a university's full-view figure.

CHN_AT2		Atlas of Shanghai	
Type of material	DuPont paper		
Number of pages	304		
Dimensions (mm)	250*348		
Author(s)	Shanghai Surveying and Mapping Institute, Sinomap press, Wenqiang Yao/Jing Xin/Chenxi Yu/Meilan Liu/Xi Tang/Min Wang/Xin Luo/Aijun Lu/Zhongjin Lu/Chuan Cheng/Qingwei Wang/Shan Li/Heng Yang

Abstract/Description (in English or French; 100 words max)	By publishing papers on new cartographic and geoinformatic knowledge, both about the application of latest discoveries and modern technologies and historical research, the Cartography and Geoinformation journal aims to contribute to the development of cartography, its promotion and widespread use of geoinformation. In addition to scientific and professional papers, the journal publishes reviews, news and announcements which serve to popularize cartography and geoinformation. All papers are published in both English and Croatian. More details are available at www.kartografija.hr

HRV_OC2	<i>Cartography and Geoinformation</i>
Author(s)	Miljenko Lapaine, Editor-in-Chief
Type	Journal, printed and online
Dimensions (mm)	210x297
Published by	The Croatian Cartographic Society
Date of publication	1 st July 2021
Language(s) of the product	English and Croatian
Abstract/Description (in English or French; 100 words max)	The Cartography and Geoinformation journal publishes scientific and professional papers about cartography and other fields (geography, geodesy, geology, forestry, agronomy, history, architecture, pedagogy...) associated with cartography and geoinformation. At least two reviewers review scientific and professional papers and at least one of the reviewers must be from abroad. Reviewers are active experts, generally with a PhD, who work in the

research field associated with the paper proposed for publishing.

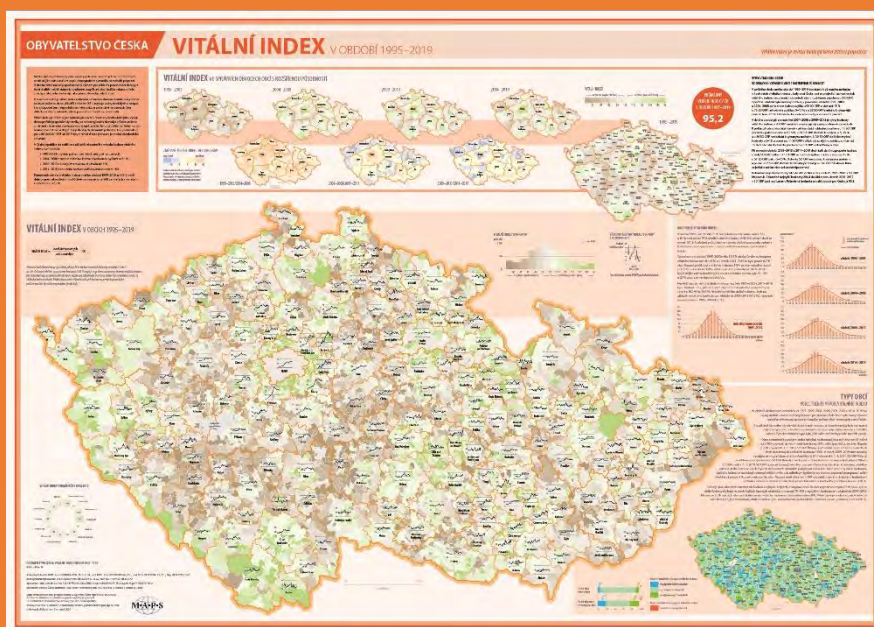

CZECH REPUBLIC

MAPS ON PANELS

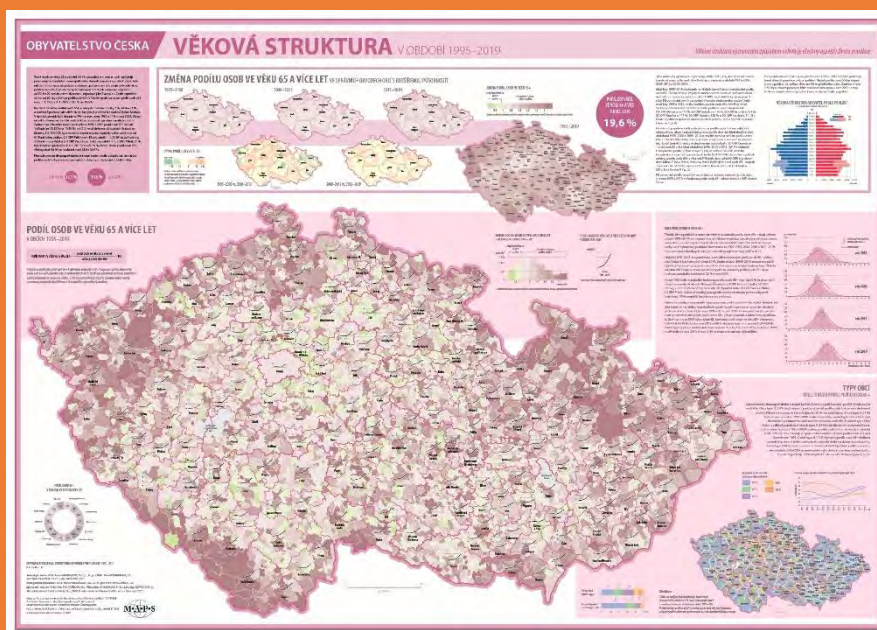

CZE_MP1 Czech Republic Population: Vital Index (M·A·P·S· 14)

Type of material	Paper
Scale (if relevant)	1:500,000
Dimensions (mm)	1,189 × 841
Author(s)	Vondráková, A., Voženílek, V., Rychtaříková, J., Pászto V.
Published by	Palacký University Olomouc
Date of publication	2020
Language(s) of the legend	Czech
Abstract/Description (in English or French; 100 words max)	The map presents the development of the vital index of the Czech population in the period from 1995 to 2019 with a level of details LAU 2 (NUTS 5). In the main map, the development is shown by area color (LAU 2) and a graph for a higher territorial unit (municipalities with extended competencies). The side maps show the data for significant time periods as well as the development of changes over the period 1995 to 2019. The map is published within Map and Atlas Products Series (M·A·P·S·), created by the Department of Geoinformatics, Palacký University Olomouc.

CZE_MP2 Czech Republic Population: Age Structure (M·A·P·S· 15)

CZE_MP4	<i>Permanent Abiotic Predisposition of the Forest Decline (M·A·P·S· 17)</i>
Type of material	Paper
Scale (if relevant)	1:2,250,000
Dimensions (mm)	1,189 × 841
Author(s)	Samec, P., Rychtecká, P., Kudělková, R., Zapletal, M., Barvíř, R., Voženílek, V., Vondráková, A.
Published by	Palacký University Olomouc
Date of publication	2020

Language(s) of the legend	Czech
Abstract/Description (in English or French; 100 words max)	Forest ecosystems are influenced by the abiotic growth environment of the soil and atmosphere (predictors) and the living components dominated by woody plants (receptors). Predictors can take both favourable and unfavourable values, with unfavourable values indicating a predisposition that threatens forest health. The co-occurrence of unfavourable values of several predictors causes progressive forest decline. Using maps of eight key predictors, differentiated into climatic and acidification predictors, areas of the potential decline of Czech forests were defined by cartographic typification. The map is published within Map and Atlas Products Series (M·A·P·S·) by the Department of Geoinformatics, Palacký University Olomouc.

CZE_MP5	<i>Development of the Czech State in the First Half of the 20th Century)</i>
Type of material	Paper
Scale (if relevant)	1:1,100,000
Dimensions (mm)	1,360 × 960
Author(s)	Kartografie PRAHA
Published by	Kartografie PRAHA
Date of publication	2020
Language(s) of the legend	Czech
Abstract/Description (in English or French; 100 words max)	A new edition of the history wall map presents the development of Czechoslovakia from the collapse of Austria-Hungary to 1948 on three thematic maps. The maps

depict territorial gains and losses during and after both World Wars and the post-war organization of the former state, border adjustments, and the main directions of foreign troops during the occupation of Czechoslovakia in 1939. The map is supplemented by a miniature, which students can use independently.

CZE_MP6

Czech Republic – Ethnographic Regions

Type of material	Paper
Scale (if relevant)	numerical scale not specified
Dimensions (mm)	1,400 × 1,000
Author(s)	STIEFEL EUROCART
Published by	STIEFEL EUROCART
Date of publication	2020
Language(s) of the legend	Czech
Abstract/Description (in English or French; 100 words max)	The wall map was created in cooperation with the Ethnological Institute of the Academy of Sciences of the Czech Republic. The aim is to awaken pupils' interest in the history of everyday life in the Czech, Moravian, and Silesian countryside through the topic of traditional folk culture. The map layout is dominated by a map of the Czech Republic

with ethnographic areas where people still preserve original folk traditions – costumes, songs, dialects, etc. The most famous traditions are accompanied by a brief description and examples of folk costumes. The map is supplemented by a miniature, which students can use independently.

CZE_MP7

Europe

Type of material	laminated paper
Scale (if relevant)	1:4,500,000
Dimensions (mm)	1,360 × 960
Author(s)	Kartografie PRAHA
Published by	Kartografie PRAHA
Date of publication	2020
Language(s) of the legend	Czech
Abstract/Description (in English or French; 100 words max)	The map of the European continent brings together the essentials of political and physical mapping: borders and names of countries, all capitals and other major cities, shapes of the land, seas, and oceans, including their names. The elevation, expressed in coloured hypsometry, is complemented by shading, which allows a better perception of the ruggedness of the relief.

CZE_MP8

Gift Set of Maps of Slovakia 1:40,000

Type of material	paper
Scale (if relevant)	1:40,000
Dimensions (mm)	960 × 660 (folded 107 × 165)
Author(s)	SHOCart
Published by	SHOCart
Date of publication	2020
Language(s) of the legend	Slovak, Czech, English, German, Polish
Abstract/Description (in English or French; 100 words max)	The set of maps covers the complete area of Slovakia. It is a limited edition; the set contains 48 maps. The set has its own set of sheets; individual maps from this set are not for sale. The 1:40,000 scale maps are in great demand for their readability and clarity. The maps contain a complete network of marked hiking and biking trails. In addition, they include recommended cycle routes. Maps are created by the Czech cartographic publishing house SHOCart.

CZE_MP9

Beskydy, Javorníky Mountains 1:50,000

Type of material	paper
Scale (if relevant)	1:50,000
Dimensions (mm)	960 × 650 (folded 120 × 220)
Author(s)	Kartografie PRAHA
Published by	Kartografie PRAHA
Date of publication	2020
Language(s) of the legend	Czech, English, German
Abstract/Description (in English or French; 100 words max)	A map presents attractive tourist localities in the Czech Republic, Beskydy and Javorníky Mountains, where the space on both sides of the sheet is used for the map. The tourist content includes castles, chateaus, ruins, lookout towers, nature reserves, places of distant view and much other information. The map also shows a network of marked cycle routes. The map also includes the WGS-84 coordinate grid, which will be used especially by owners of GPS navigation systems and the UTM kilometre grid for easier estimation of distances.

CZE_MP10

Krkonoše Mountains 1:25,000

Type of material	paper
Scale (if relevant)	1:25,000
Dimensions (mm)	960 × 660 (folded 107 × 165)
Author(s)	SHOCart
Published by	SHOCart
Date of publication	2020
Language(s) of the legend	Czech, Slovak, English, German, Polish
Abstract/Description (in English or French; 100 words max)	A double-sided tourist map presents the attractive area of the Krkonoše Mountains at a scale of 1:25,000. The map is a hiking, skiing, and cycling map. It includes nature trails, cycling routes, ski trails, bike parks, cross-country skiing trails, downhill trails and much more. The map was created by the Czech cartographic publishing house SHOCart.

CZE_MP11

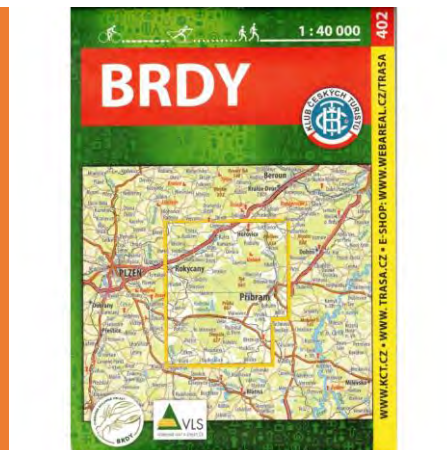

Lerici, city map

Type of material	paper
------------------	-------

Scale (if relevant)	1:7,500
Dimensions (mm)	376 × 400 (folded 100 × 188)
Author(s)	JN-kart
Published by	JN-kart
Date of publication	2020
Language(s) of the legend	Italian, English, German
Abstract/Description (in English or French; 100 words max)	The promotional plan of the town of LERICI, San Terenzo Tellaro, Golfo dei Poeti, which is intended to promote tourism, is trilingual (Italian, English, German). Created and published by the small publishing house JN-kart.

CZE_MP12	<i>Brdy Mountains 1:40,000</i>
Type of material	paper
Scale (if relevant)	1:40,000
Dimensions (mm)	985 × 680 (folded 123 × 170)
Author(s)	Czech Tourist Club
Published by	Czech Tourist Club
Date of publication	2020
Language(s) of the legend	Czech, English, German, Polish
Abstract/Description (in English or French; 100 words max)	The Czech Tourist Club, in cooperation with the Military Forests and Estates of the Czech Republic and the administration of Brdy Protected Landscape Area, has published this double-sided folded map of the entire Brdy Protected Landscape Area at a scale of 1:40,000 with the current hiking and cycling trails (summer 2020). On the side, the map has a detailed text section with the necessary contacts.

CZE_MP13

Poľana, Muráň Plain – touristic map 1:40,000

Type of material	paper
Scale (if relevant)	1:40,000
Dimensions (mm)	960 × 660 (folded 107 × 165)
Author(s)	SHOCart
Published by	SHOCart
Date of publication	2019
Language(s) of the legend	Czech, Slovak, English, German, Polish
Abstract/Description (in English or French; 100 words max)	The map represents a high quality 1:40,000 scale tourist map produced by SHOCart. The more detailed scale is especially suitable for more rugged terrains in Slovakia. The map combines hiking and cycling marked routes, uses time distance display and supports the use of global navigation satellite systems.

CZE_MP14

Czech Breweries 1:500,000

Type of material	paper
------------------	-------

Scale (if relevant)	1:500,000
Dimensions (mm)	985 × 665 (folded 107 × 164)
Author(s)	Kartografie PRAHA
Published by	Kartografie PRAHA
Date of publication	2019
Language(s) of the legend	Czech, English, German
Abstract/Description (in English or French; 100 words max)	The unique map of the Czech Republic complements and expands the list of all operating breweries, small, medium-sized and the largest ones, from the previous edition. Over 450 breweries, including industrial breweries and microbreweries, operating in Bohemia, Moravia, and Silesia. All are depicted on a map. Areas with a dense concentration of businesses, such as Prague, Pilsen, Brno, and Ostrava, are more detailed in map frames at the back. A complete overview of all breweries, including those yet to be built, can be found in the brochure which is an integral part of the map.

CZE_MP15	<i>Wandering in South Moravia and Weinviertel</i>
Type of material	paper
Scale (if relevant)	variable
Dimensions (mm)	300 × 235
Author(s)	SHOCart
Published by	SHOCart
Date of publication	2019
Language(s) of the legend	Czech, German
Abstract/Description (in English or French; 100 words max)	The bilingual map set continues the tradition of pilgrimage maps. It contains pilgrimage sites, routes, and places of interest in their surroundings, processed through maps and accompanying texts and pictorial appendices. The map legend is based on classic tourist maps. The map is

extended with the visualization of St. James and Cyril and Methodius Trails.

CZE_MP17

USE-IT Prague

Type of material	paper
Scale (if relevant)	not specified
Dimensions (mm)	405 × 675 (folded 135 × 135)
Author(s)	Júzit
Published by	Júzit
Date of publication	2019
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	The map responds to the issue of overtourism in Prague originally. It depicts the city centre to draw tourists' attention to activities and attractions outside the most attractive tourist locations. It shows on one side the alternative walking route to the most important sights; the other side of the map guides tourists to the surrounding neighbourhoods. Illustrations, map symbols, and text support the same idea, highlighting tourist traps and interesting local places, showing the city through the eyes of locals.

CZE_MP18

Map of Breweries

Type of material	paper
Scale (if relevant)	1:300,000
Dimensions (mm)	600 × 420 (folded 200 × 100)
Author(s)	Central Bohemia Tourist Board
Published by	Central Bohemia Tourist Board
Date of publication	2019
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	The map presents breweries in the Central Bohemia Region in Czechia. There are 20 breweries with annotation on the backside of the map, map symbols for all other breweries in the region, and cider houses. The map support “beer-tourism” in Czechia.

CZE_MP19

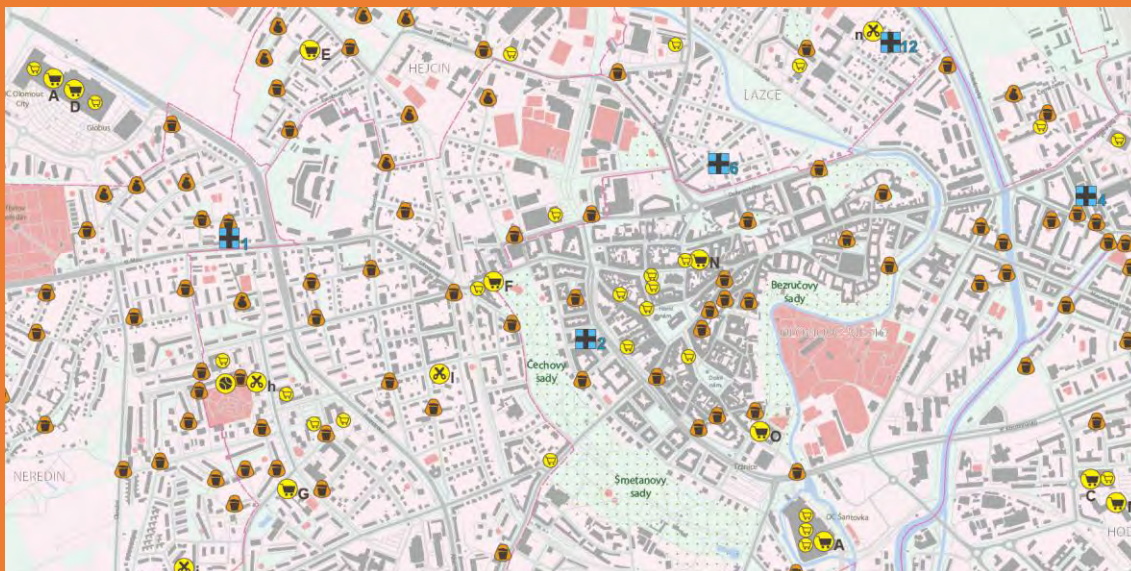

Fishing Map: Pilsen Region

Type of material	paper
Scale (if relevant)	1:165,000
Dimensions (mm)	940 × 660
Author(s)	SHOCart
Published by	Pilsen Region
Date of publication	2019
Language(s) of the legend	Czech, German, English
Abstract/Description (in English or French; 100 words max)	The fishing map presents the Pilsen region from the perspective of the Czech Fishermen's Association districts. The map shows areas, sections of rivers with a fishing permit or with a fishing ban. On the second side of the map is further detailed information about fishing districts.

CZE_MP20	<i>Olomouc Facilities for Dog Owners and Breeders</i>
Type of material	paper
Scale (if relevant)	1:20,000, 1:10,000
Dimensions (mm)	847 × 1,195
Author(s)	Tomáš Vaníček
Published by	Palacký University Olomouc
Date of publication	2020
Language(s) of the legend	Czech
Abstract/Description (in English or French; 100 words max)	The map is one of the outcomes of the bachelor's thesis created by Tomáš Vaníček at the Department of Geoinformatics, Palacký University Olomouc. The main aim of the thesis was to integrate different data sources about the movement and occurrence of dogs in Olomouc. The map presents the most important facilities and characteristics. The map was nominated for the Map of the

Year award (cartographic competition organized by the Czech Cartographic Society) in the Student's work category.

ATLASES

CZE_AT1

Czech Linguistic Atlas: Shortening Vowels

Type of material	book, wire twin
Number of pages	55
Dimensions (mm)	297 × 420
Author(s)	Ireinová, M., Voženílek, V., Pospíšil, M., Koníček, J., Vondráková, A.
Published by	Palacký University Olomouc
Date of publication	2020
Language(s) of the text	Czech
Abstract/Description (in English or French; 100 words max)	The Atlas introduces vowel shortening in Czech dialects. The first section of the Atlas contains dialect maps showing vowels shortening in 16 selected words. The maps present the spatial distribution of the vowel variants (in the nominative, sometimes also in genitive). The second section of the Atlas contains synthetic dialect maps compiled by typification and regionalization using the maps in the first section. The Atlas is the outcome of cooperation between cartographers from the Department of Geoinformatics, Palacký University Olomouc, and experts from the Czech Language Institute of the Czech Academy of Sciences.

CZE_AT2 *Czech Historical Atlas. Chapters from the History of the 20th Century*

Type of material	book, hard cover
Number of pages	297
Dimensions (mm)	240 × 325
Author(s)	Cajthaml, Jiří, Močičková, Jitka, Seemann, Pavel, Semotanová, Eva a Zudová - Lešková, Zlatica
Published by	Institute of History of the Czech Academy of Sciences, Faculty of Civil Engineering, Czech Technical University in Prague
Date of publication	2019
Language(s) of the text	Czech, English
Abstract/Description (in English or French; 100 words max)	The Atlas represents the outcome of the long-lasting cooperation of a team of experts from the Institute of History of the Czech Academy of Sciences, experts from the Department of Geomatics of the Czech Technical University, and experts from the Department of Social Geography and Regional Development of Charles University. The Atlas is divided into three sections: Space, Time, and Society. It contains historical maps with historically important and attractive themes in the 20 th century. Maps presents cartographically depicted historical events still attractive to the professionals as well as non-professionals.

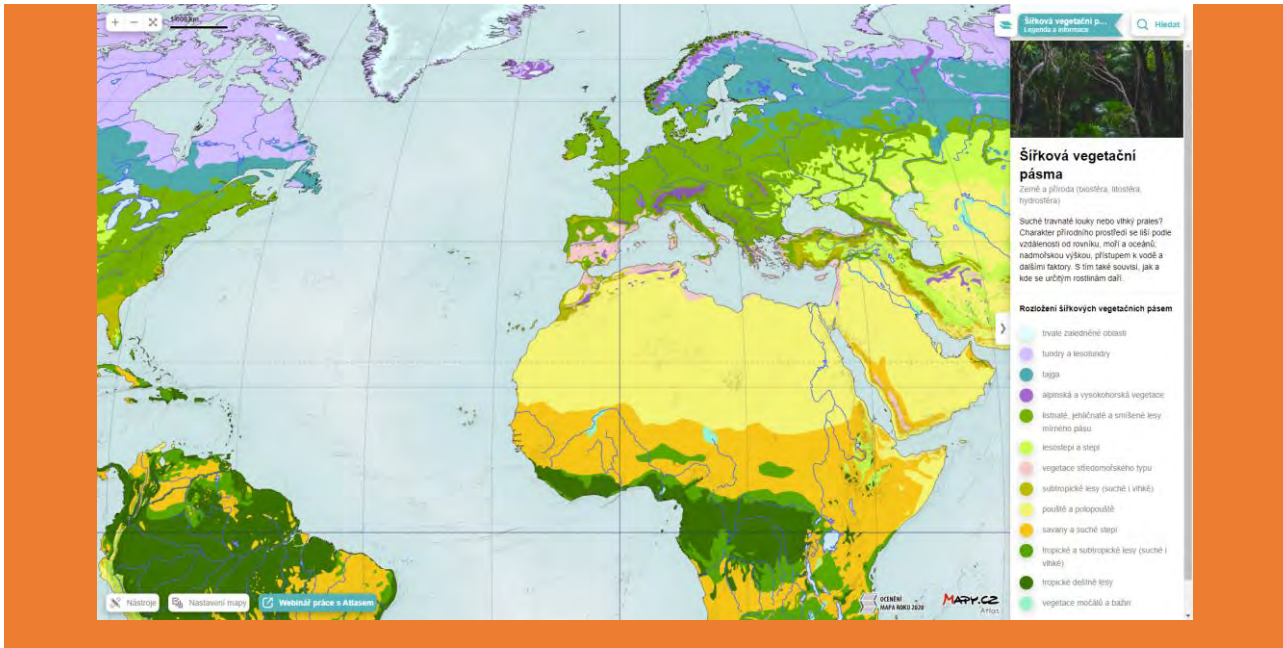

CZE_AT3 <i>Historical Atlas of the Glacensis Euroregion</i>	
Type of material	book, hard cover
Number of pages	144
Dimensions (mm)	300 × 380
Author(s)	Kučera, Z.
Published by	Glacensis Euroregion
Date of publication	2019
Language(s) of the text	Czech, Polish
Abstract/Description (in English or French; 100 words max)	The Atlas aims to enable the reader to form a basic idea of the development of the Glacensis Euroregion on the original and derived old maps of Bohemia, Moravia, Silesia, and Kłodzko. Maps are described in short texts that provide a more detailed analysis of the depiction of this area. The reader can gain knowledge about the historical development of geodesy, topography and especially cartography, and the authors of individual maps. The whole set of maps can be a base for historical research in the presented territory.

CZE_EP1 Set of Atlas and Workbook for 2nd Grade of Primary Schools

Author(s)	Kartografie PRAHA
Type	atlas and workbook
Dimensions (mm)	320 × 230 (2 books)
Published by	Kartografie PRAHA
Date of publication	2019
Language(s) of the product	Czech
Abstract/Description (in English or French; 100 words max)	The first book of the set is a modern school atlas for geography teaching, inspired by school atlases worldwide. The Atlas contains sections dedicated to the universe, the world, individual continents, and the Czech Republic. This content made it possible to present the Czech Republic in the context of the whole world. The workbook complements the Atlas and enables pupils to train newly gained knowledge and apply it within thematic tasks. The target user group are pupils in the second grade of primary schools (age 11 to 15).

CZE_EP2

School Atlas of Today's World

Author(s)	TERRA-KLUB
Type	atlas
Dimensions (mm)	327 × 251
Published by	TERRA-KLUB
Date of publication	2019
Language(s) of the product	Czech
Abstract/Description (in English or French; 100 words max)	The presented book is the second updated and expanded edition of the School Atlas of Today's World. The Atlas is available in a printed version also a follow-up by a digital online version. It is designed for modern teaching; the unique content includes many thematic maps using various methods of cartographic visualization. Also, a lot of graphs, diagrams, texts, and infographics are in the map layouts.

CZE_EP3

Magnetic Hand-painted Map of the Czech Republic

Author(s)	CBS Nakladatelství
Type	magnetic map
Dimensions (mm)	1,500 × 1,000
Published by	CBS Nakladatelství
Date of publication	2019
Language(s) of the product	Czech
Abstract/Description (in English or French; 100 words max)	The map is intended for primary school pupils. It aims to engage the user (children) in an interactive way and with a pleasant design (hand-painted map) and teach them about the Czech Republic through the game. School through play is interesting for pupils, and it is also a great addition to traditional geography teaching. Its use extends beyond schools; it can be used in any children's space. Due to the size, only informative poster will be presented.

Interactive 3D Models of Historical Monuments

Author(s)	Department of Geoinformatics, Palacký University Olomouc
Type	3D plastic models
Dimensions (mm)	500 × 500 × 300
Published by	Department of Geoinformatics, Palacký University Olomouc
Date of publication	2021
Language(s) of the product	English
Abstract/Description (in English or French; 100 words max)	People with visual impairment suffer from a lack of information about 3D geospacer and objects. Through interactive 3D models of historical monuments in Czechia, this deficit is replaced by multisensory action, allowing users to obtain a large amount of contextual information. The models are created within a research project at the Department of Geoinformatics and the Institute of Special Education, Palacký University Olomouc.

CZE_OC2	<i>Atlas of Natural Characteristics of Olomouc Region</i>
Author(s)	Ondřej Biemann
Type	atlas and workbook (bachelor thesis outcome)
Dimensions (mm)	320 × 255 (2 books)
Published by	Palacký University Olomouc
Date of publication	2021
Language(s) of the product	Czech
Abstract/Description (in English or French; 100 words max)	The thesis aimed to create a cartographic publication that summarizes important and interesting information about the natural and geographical characteristics of the Olomouc Region (Czechia) in a clear and attractive form. The resulting product is Atlas of Nature of Olomouc Region, 59 pages, containing 65 maps in seven chapters dealing with the most important geographical and environmental topics. A workbook accompanies it. Both books are the outcome of the bachelor thesis and were created by student Ondřej Biemann.

CZE_OC3 *Handbook: Innovative Forms of Graduated Symbol Maps*

Author(s)	Andrea Hohnová
Type	book (diploma thesis outcome)
Dimensions (mm)	305 × 220
Published by	Palacký University Olomouc
Date of publication	2019
Language(s) of the product	Czech
Abstract/Description (in English or French; 100 words max)	The diploma thesis was focused on the practical implementation of graduated symbol maps. The creation of non-traditional forms of graduated symbol maps is directly related to the creation various diagrams and charts. The handbook “How to...” describes in detail the creation of graduated symbols from their simple designs to complex ones, using ArcGIS software.

Abstract/Description (in English or French; 100 words max)	This beautiful map poster presents the location of national parks in Finland. Transparent map of Finland, in top of tempting landscape photo, shows all 40 national parks with their logos. The map is implemented together with Metsähallitus (the Finnish Forest Administration) and Retkipaikka, which is the most popular outdoor community in Finland. 5% of the poster's revenue is used to support the Finnish national parks.

Abstract/Description (in English or French; 100 words max)	OmaKARTTA (www.karttakauppa.fi/omakartta) is an online web service for desktop where you can produce and order a weatherproof map with your own cropping and definition. Instead of a weatherproof map you can also choose a map board with frames. This sample OmaKARTTA product is a traditional Terrain Map (NLS data and layout) in scale 1:20.000. The map styles has been created in QGIS. The material of the sample map is polyester printing material (SEG Samba Backlit Textile) and the thicker is the PVC material (Heytex Frontlit Light Eco).

FIN_MP3	<i>Nuukio Luukki Outdoor map</i>
Type of material	waterproof and rip-proof paper (Tyvek)
Scale (if relevant)	1:15.000
Dimensions (mm)	700*1000
Author(s)	-
Published by	Karttakeskus / Tapio Palvelut Ltd
Date of publication	16.3.2020
Language(s) of the legend	Finnish, Swedish, English, Deutsch, Russian
Abstract/Description (in English or French; 100 words max)	This strong outdoor map is printed in waterproof material. Two-sided map shows the popular national park, Nuukio, entirely. In addition to topographic information, the map

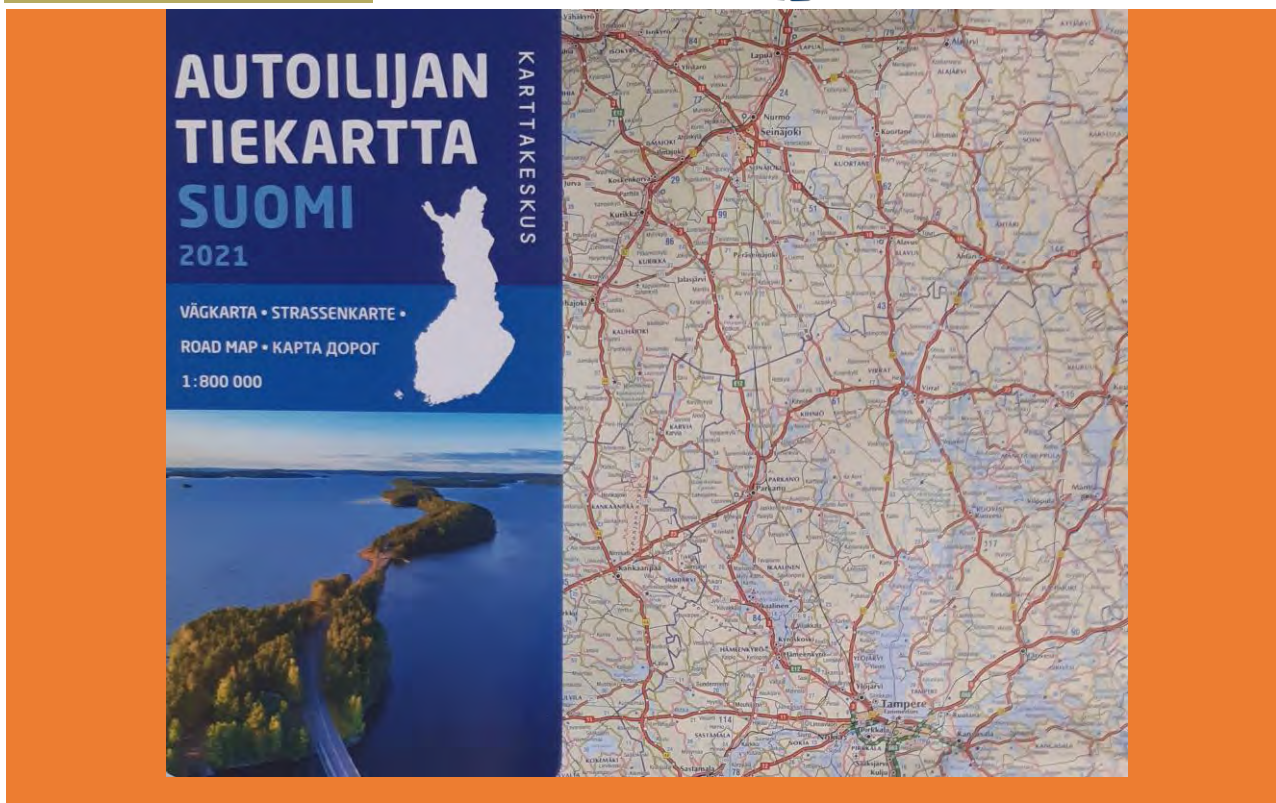

shows routes (marked with symbols similar to signs in the routes) and other outdoor services as well as restaurants and accommodation. There are also ten most popular attractions with their descriptions. The map is available also as digital product for mobile devices.

Senate Maps 1870-1917 Uusimaa region

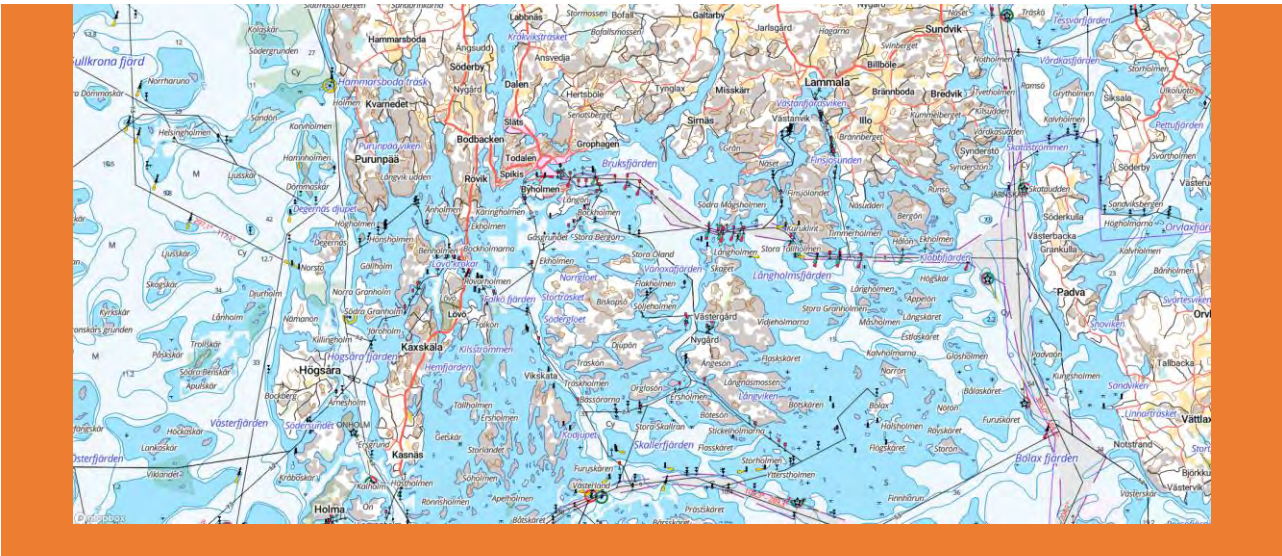

Russian topographic mapping in Finland led by Finnish Generals Alexander Järnefelt and Axel Bonsdorff

Type of material	hard cover
Number of pages	256
Dimensions (mm)	242*304
Author(s)	Antti Jakobsson
Published by	AtlasArt
Date of publication	2020
Language(s) of the text	Finnish
Abstract/Description (in English or French; 100 words max)	The Senate Maps are based on a survey launched by Russian topographers in 1870, which continued until Finland's independence in 1917. The Finnish Senate (then the government in Finland) funded the survey and was the only country to receive two photocopies of maps made. Copies were hand-coloured in Finland, place names are in Finnish or Swedish and updated until 1920s. Exceptionally the Finns led this mapping work but also led the mapping work elsewhere in Russia. This mapping covered the entire Russian border areas of Europe. The book provides first time a facsimile of these maps in the Uusimaa region.

Terrestrial impact structures. the Tandem-X Atlas

Type of material	book, 2 volumes in slipcase
Number of pages	608 pages
Dimensions (mm)	326 × 245 mm
Author(s)	Manfred Gottwald, Thomas Kenkmann and Wolf Uwe Reimold
Published by	Verlag Dr. Friedrich Pfeil
Date of publication	December 1st, 2020
Language(s) of the text	English
Abstract/Description (in English or French; 100 words max)	The global impact crater record only represents a fraction of the bombardment that our planet has had to endure. Remote sensing methods have given us tools of mapping the Earth's surface with high precision. The German

TanDEM-X radar X-band mission, operated by the German Aerospace Center, generated the first global space-borne terrestrial digital elevation model of high resolution, based on Synthetic Aperture Radar interferometric measurements. These data were used to produce the first topographic atlas of all currently confirmed terrestrial impact structures. This book provides the basic principles of impact cratering, of radar remote sensing, and of the TanDEM-X mission.

DEU_DS1 *Ornitho-Regioportal: Web-based Visualization of Bird Observation Data*

Type of service	Web map; vector tile
Format (10 words)	Bird observation connected to various map layers
URL web link	https://www.ornitho-regioportal.de/karte
License	protected by copyright; downloads and copies are only permitted for private, non-commercial use
Author(s)	Johannes Wahl, Christopher König (both: Dachverband Deutscher Avifaunisten), Jana Moser, Tom Hoyer, Sebastian Geidel (all: Leibniz Institute for Regional Geography), Stephan Schwan, Julia Moritz (both: Leibniz Institute for Knowledge Media)
Published by	Dachverband Deutscher Avifaunisten (DDA) e.V.
Date of publication or most recent update	October 2020
Language(s) of the presentation	German

Abstract/Description (in English or French; 100 words max)

The ornitho-Regioportal visualizes bird observation data for Germany. The database contains around 50 million entries (2011–2020), is continuously updated and based on voluntary observations by citizen scientists. In keeping with conservation interests and previous mapreading experiences of the ornithological community, the data is presented in a grid-based format.

The portal aims at:

- presenting observation data on interactive web maps, which makes entries visible "on one's own doorstep" in order to increase the motivation for participation
- improving interpretation of necessarily incomplete data by adding a layer for the reporting activity

The development followed a citizen science approach done in close cooperation of project partners Leibniz Institute for Regional Geography, Dachverband Deutscher and Leibniz Institute for Knowledge Media.

DEU_EP1 Teaching Multivariate Thematic Map Making: the Example of Socio-economic Maps for Northern South Africa

Author(s)	Gertrud Schaab, Sybil Adams & Serena Coetzee
Type	Map collection (prepared as 1 pdf-file for print-out)
Dimensions (mm)	21.0 cm by 29.7 cm (A4 Portrait)
Published by	University of Pretoria (repository URI: http://hdl.handle.net/2263/75571)
Date of publication	2020
Language(s) of the product	English
Abstract/Description (in English or French; 100 words max)	This collection of 28 maps originates from a thematic cartography course presented at the University of Pretoria.

Seven students each prepared two A4 maps based on a different set of variables: a black-and-white map following cartographic principles and rules, and a coloured map with infographics design elements. Placing the student maps next to the same maps enhanced by experienced cartographers, they are a teaching tool to demonstrate the impact of correctly applied cartographic representation methods, the power of thematic maps to reveal geographic patterns and relations, and that diversity of visualization options matters when telling a story with a map.

MAPS ON PANELS

DEB_MP1 <i>General topographic map of Germany 1:750.000</i>	
Type of material	Map printing paper semi-matte 150 g/m ² , Aluminum hanging bar along top and bottom map frame
Scale (if relevant)	1:750.000
Dimensions (mm)	1370 x 960 mm
Author(s)	BKG Federal Agency for Cartography and Geodesy
Published by	BKG Federal Agency for Cartography and Geodesy
Date of publication	2020/2021
Language(s) of the legend	German, English
Abstract/Description (in English or French; 100 words max)	This general topographic wall map of Germany (and parts of adjacent countries) shows topographic elements such as streets, railways, settlements, rivers and lakes, administrative borders and landscape features. Elevation points distributed all over the map joined by an additional overlay of hillshading and a colored hypsometric layer give a good impression of the underlying relief. All wall maps by the BKG are printed on semi-matte map printing paper to provide great color quality while not having any reflections. Aluminum bars are mounted on top and bottom map frames for convenient installation on display holders or walls.

DEB_MP2

Administrative map of Germany 1:750.000

Type of material	Map Printing Paper semi-matte 150 g/m ² , Aluminum hanging bar along top and bottom map frame
Scale (if relevant)	1:750.000
Dimensions (mm)	1370 x 960 mm
Author(s)	BKG Federal Agency for Cartography and Geodesy
Published by	BKG Federal Agency for Cartography and Geodesy
Date of publication	2020/2021
Language(s) of the legend	German, English
Abstract/Description (in English or French; 100 words max)	This wall map shows the federal administration of Germany. Federal states are highlighted with different colors. Graded colors show administrative districts and counties within the states. Different point features also highlight administrative city centers. For better orientation major roads as well as rivers and lakes are shown in the background. All wall maps by the BKG are printed on semi-matte map printing paper to provide great color quality while not having any reflections. Aluminum bars are mounted on top and bottom map frames for convenient installation on display holders or walls.

DEB_MP3 <i>Landscape map of Germany 1:750.000</i>	
Type of material	Map Printing Paper semi-matte 150 g/m ² , Aluminum hanging bar along top and bottom map frame
Scale (if relevant)	1:750.000
Dimensions (mm)	1370 x 960 mm (L x W)
Author(s)	BKG Federal Agency for Cartography and Geodesy
Published by	BKG Federal Agency for Cartography and Geodesy

Date of publication	2020/2021
Language(s) of the legend	German
Abstract/Description (in English or French; 100 words max)	This wall map focusses on Germany's landscape features. Each feature is represented with its boundary and name. Boundaries are further classified into specific types, e.g. historical or economical regions, or even landscapes with unclear boundaries. General topographic map elements have reduced colors as they should only be in the background giving a better orientation. All wall maps by the BKG are printed on semi-matte map printing paper to provide great color quality while not having any reflections. Aluminum bars are mounted on top and bottom map frames for convenient installation on display holders or walls.

DEB_MP4	General topographic map of Germany (North and South) 1:500.000
Type of material	Map Printing Paper satin-finished 120 g/m ²
Scale (if relevant)	1:500.000
Dimensions (mm)	255 x 112 mm (folded), 1020 x 896 mm (unfolded) (L x W)
Author(s)	BKG Federal Agency for Cartography and Geodesy
Published by	BKG Federal Agency for Cartography and Geodesy
Date of publication	2019
Language(s) of the legend	German, English, French
Abstract/Description (in English or French; 100 words max)	These general topographic folding maps of Germany show topographic elements such as streets, railways, settlements, rivers and lakes, administrative borders and landscape features. The map is printed on both sides of the paper. An easy folding mechanism leads the user from the front to back side without losing orientation. The mechanism also works vice versa. An additional map quiz

offers the user a hands-on experience on how to use and read the map. Due to the scale there is a North and a South version of the map.

Date of publication	2019 - 2021
Language(s) of the legend	German, English
Abstract/Description (in English or French; 100 words max)	The regional maps highlight selected regions within Germany that are of major touristic significance. As the map is printed on both sides the front page usually shows a topographic map of the region. Newer map versions also include selected touristic sights. The back pages are made up of a collection of satellite or aerial images of the most prominent city or area within the given region. Additional close-up view images and touristic sights complete the map. All regional maps are made in cooperation with the particular federal state authority. As of today there are seven regions available: Leipzig-Halle, Berlin, Stuttgart, Rhein-Main, München, Hamburg, Ostfriesland.

Published by	BKG Federal Agency for Cartography and Geodesy
Date of publication	2020
Language(s) of the legend	German
Abstract/Description (in English or French; 100 words max)	<p>This map series presents various maps of Germany, Europe and the world.</p> <p>As for the Germany maps there are four different kinds available: topographic, administrative, landscape and physical map. Europe and the world both come as political maps. Unfolded the maps measure a size of 594 x 420 mm which fits the DIN A2 format. The maps can be folded to DIN A4. By default the paper is printed on both sides with map combinations as follows:</p> <p>Germany Topographic – Germany Administrative Germany Landscapes – Germany Physical Europe – Germany Administrative World – Germany Administrative</p>

EDUCATIONAL PRODUCTS

DEB_EP1	<i>Learning map of Germany 1:2 Mio.</i>
Author(s)	BKG Federal Agency for Cartography and Geodesy
Type	Paper Map
Dimensions (mm)	297 x 210 mm (folded), 594 x 420 mm (unfolded) (L x W)
Published by	BKG Federal Agency for Cartography and Geodesy
Date of publication	2020
Language(s) of the product	German
Abstract/Description (in English or French; 100 words max)	A blank outline map of Germany showing only a few topographic elements like borders, rivers, lakes and points for larger cities. Students can fill in the missing feature names to test their knowledge of Germany's geography. Not all of that, the map can also be colored to create a landscape or administrative map. If needed, all solutions to the missing map names can be looked up along the map frame. The unfolded DIN A2 paper format gives students enough space to work on the map. Folded to DIN A4 it can easily be stored in common schoolbags.

TAJIKISTAN Geographical Map / The Pamirs

Type of material	Paper
Scale (if relevant)	1: 650 000
Dimensions (mm)	1250 mm x 880 mm
Author(s)	Gizella Bassa & GiziMap
Published by	GiziMap
Date of publication	2020
Language(s) of the legend	English, German, French, Italian, Russian
Abstract/Description (in English or French; 100 words max)	Tajikistan is an independent country since 1991. It is a paradise for walkers and mountaineers, who just like to be in wild and beautiful places. The Pamir Highway is one of the World's best drive. The highest peak of Tajikistan is Ismail Samani (Ismoil Somoni) Peak (7495 m). The biggest glacier is Fedchenko glacier (length is 77 km). The relief on the map was represented with elevation tints and authors worked out a colourful representation for the mountains. The ancient Penjikent is the Pompei of Central Asia (World Heritage Site). We hope this new map help to know better this wonderful part of the World.

HUN_MP2

GOA Road Map

Type of material	Paper
Scale (if relevant)	1:175 000
Dimensions (mm)	720 mm x 620 mm
Author(s)	Gizella Bassa & GiziMap
Published by	GiziMap
Date of publication	2020
Language(s) of the legend	Hindu, English, German, French, Italian, Russian, Chinese

Abstract/Description (in English or French; 100 words max)

Goa is India's pocket sized paradise and an excellent place for holidays. It is located south from Mumbai. Goa is a one big beach resort, but the central region has many historical and cultural places. 1961 was the end of 450 years Portuguese occupation. We made this map for tourists to help for planning what to see in Goa. Besides the index of places you can find list of selected resorts, beaches, Hindu temples, forts, natural sites, caves, museums, yoga centres, etc. Relief was represented with elevation tints. Inset map: Panaji city centre 1 : 15 000

Date of publication	2021

Language(s) of the legend

Hungarian

Abstract/Description (in English or French; 100 words max)

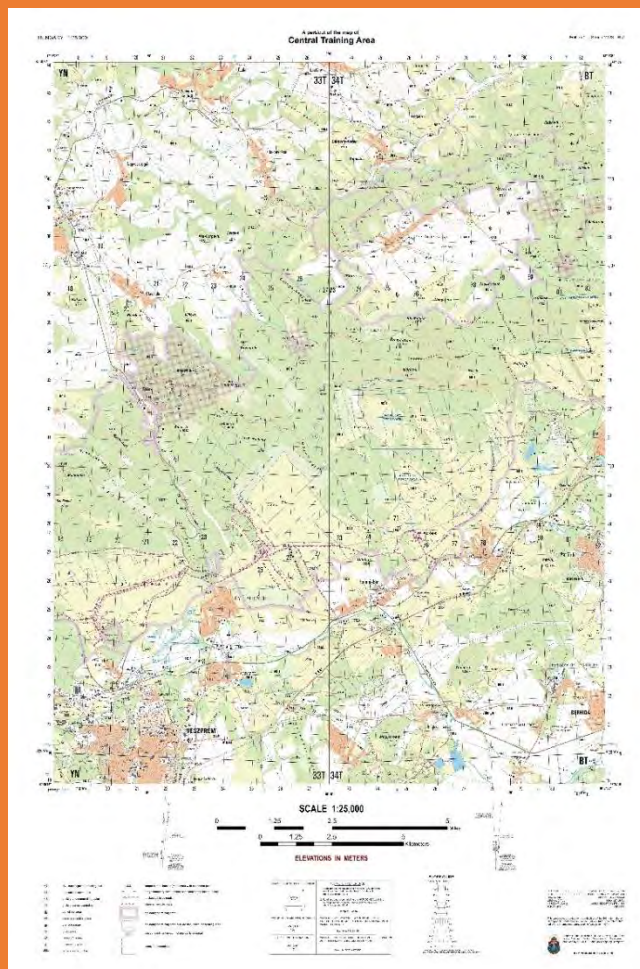

The map represents the Tápíó Nature Park (established in 2019) in Central Hungary on outdoor display boards, placed at prominent places in the cooperating 18 settlements. The graphic representation emphasizes both a remarkable mosaic of the natural environment and a wide range of cultural heritage sites and services. It functions as a poster-size overview of the landscape and serves as a promotional medium for the development of soft tourism in the neighbourhood of Budapest, Hungary.

HUN_MP6

Central Training Area (CTA) Map of Hungary

Type of material	Paper
Scale (if relevant)	1:25 000
Dimensions (mm)	2032 mm × 1168,4 mm
Author(s)	Geoinformation Service of the Hungarian Defence Forces (in short: GEOS HDF)
Published by	GEOS HDF
Date of publication	2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	CTA map is a thematic map based on a GIS database created by semi-automated cartographic methods. The thematic of the map answers the requirements stated in NATO STANAG documents.

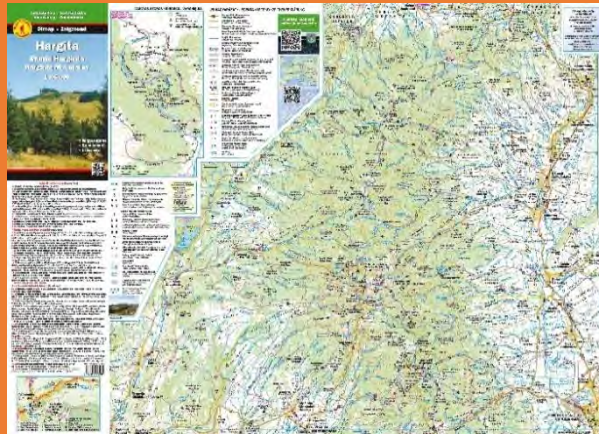

HUN_MP7

Harghita Mountains

Type of material	Paper
Scale (if relevant)	1: 65 000
Dimensions (mm)	680 mm x 490 mm
Author(s)	Zsigmond Enikő, Xantus Juliánna, Xantus László (Miercurea Ciuc - Romania) Fodor Andrea, Kováts Zsolt, Berényi Dániel (Budapest - Hungary)
Published by	DIMAP
Date of publication	2019
Language(s) of the legend	Hungarian, Romanian, English, German
Abstract/Description (in English or French; 100 words max)	About DIMAP: we make and publish a series of tourist maps of Transylvania (Romania) in cooperation with local colleagues since 1990. This area is a very diversified and a bit mysterious region of Europe and at least one million Hungarian people live there. This fact is important for us.

We present the various lands not just for tourists, but also to demonstrate our cultural heritage for instance with detailed appellation by Hungarian language. These – almost forgotten – names of hills/streams/lanes mostly cannot be readable on other current printed maps or map applications.

HUN_MP8

Retezat Mountains

Type of material	Paper
Scale (if relevant)	1: 50 000
Dimensions (mm)	805 mm x 560 mm
Author(s)	Jancsik Péter (Cluj - Romania), Fodor Andrea, Kováts Zsolt (Budapest – Hungary)
Published by	DIMAP
Date of publication	2020
Language(s) of the legend	Hungarian, Romanian, English, German
Abstract/Description (in English or French; 100 words max)	DIMAP makes and publishes a series of tourist maps of Transylvania (Romania) in cooperation with local colleagues since 1990. Perhaps the Retezat Mountains is the most beautiful and intact region of the Carpathian Mountains, with almost a hundred glacial lakes in the summit area. The map sheet presents the area of the National Park and the neighbouring lands. Authors also included a detailed description – written in three languages – at the backside of the map.

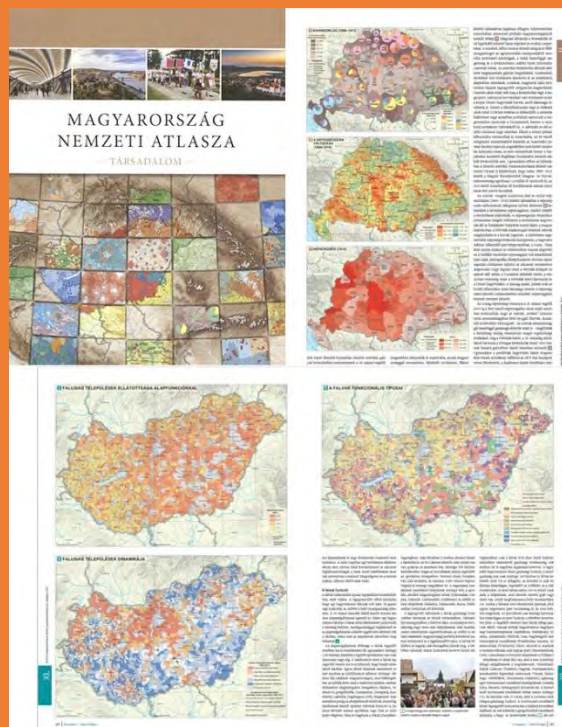

ATLASES

HUN_AT1 <i>School Atlas in English for Bilingual Schools</i>	
Type of material	Paper
Number of pages	176
Dimensions (mm)	200 mm x 280 mm (portrait format)
Author(s)	Cartographia Tankönyvkiadó Ltd.
Published by	Cartographia Tankönyvkiadó Ltd.
Date of publication	2019
Language(s) of the text	English
Abstract/Description (in English or French; 100 words max)	This publication makes equal opportunities for students of English-Hungarian bilingual schools with those who study in Hungarian schools. The atlas helps their primary and secondary education as well as their school leaving exams. This school atlas in English is based on the Hungarian National Curriculum and is all in one resource that has long been missed from the bilingual education in Hungary. It is made up of maps in English and its content is almost identical to the Hungarian school atlases, but new topics have been also added, e.g. the section on Anglo-Saxon culture designed exclusively for bilingual schools.

ISRAEL

MAPS ON PANELS

ISR_MP1	<i>Religions of Jerusalem</i>
Type of material	Paper
Scale (if relevant)	1:17,500
Dimensions (mm)	841*1,189
Author(s)	Oren Raz
Published by	Israeli Central Bureau of Statistics
Date of publication	2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	Dot density maps do a wonderful job in depicting raw population data. Jerusalem's population density and religions are mapped by statistical areas, depicting a distinct geographic division between the different religions in the city. With 1 dot representing 1 person, this map has about 1 million dots in it. Without any labels, this illuminous firefly design tells a story of contemporary reality, history, conflict, integration vs. separation and maybe even hope. Amen.

ISR_MP2	<i>State of Israel – Periphery Cluster by Local Authorities</i>
Type of material	Paper

Scale (if relevant)	1:1,100,000
Dimensions (mm)	841*1,189
Author(s)	Oren Raz
Published by	Israeli Central Bureau of Statistics
Date of publication	2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	A peripheral region is defined as a region distant from opportunities (e. g., markets, jobs, and health services), activities (e. g., work, education, shopping, and leisure), or from assets existing in all the regions. The Peripherality Index was constructed according to this definition, for the purpose of characterizing the localities and the local authorities according to their geographic location, within a range of the most peripheral to the most central. This index is mapped by local authorities in Israel and depicts a distinct geographic pattern of central Vs. peripheral. This shows the advantage of a map over data-laden tables.

ATLASES

ISR_AT1 *State of Israel – 70 Years of Statistics, Historical Statistical atlas 1948-2018*

Type of material	Paper, hard cover
Number of pages	172
Dimensions (mm)	230*330
Author(s)	Oren Raz
Published by	Israeli Central Bureau of Statistics
Date of publication	06/2021
Language(s) of the text	Hebrew, English
Abstract/Description (in English or French; 100 words max)	<p>This atlas is a historical statistical atlas that depicts the development of the State of Israel in the fields of demography, society and the economy and in a variety of other fields.</p> <p>The atlas is largely based on data collected by the Central Bureau of Statistics over the years. Types of maps and charts: 28 historical maps and 12 historical diagrams scanned from the source; 6 maps with up-to-date data based on a retro-cartographic structure of original historical maps - displayed next to the original maps; 235 maps and 43 diagrams produced specifically for the Atlas in a contemporary design.</p>

ISR_AT2 *The Truman Institute Atlas of the Jewish-Arab Conflict*

Type of material	Paper, hard cover
Number of pages	80
Dimensions (mm)	215*305
Author(s)	Shaul Arieli
Published by	The Truman Institute, Hebrew University of Jerusalem

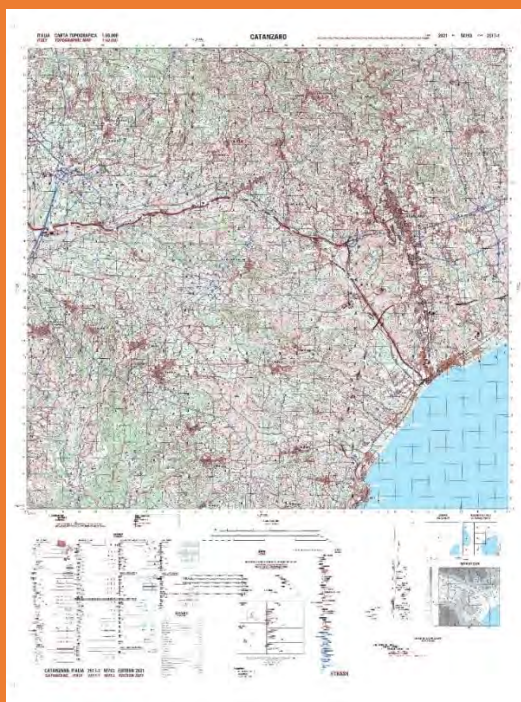

Date of publication	06/2021
Language(s) of the text	English
Abstract/Description (in English or French; 100 words max)	<p>The question of Israel's borders has been a permanent item on the agenda of the Zionist movement and the State of Israel since the Balfour Declaration. In this atlas we have chosen to present the most significant and formative events of the conflict in two main areas—diplomacy and security, and to a lesser extent in related fields, such as demography and settlement. The initiative to publish this atlas reflects a growing understanding that there is a need for a concise and concentrated foundation that can create a common denominator for study, discourse, and debate.</p>

Geological Map of the Majella Mountain

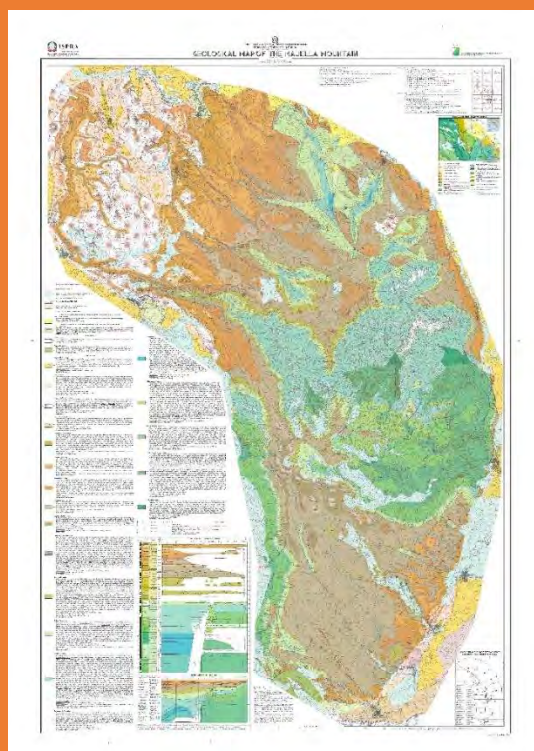

Type of material	paper
Scale (if relevant)	1:25.000
Dimensions (mm)	1000 x 1400
Author(s)	Patacca E., Scandone P., Di Manna P.
Published by	ISPRA, Geological Survey of Italy; Abruzzo Region
Date of publication	May 2021

Language(s) of the legend

English

Abstract/Description (in English or French; 100 words max)

The geological map of the Majella Mountain is the synthesis of geological surveys carried out since the 1980s at 1:10,000 scale and integrated with detailed structural and stratigraphic analyses. The cartographic project, coordinated by Etta Patacca and Paolo Scandone, benefits of the contribution of researchers (see list on the map) from the Consiglio Nazionale delle Ricerche, Universities of Roma-La Sapienza, Roma-Tre, Torino and Pisa. In 2000-2003 the research was supported by ENI-AGIP Exploration and Development Division and, as co-sponsorship, by NorskHydro (now Statoil), in the framework of the Majella Task Force Research Project.

ITA_MP6 Geological Map of the Simbruini Mounts Regional Natural Park

Type of material	paper
Scale (if relevant)	1:35.000
Dimensions (mm)	900 x 700
Author(s)	D'Orefice M., Fabbi S., Pantaloni M., Pichezzi R.M., Falcetti S., Roma M.
Published by	ISPRA, Geological Survey of Italy; Lazio Region, Simbruini Mounts Regional Natural Park
Date of publication	October 2019
Language(s) of the legend	Italian

Abstract/Description (in English or French; 100 words max)

The Simbruini Mounts Regional Natural Park is the largest protected area in the Lazio region. Its name derives from the Latin *sub imbribus* and testifies to the rich presence of water, already used in Roman times for various aqueducts, and which originates the Aniene River. The high mountain chain of the Simbruini Mounts is interrupted by plateaus of karstic origin, intermountain plains surrounded by extensive beech forests, with numerous dolines and sinkholes. The geological map of the Park represents a valid support for the geological and geomorphological knowledge of the territory and has been created for scientific, hiking and educational purposes. Double-sided.

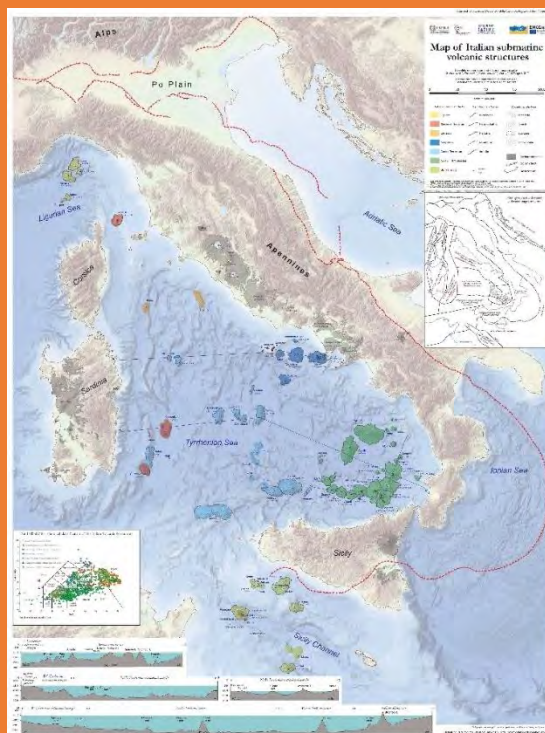

ITA_MP7

Map of the Italian submarine volcanic structures

Type of material	paper
Scale (if relevant)	1:1.600.000
Dimensions (mm)	700 x 800
Author(s)	Giordano G., Pensa A., Fiorentino A., Vita L., D'Angelo S.
Published by	ISPRA, Geological Survey of Italy; Roma Tre University; EMODnet
Date of publication	May 2019
Language(s) of the legend	English

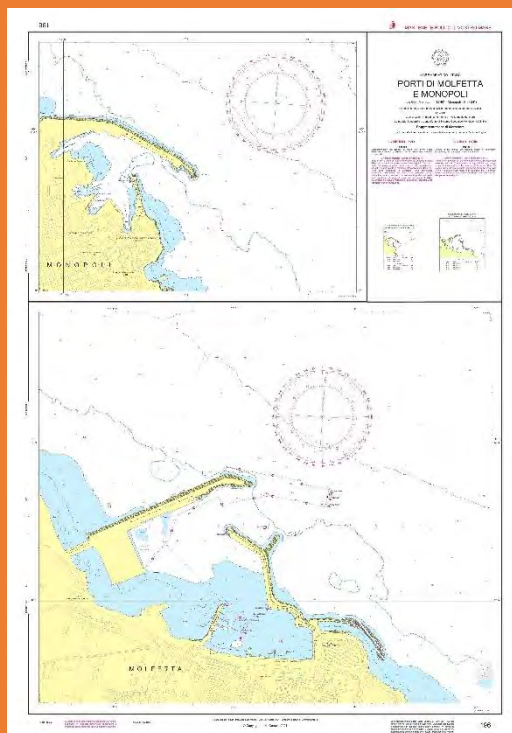

Abstract/Description (in English or French; 100 words max)

The map represents the 76 volcanic centers identified in Italian seas on top of a DEM realized by the EMODnet Bathymetry project. Volcanic structures are characterized by sector (Ligurian, Corsica-Sardinian, Etruscan, Neapolitan, Central Tyrrhenian, Aeolian - E Tyrrhenian, Sicily Channel); by the main magmatic series of their products (calcaline, HK-calcaline, K-alkaline, NA-alkaline, tholeiitic); by morphotype (composite, fissural, lava cone, stratovolcano). The main geodynamic domains are reported in a side map, as well as the Total Alkali-Silica diagram, to help understand the subdivision into sectors.

ATLASES

ITA_AT1		<i>A journey to Mining Italy</i>
Type of material	paper	
Number of pages	122	
Dimensions (mm)	215 x 215 x 10	
Author(s)	Patané A., Sisti R., Lasco A. (Editors)	
Published by	ISPRA; Rete Nazionale dei Parchi e dei Musei Minerari (ReMi)	
Date of publication	July 2020	
Language(s) of the text	Italian / English	
Abstract/Description (in English or French; 100 words max)	<p>Several mining sites have redesigned the mining landscape from Northern to Southern Italy. They have been transformed, valued and converted into mining parks and museums and are today presented in “A journey to Mining Italy”.</p> <p>The ReMi network “A journey to Mining in Italy” summarizes the results of years of work spent into creating new forms of cultural attractions deriving from former mines.</p> <p>The promotion of mining tourism as a form of responsible and sustainable tourism especially if integrated with the already existing circuits of historical walks, Italian villages, touristic railways, eco-friendly pathways and high quality enogastronomic sector.</p>	

ITA_AT2		<i>Atlas of Italian Submarine Volcanic Structures</i>
Type of material	paper	

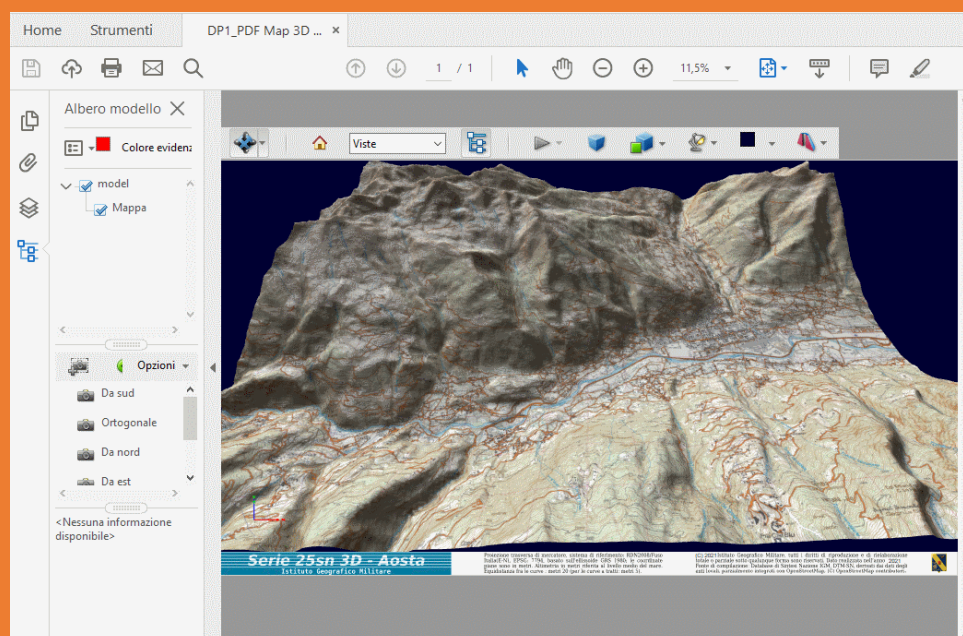

Number of pages	188
Dimensions (mm)	210 x 297 x 10
Author(s)	D'Angelo S., Fiorentino A., Giordano G., Pensa A., Pinton A., Vita L. (Editors)
Published by	ISPRA, Geological Survey of Italy
Date of publication	May 2019
Language(s) of the text	English
Abstract/Description (in English or French; 100 words max)	<p>This volume presents the results of the inventory of submerged volcanic structures in Italian seas carried out in the frame of the European EMODnet Geology Project. Introductory chapters are dedicated to general topics, whereas the Atlas of the Italian Submerged Volcanic Structures constitutes the second part. The 76 volcanic centers identified are presented individually in dedicated sheets and organized in seven sectors: Ligurian, Corsica-Sardinian, Etruscan, Neapolitan, Central Tyrrhenian, Aeolian-Tyrrhenian and Sicily Channel. Information is provided on geographic location, geology and geomorphology, geophysical data, heat flow, magnetic/geothermal anomalies, samples, geochemical composition, age, type of volcanic activity, gas/fluid emissions.</p>

License	Copyright IGMI
Author(s)	IGMI
Published by	IGMI
Date of publication or most recent update	2021
Scale	1:25,000
Language(s) of the presentation	Italian
Abstract/Description (in English or French; 100 words max)	This interactive 3D map represents the central part of Aosta Valley, in the Italian Western Alps. It employs the transverse Mercator projection, using as reference system RDN2008/Fuso Italia (E-N), EPSG: 7794, based on GRS 1980 ellipsoid. Plane coordinates are in meters. Altimetry refers to the mean sea level. Contour line equidistance: 20 m (dashed contour line equidistance: 5 m).

Scale	1:10,000
Language(s) of the presentation	Italian / English / French / German
Abstract/Description (in English or French; 100 words max)	The national IdroGEO web platform allows the navigation, social sharing and download of data, maps, reports of the Italian Landslide Inventory, national hazard maps and risk indicators. It is a tool for communication and dissemination of information to support decisions in risk mitigation policies, land use planning, preliminary design of infrastructures, management of civil protection emergencies. The challenges of the platform concern usability, access on multiple devices (smartphones, tablets, desktops), interoperability, transparency, reuse of information and software in the public sector. The solutions adopted to address them include Progressive Web Application (PWA), Application Programming Interface (API), open libraries and software. A landslide inventory management system has been developed via REST API for data entry and approval workflow to update the Italian Landslide Inventory in a distributed and collaborative manner.

JAPAN

MAPS ON PANELS

JPN_MP1

1:10,000 Topographic Map, "CENTRAL TOKYO", in commemoration of the enthronement of His Majesty the Emperor

Type of material	paper
Scale (if relevant)	1:10,000
Dimensions (mm)	1,090 × 790
Author(s)	Geospatial Information Authority of Japan
Published by	Geospatial Information Authority of Japan
Date of publication	22nd Oct. 2019
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	GSI published the commemorative map, "CENTRAL TOKYO" on the sidelines of the "Sokuirei-Seiden-no-gi", Ceremony of the Enthronement of His Majesty the Emperor at the Seiden(State Hall), on October 22, 2019. This map is created in English in addition to Japanese for the purpose of leaving Tokyo, the capital of Japan, to future generations as the map, and conveying central Tokyo clearly in the first year of the new era, "Reiwa", both to Japanese and foreign visitors.

JPN_MP2 *Digital Elevation Topographic Maps, "Sumida Ward, Koto Ward, Adachi Ward, Katsushika Ward, Edogawa Ward"*

Type of material	paper
Scale (if relevant)	1:22,000
Dimensions (mm)	841 × 1,189
Author(s)	Geospatial Information Authority of Japan
Published by	Geospatial Information Authority of Japan
Date of publication	2020
Language(s) of the legend	Japanese
Abstract/Description (in English or French; 100 words max)	The Geospatial Information Authority of Japan has created a digital elevation topographic map in which the lowlands are colored cold and the highlands are colored warm, with shades superimposed. In the lowlands of Tokyo shown on this map, urban industrialization is progressing, land subsidence is progressing, and millions of people live in areas protected by embankments. Although there has been no major flood damage in the last half century, this map was created because major damage is expected in areas where the altitude is lower than 0 m, and local governments need to focus on disaster prevention.

JPN_MP3 *1 : 25,000 Active Fault Map "Matsumoto Kaiteiban", "Itoigawa-Shizuoka Fault Zone and its vicinity"*

Type of material	paper
------------------	-------

Scale (if relevant)	1:25,000
Dimensions (mm)	1,091 × 788
Author(s)	Geospatial Information Authority of Japan
Published by	Geospatial Information Authority of Japan
Date of publication	12th Nov. 2020
Language(s) of the legend	Japanese
Abstract/Description (in English or French; 100 words max)	The Geospatial Information Authority (GSI) conducted a tectonic geomorphological survey along the northern central part of the Itoigawa-Shizuoka Tectonic Line (ISTL) fault zone, which is a major active fault zone in Japan and has a high risk of earthquake disasters. The survey was based on aerial photograph interpretation, field surveys, and high-resolution digital elevation models (DEM) from airborne LiDAR data. The result was summarized as "1:25,000 Active Fault Map" and released in November, 2020. This map shows not only major known active fault but also the newly confirmed fault-related deformations."

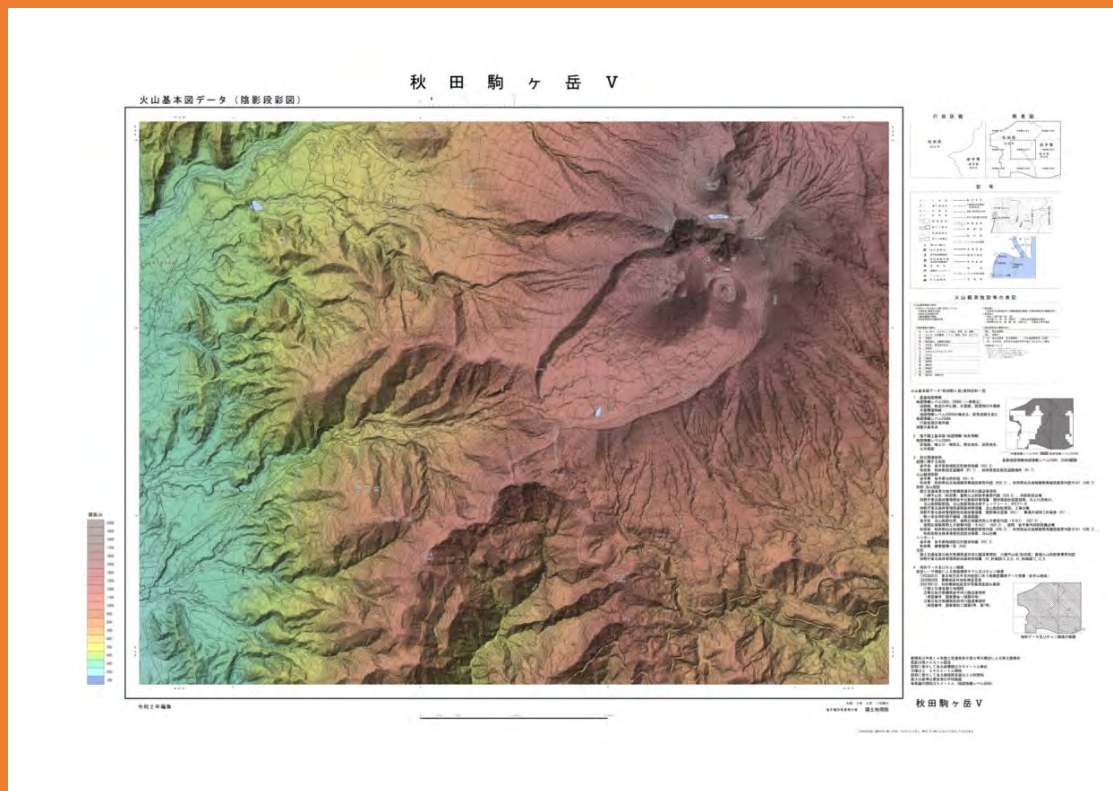

JPN_MP4	Volcanic Base Map Data (Base map) "Akita Komagatake V"

JPN_MP7

Land Condition Map of Volcano "Mt.Hakone"

Type of material	paper
Scale (if relevant)	1:30,000
Dimensions (mm)	1,189 × 841
Author(s)	Geospatial Information Authority of Japan
Published by	Geospatial Information Authority of Japan
Date of publication	2021
Language(s) of the legend	Japanese
Abstract/Description (in English or French; 100 words max)	Geospatial Information Authority of Japan publishes Land Condition Map of Volcano that depict classification of the volcanic material deposition (lava flows, pyroclastic flows, pyroclastic hills, debris avalanches, etc.) that was caused by previous volcanic activity. This map is Land Condition Map of Volcano "Mt.Hakone" (released in 2021).

JPN_MP8

Topography of the Moon by IN-YOU-ZU

Type of material	paper
Scale (if relevant)	1:50,000
Dimensions (mm)	841 × 1,189
Author(s)	AKIYAMA Yukihide, SAKAI Takuya
Published by	AERO ASAHI CORPORATION
Date of publication	7th July 2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	This map uses data measured by the laser altimeter of the lunar orbiting satellite SELENE operated by JAXA, and represents the topography of the moon in the IN-YOU-ZU. The IN-YOU-ZU analyzes the topographical shape as a waveform and expresses the undulations. By using the IN-YOU-ZU analysis method, craters of various sizes are clearly shown. This map makes it easy to grasp the position and shape of the crater by showing the high altitude part in brown color and the low altitude part in blue color compared to the surroundings. Satellite remote sensing technology

contributes to detailed topographical understanding of planets far from the earth.

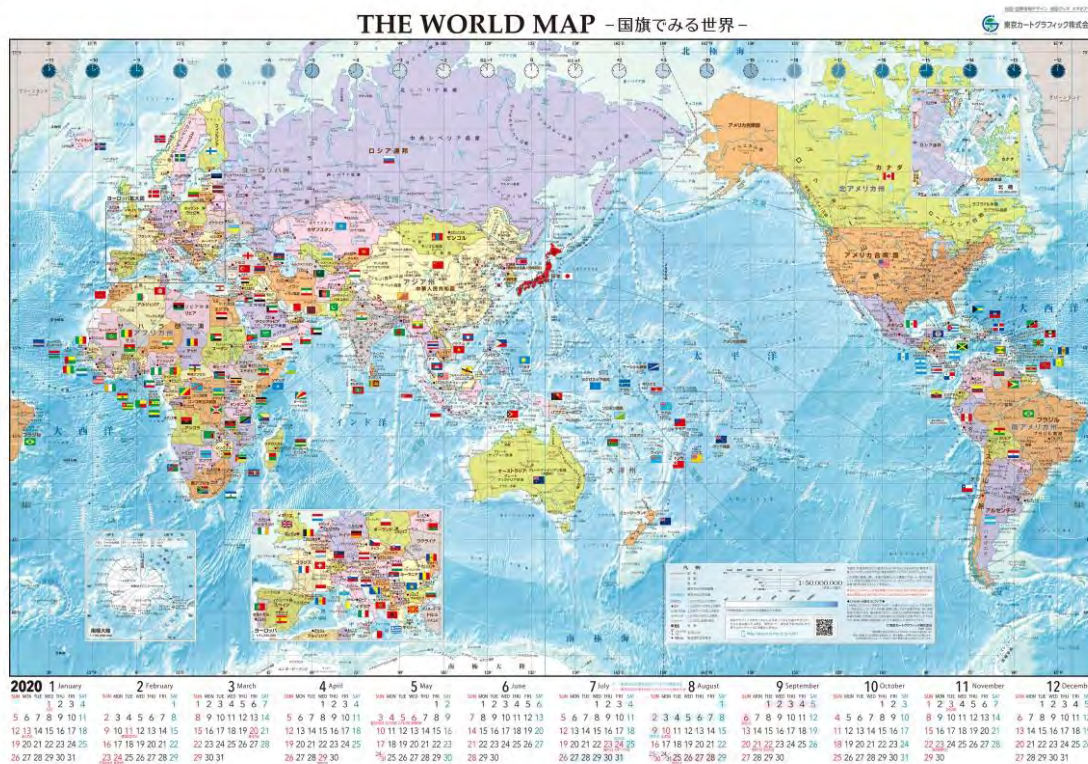

JPN_MP9 2020 Calendar *The World Map : The world seen from the national flag*

Type of material	paper
Scale (if relevant)	1:50,000,000
Dimensions (mm)	841 × 594
Author(s)	Tokyo Cartographic Co., Ltd.
Published by	Tokyo Cartographic Co., Ltd.
Date of publication	Dec. 2019
Language(s) of the legend	Japanese

Abstract/Description (in English or French; 100 words max)

This world map shows the national flag where each country is displayed. Compared to the map with the national flag placed around the map, the map with the national flag that reflects the history, culture, and thought of each country at the actual position of each country like this map intuitively recognizes that the national flag and the country are connected, and it is clear that the national flag has regional characteristics. In addition, "8 directional lines indicating north, south, east, and west" and "equidistant areas every 1000 km" from Tokyo are displayed.

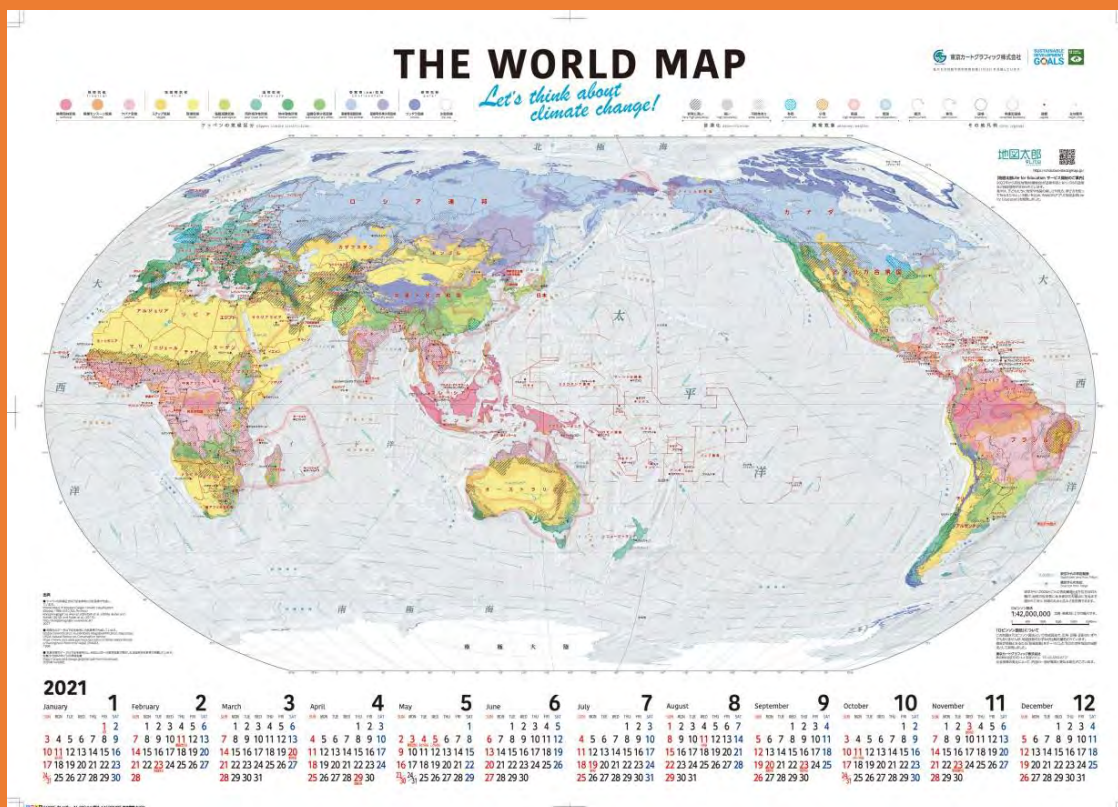

JPN_MP10

2021 Calendar The World Map: Let's think about climate change

Type of material	paper
Scale (if relevant)	1:42,000,000
Dimensions (mm)	841 × 594
Author(s)	Tokyo Cartographic Co., Ltd.
Published by	Tokyo Cartographic Co., Ltd.
Date of publication	Dec. 2020
Language(s) of the legend	Japanese
Abstract/Description (in English or French; 100 words max)	This world map uses the Robinson projection, which has a relatively relaxed projection distortion, but it is neither conformal, equal product, nor equidistant. The information

on the land area expresses the Köppen climate classification with a unique sense of color, adds information on abnormal weather and desertification that have occurred in the world, and appeals for "SDG's Goal 13-CLIMATE ACTION-". In addition, "8 directional lines indicating north, south, east, and west" and "equidistant areas every 1000 km" from Tokyo are displayed.

Type	Plastic
Dimensions (mm)	115 × 205mm
Published by	Tokyo Cartographic Co., Ltd.
Date of publication	July 2021
Language(s) of the product	Japanese
Abstract/Description (in English or French; 100 words max)	<p>A double-pocket mask case that can store two masks. Antibacterial varnish is applied to the inside of the pocket. There are four types of designs: a detailed world map, a map of Japan, national flags of each country, and map symbols.</p> <p>World map: Includes a color-coded world map by country, a magnified map of Europe, an Arctic map, and an Antarctic map. Map of Japan: Includes color-coded maps of Japan for prefectures, maps of the Ogasawara Islands, and maps of the Nansei Islands. National flags: Contains national flags of 197 countries.</p> <p>Map symbols: Contains 91 types of map symbols.</p>

NEW ZEALAND

MAPS ON PANELS

NZL_MP1	<i>Raglan/Whaingaroa</i>
Type of material	Paper
Scale (if relevant)	1:19,000
Dimensions (mm)	420mm x 594mm
Author(s)	Ian Reese
Published by	Ian Reese
Date of publication	June 2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	Raglan, NZ receives much attention for its world class surf breaks, but often overlooked is the beauty of the harbour where the town lies. Little topographical information for this region exists, so the map is developed to let the land tell the story. The map is created by blending existing 8m terrestrial elevation data, aerial imagery, and a bathymetric interpolation of the harbour depths. Names are taken from the New Zealand Geographic Board where applicable, with some names derived from the Maori Oral History Atlas, 1991.

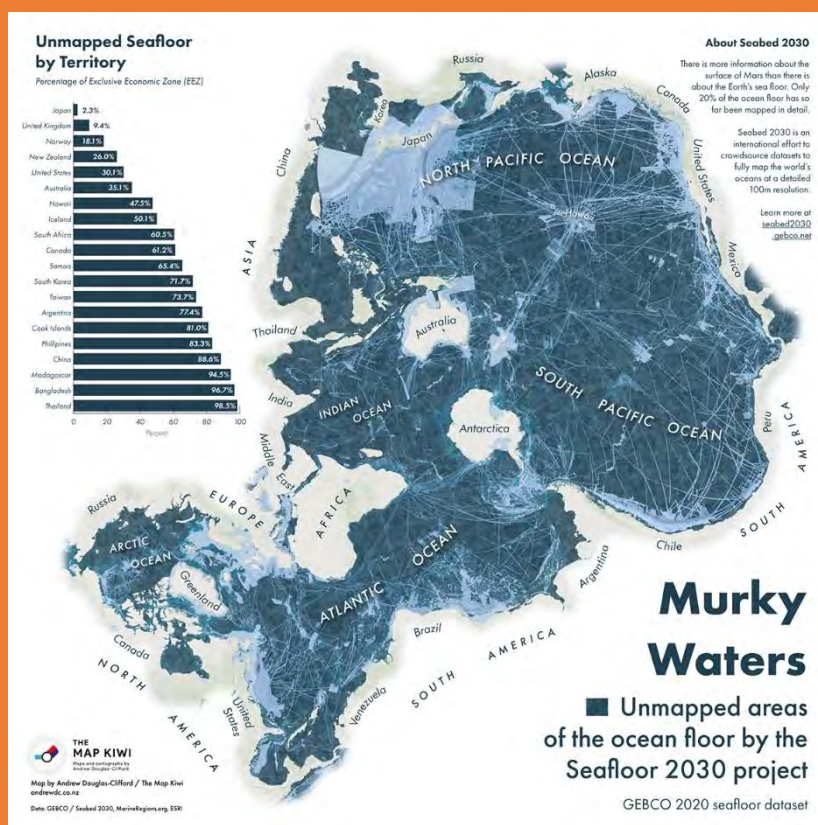

NZL_MP2 *Coromandel*

Type of material	Paper
Scale (if relevant)	1:110,000
Dimensions (mm)	600mm x 840mm
Author(s)	Geoff Aitken
Published by	NewTopo Mapping
Date of publication	July 2020
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	The Coromandel Peninsula is a holiday and recreation destination close to Auckland – New Zealand’s largest city. The map shows the whole of the Peninsula with detail encouraging planning the exploitation of walking opportunities in the area. The map complements a larger scale two-sided map of the same area designed for field use.

NZL_MP3	<i>Murky Waters</i>
Type of material	Paper
Scale (if relevant)	Global (no consistent scale)
Dimensions (mm)	594mm x 594mm
Author(s)	Andrew Douglas-Clifford (the MapKiwi)

Published by	The Map Kiwi
Date of publication	November 2020
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	There is more information about the surface of Mars than there is about the Earth's sea floor. Only 20% of the Earth's sea floor has been mapped in detail. This map shows the areas that the Seabed 2030 project has yet to map as of November 2020. Seabed 2030 is an international effort to crowdsource datasets to fully map the world's oceans at a detailed 100m resolution.

NZL_MP4	Glacier Coast- Aoraki/Mount Cook
Type of material	Paper
Scale (if relevant)	1:100,000
Dimensions (mm)	1125mm x 900mm
Author(s)	Roger Smith
Published by	Geographx
Date of publication	October 2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	A map of the area surrounding Aoraki/Mount Cook, New Zealand's highest mountain. Designed both for alpine recreation enthusiasts and itinerant visitors, the map shows

clearly how the rain forests west of the divide contrast with drier tussocklands to the east. The Alpine Fault, one of only three places on earth where a tectonic plate boundary can be traced overland, runs parallel to (and between) the coastline and the main divide.

Published by	Norwegian Geological Survey
Date of publication	March, 2020
Language(s) of the legend	Norwegian and English
Abstract/Description (in English or French; 100 words max)	The geological map covers a classical Precambrian gneiss area in the Telemark region, which is an important part of the interproterozoic, c. 1200-1000-million-year-old

Svekonorwegian mountain range in southern Scandinavia. The purpose of the project was to cover this area with modern, surface-covering geological mapping for use in research on the geological development in the region, and as a background for understanding the formation of the area's many geological resources. The rocks in the area include both transformed sedimentary and igneous rocks. The igneous rocks consist of both deep rocks and lava rocks.

Topographic map Vestland county

Type of material	Paper
Scale (if relevant)	1:400.000
Dimensions (mm)	800 x 960 mm
Author	per.olav.kaasa@kartverket.no
Published by	The Norwegian Mapping Authority, Land division
Date of publication	October 2019
Language(s) of the legend	Norwegian
Abstract/Description (in English or French; 100 words max)	Vestland county is one of 11 map sheets that are part of the paper map series County Map 2020. The county map series was produced in the autumn of 2019, as a result of municipal and regional reform that was implemented in Norway at the turn of the year 2019/2020. The county maps have not previously been published as a nationwide series.

The content of the maps is from N500 Map Data. The maps are intended to function as an overview map/wall map, so the maps are made for printing. The geographical extent is different in the different counties, and they are adapted to different paper formats. The scales are therefore different on the different county maps. The Norwegian Mapping Authority does not have the county maps in stock, but they can be ordered through our Print on Demand (POD) dealers. Overview of the Mapping Authority's POD dealers: <https://www.kartverket.no/sider/bestille-kart>

Bli kjent med Stavanger kommune (front page)
«Get to know Stavanger municipality» map

Type of material	Paper
Scale (if relevant)	1:50.000
Dimensions (mm)	700 mm x 1000 mm
Author	kjetil.wirak@kartverket.no
Published by	Kartverket, Norwegian Hydrographic service
Date of publication	2020
Language(s) of the legend	Norwegian
Abstract/Description (in English or French; 100 words max)	On 1 January 2020, Stavanger municipality became a vast municipality with many islands. It was important to make a map so that the inhabitants could see this clearly for themselves - all the 37 inhabited islands in the municipality. It ended up with a Get to know Stavanger municipality map. The map is aimed at use in the school - and will be distributed to all 5th graders in the municipality. The front side of the map has a scale of 1:50 000. Some chart information are removed - so this is not a navigation chart. There is added information about hiking trails, cultural monuments and places worth visiting.

NOR_CP1B

Bli kjent med Stavanger kommune (back page) «Get to know Stavanger municipality» map

Type of material	Paper
Scale (if relevant)	1:50.000
Dimensions (mm)	700 mm x 1000 mm
Author	Illustrator Egil Bjørøen, Stavanger municipality
Published by	Kartverket, Norwegian Hydrographic service
Date of publication	2020
Language of the legend	Norwegian
Abstract/Description (in English or French; 100 words max)	After the merger on 1 January, Stavanger municipality had 143.574 inhabitants. The highest point in the municipality is Bandåsen with its 514 meters asl. On the back side of the map, Stavanger municipality's skilled illustrator Egil Bjørøen has hand-drawn the municipality - with all islands and countries. He has added many drawings and facts and in addition, you can try your hand at four fun, but difficult puzzles. The answers can be checked at: https://www.stavanger.kommune.no/blikjent/

The map will be distributed to all the municipality's 1806 11-year-olds and will also be available at the municipality's service office.

Abstract/Description (in English or French; 100 words max)	Yr - a weather service provided by the Norwegian Meteorological Institute and NRK. https://www.yr.no/nb/kart/v%C3%A6r/1-72837/Norge/Oslo/Oslo/Oslo . Central to the new weather map	

has been to give users a good impression of the weather in an area by to highlight places that are more exposed to the weather than others. The map is connected to Yr's place name database containing nearly 13 million locations around the world. With the new maps on Yr, we want to enable the public to make even better weather choices because they provide an overview of the weather in the immediate area and not just the point you are at.

Abstract/Description (in English or French; 100 words max)	Geoportal contains an interactive map of settlements from the territory of the Second Polish Republic and administrative borders of the gubernias, districts, voivodeships, and poviats (with the addition of communes in the Voivodeship of Łódź), related to three periods: 1900, 1921, and 1931. The basic visualization of settlement points includes the state and number of links between a given point and SGKP entries. Related headword records can be interactively located on the SGKP page scans. The layers of administrative boundaries are linked to selected socio-economic data displayed from the statistical data panel in the form of thematic overlays.

Abstract/Description (in English or French; 100 words max)	<p>BDOO - database of topographic objects and their descriptive characteristics. The content and level of detail complies with the general geographic map of 1:250000 scale. The basic unit - a voivodeship (data for 16 - gml). The basic and main source of data is the Topographic Objects Database (BDOT10k). The content covers 9 thematic ranges - categories of object classes. The categories of object classes are: water course network, transport network, utility network, land cover, buildings, structures and equipment, land use complexes, protected areas, administrative division units, other objects. BDOO was created in 2021 year in fully automatic generalization process.</p>

EDUCATIONAL PRODUCTS

POL_EP1	<i>Geographic Atlas. High school and technical school</i>
Author(s)	collective work
Type	Atlas
Dimensions (mm)	202 x 290
Published by	Demart
Date of publication	2021
Language(s) of the product	Polish
Abstract/Description (in English or French; 100 words max)	The atlas is intended for a full cycle of teaching in secondary schools both in the basic and extended scope according to the new core curriculum (since 2019). A cartographic guide has been added to introduce students to the world of maps and show them that they contain a lot of information that is much more difficult to assimilate in descriptive form, that many conclusions can be drawn from maps, especially with regard to distribution and variability of phenomena, and finally that using maps is not difficult and gives a lot of satisfaction.

POL_OC1 <i>Geographical atlas of Belarus for the blind and visually impaired</i>	
Author(s)	Nadzeya Avizhych (ed.)
Type	Atlas (tactile)
Dimensions (mm)	305 x 413
Published by	University of Warsaw
Date of publication	2020
Language(s) of the product	Belarussian
Abstract/Description (in English or French; 100 words max)	"Geographical atlas of Belarus for the blind and visually impaired" was developed at the Faculty of Geography and Regional Studies, University of Warsaw, as part of a master's thesis. The publication consists of two volumes. The first one contains natural maps and the second one: socio-economic. This is the first atlas of Belarus for the blind and visually impaired. It is the first opportunity for visually impaired people to get to know their homeland with the help of maps.

POL_OC2 <i>The Bible Atlas</i>	
Author(s)	Adam Linsenbarth (ed.)
Type	Atlas
Dimensions (mm)	228 x 328
Published by	Bernardinum
Date of publication	2020
Language(s) of the product	Polish
Abstract/Description (in English or French; 100 words max)	The Bible Atlas prepared for publication by Bernardinum and the Institute of Geodesy and Cartography is the first Polish Bible Atlas developed by Polish authors. The atlas is dedicated to readers interested in the Holy Scriptures and is designed to enable them to follow the events of the Bible

on appropriately edited maps based on satellite images. The atlas covers areas from Mesopotamia in the east to Italy in the west, and from Turkey in the north to Egypt in the south. Temporal coverage is limited to the 18th century BC to the 1st century AD.

ROMANIA

MAPS ON PANELS

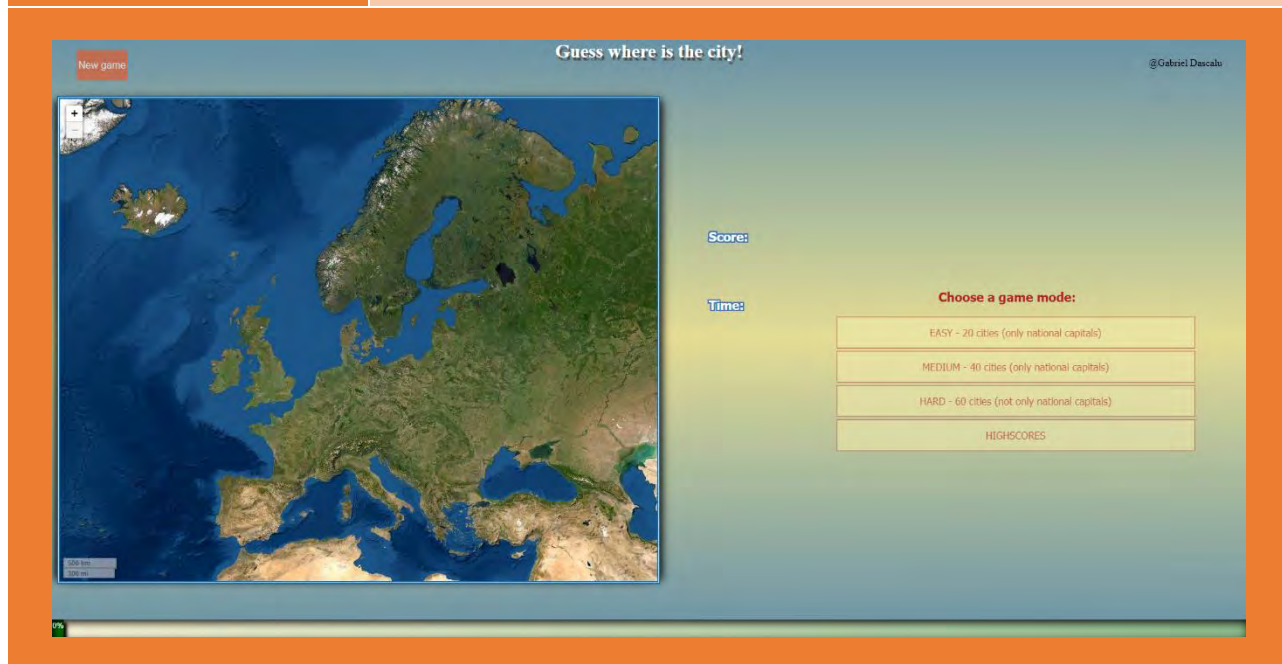

ROU_MP1 The Topographic Plan of Aluniș Estate – former property of the Buzău Diocese

Type of material	Paper Map
Scale (if relevant)	1:7500
Dimensions (mm)	594 x 841 mm (A1)
Author(s)	Cezar Buterez
Published by	Cezar Buterez, unpublished map
Date of publication	Last update in September 2020
Language(s) of the legend	Romanian
Abstract/Description (in English or French; 100 words max)	The present map is a result of a two-year research in historical geography with the purpose of establishing the origin and extent of the main estate of the former Aluniș monastery, in Buzău County, Romania. Numerous fieldwork campaigns were conducted in order to identify the place names and landmarks of the estate, according to 17 th Century historical documents. The map presents the reconstruction of Aluniș estate boundaries in the context of today's geography. Its design as a topographical map draws significant inspiration from Romania's first national topographical maps printed at the end of the 19 th Century.

Type of material	Paper map
Scale (if relevant)	Based on area bounding box
Dimensions (mm)	841x594mm (A1)
Author(s)	Electoral Commission of South Africa
Published by	Electoral Commission of South Africa
Date of publication	27 October 2020
Language(s) of the legend	English

Abstract/Description (in English or French; 100 words max)

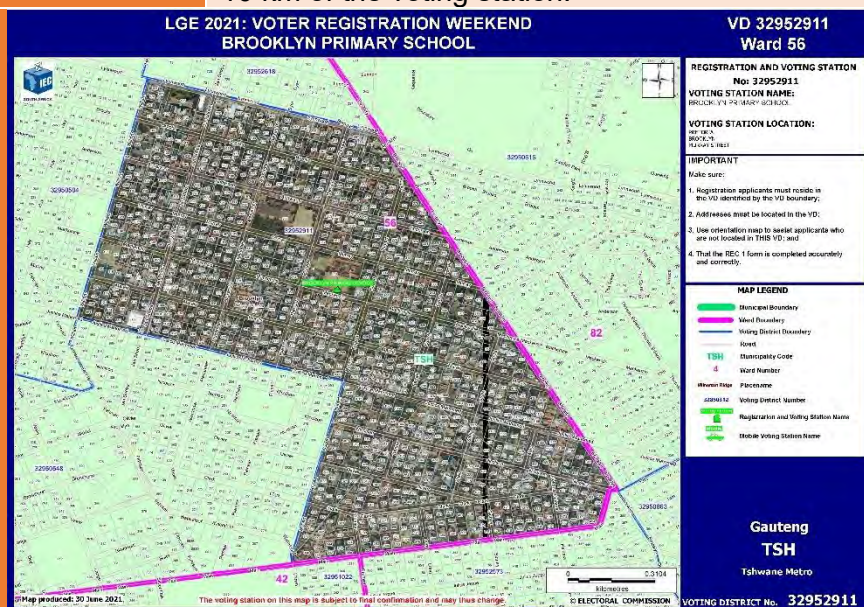

Working map showing potential voting district changes in Ward 3, Inxuba Yethemba (EC131). Many voting districts change shape due to various geographical, population and political changes that take place between elections. When delimiting voting districts, we access various data sources (topographic, cadastral, census information), including the Surveyor-General, the Department of Land Affairs and Statistics SA. Before an election, our municipal representatives inspect maps of voting districts in municipalities in order to align the geography of voting districts with local geographic, settlement, demographic and political changes that may have occurred since the previous election. Voting districts must also be aligned to new boundaries determined by the Municipal Demarcation Board.

Abstract/Description (in English or French; 100 words max)	Map of a voting district in Ward 56, City of Tshwane Metropolitan Municipality, South Africa, prepared for the 2021 Local Government Elections. Each voting district is serviced by one voting station only. Voting districts are principally determined on the basis of geographical size and number of eligible voters. Urban voting districts contain some 3,000 voters located within a radius of some 7,5 km of the voting station. Rural voting districts accommodate some 1,200 voters located within a radius of some 10 km of the voting station.

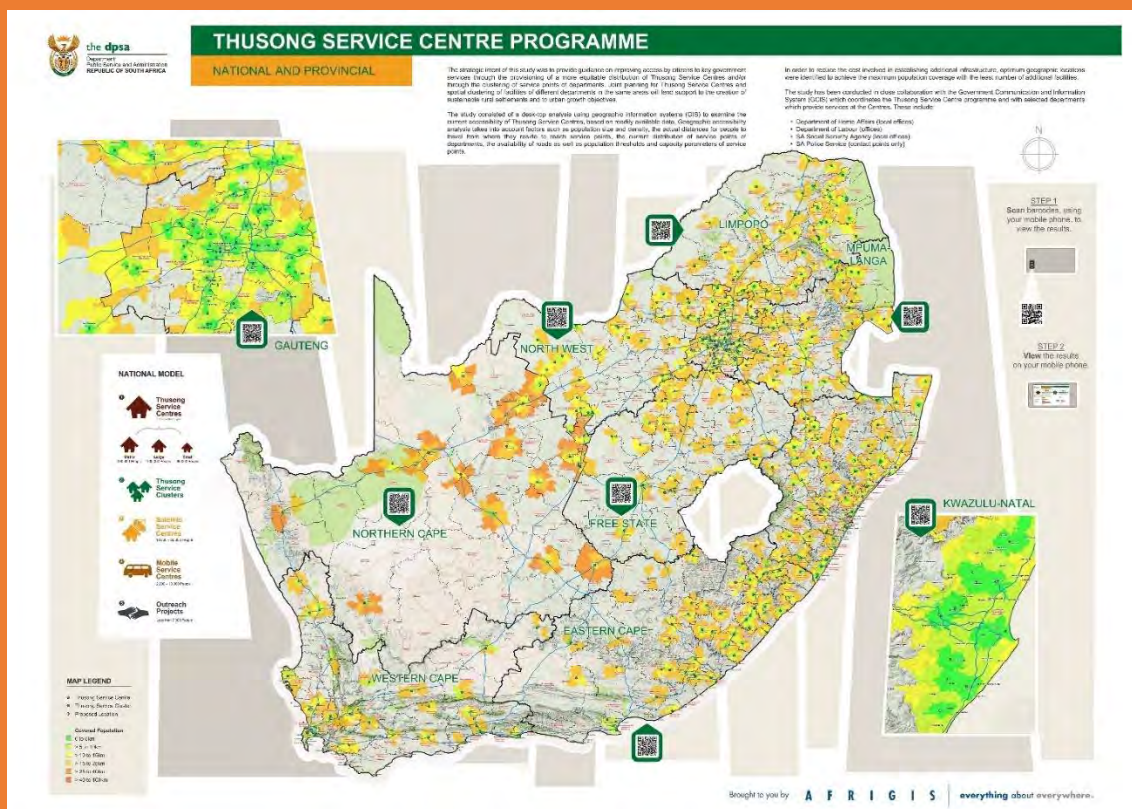

ZAF_MP3 *National Geographic Accessibility Analysis – in relation to Thusong Service Centres, South Africa*

Type of material	Paper map with interactive content via QR codes.
Scale (if relevant)	NA
Dimensions (mm)	2 x 1 143 x 841 mm (A0)
Author(s)	AfriGIS and the Department of Public Service and Administration

Abstract/Description (in English or French; 100 words max)

The strategic intent of this study was to provide guidance on improving access by citizens to key government services through the provisioning of a more equitable distribution of Thusong Service Centres and/or through the clustering of service points of departments. The study consisted of a desk-top analysis using geographic information systems to examine the current accessibility of Thusong Service Centres. In order to reduce the cost involved in establishing additional infrastructure, optimum geographic locations were identified to achieve the maximum population coverage with the least number of additional facilities.

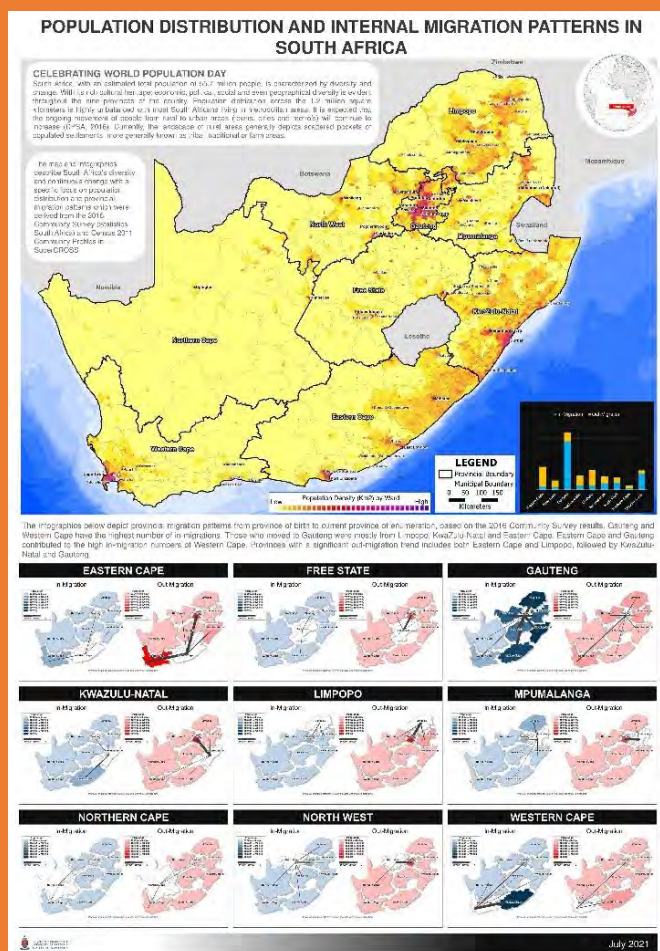

ZAF_MP4 Population distribution and internal migration patterns in South Africa

Type of material	Paper map
Scale (if relevant)	1:3 500 000
Dimensions (mm)	594x841mm (A1)
Author(s)	University of Pretoria, Department of Geography, Geoinformatics and Meteorology
Published by	University of Pretoria, Department of Geography, Geoinformatics and Meteorology
Date of publication	July 2021
Language(s) of the legend	English

Abstract/Description (in English or French; 100 words max)

The map and infographics describe South Africa's diversity and continuous change with a specific focus on population distribution and provincial migration patterns. Most South Africans are living in metropolitan areas and it is expected that the ongoing movement of people from rural to urban areas (towns, cities and metro's) will continue to increase. Currently, the landscape of rural areas generally depicts scattered pockets of populated settlements, more generally known as tribal, traditional or farm areas. The map was created in celebration of the 2021 World Population Day and includes population data from both the 2016 Community Survey (Statistics South Africa) and Census 2011 Community Profiles.

Author(s)	L Lin
Published by	Council for Geoscience

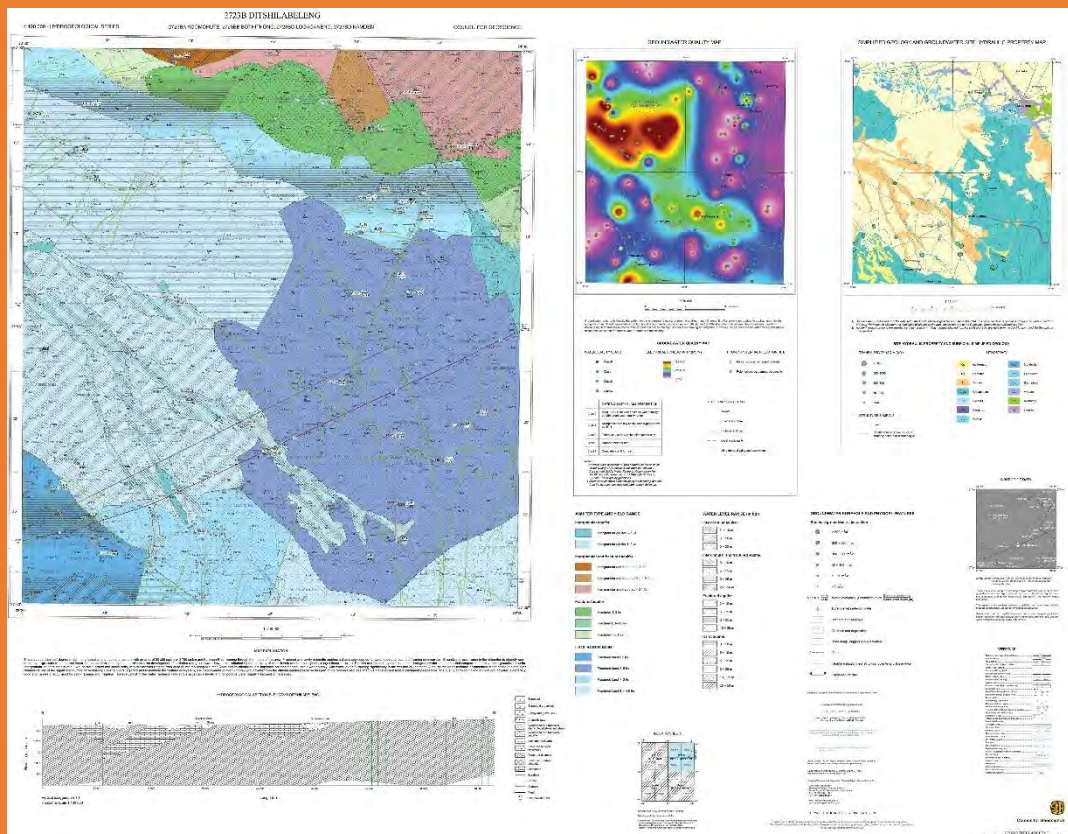

Date of publication	31 December 2019
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	The map bestrides half degree in both longitudinal and latitudinal directions with an area of 50 × 55 Sq.km or 2750 Sq. km. with Kuruman mountain extending in a northwest- southeast direction. It is predominated by fractured and intergranular-fractured aquifers comprising Asbesberge ironstone and jasperite formation, with minor overlying weathered Dwyka tillites and andesitic lava. Groundwater occurrence is represented by low borehole yields and deep water levels which are largely deeper than 25 m with the deepest of around 145 m below surface. These aquifers can only be used for small-scale water supply as stock farming and small domestic uses.

**Abstract/Description (in
 English or French; 100
 words max)**

The map bestrides half degree in both longitudinal and latitudinal directions with an area of 50 × 55 Sq.km or 2750 Sq. km, with Kuruman river running through the middle of the area. Fractured & cavity dolomitic aquifer act as major sources for water supply to local communities and farming. Groundwater occurrence in dolomites is strongly controlled by large-scale fractures and linear structures inferred as dykes that influence the development of sinkholes and groundwater flow paths, reflected by the similarity of water levels and borehole yields along a linear structure. Dolerite and diabase dykes act as important groundwater boundaries that compartmentalise various groundwater units.

Language(s) of the text	English
Abstract/Description (in English or French; 100 words max)	The Electoral Commission of South Africa is proud to present its fifth edition of the Atlas of Results reflecting a detailed and comprehensive compendium of the outcome of the 2019 National and Provincial Elections. The value and power of this flagship publication lies in the simplified presentation of elections data using a spatial component which transforms the huge data into illustrative and easy-to-understand maps. By further including data from the

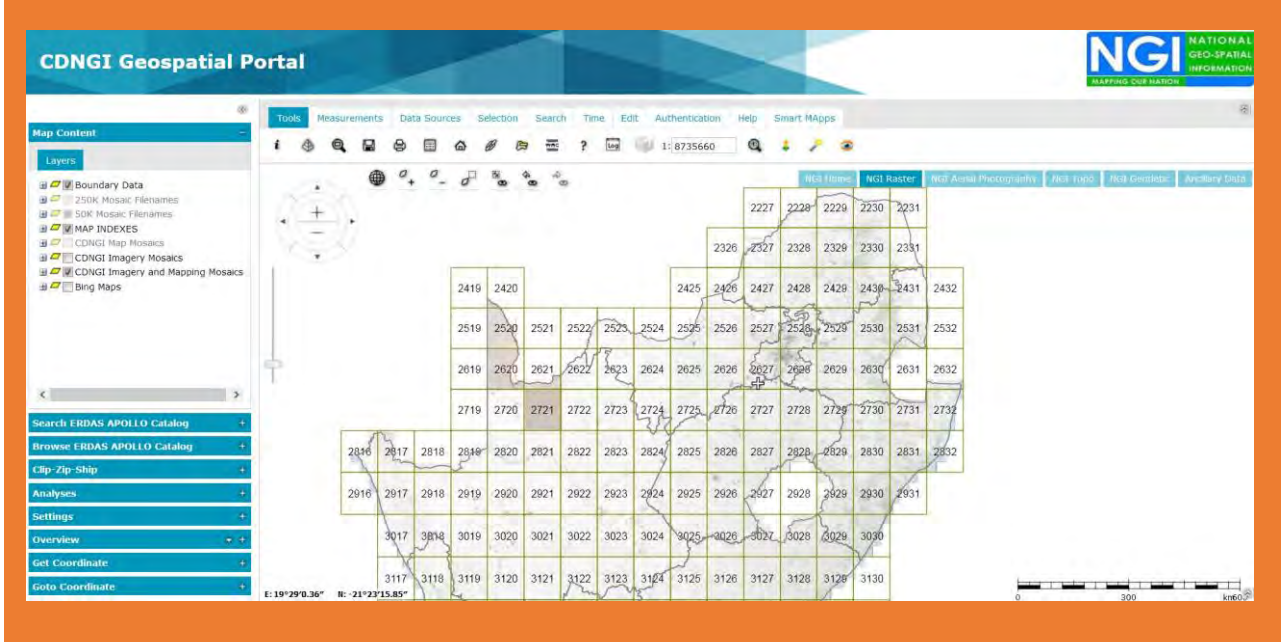

previous national and provincial elections from 1999 to the present, the Atlas provides for convenient trend analysis and comparisons over the past five elections.

Abstract/Description (in English or French; 100 words max)	CD: NGI Geospatial Geoportal facility provides a Geographical User Interface (GUI) for CD: NGI clients to interact with geospatial data and to download data content made available in the geoportal. The geoportal will be updated continuously with the latest data content. Limited historical information will be made available however information related thereto will be available, e.g. the full aerial photography library information for research and requisition thereof. The data in the geoportal is arranged

according to predefined workspace tabs and Catalogue (Catalog) information. The Catalogue (Catalog) contains data for download.

The screenshot displays the CDNGI Geospatial Portal interface. The main map area shows a grid of numbered cells overlaid on a satellite-style map. The grid cells are labeled with numbers such as 2227, 2228, 2229, 2230, 2231, 2326, 2327, 2328, 2329, 2330, 2331, 2419, 2420, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2719, 2720, 2721, 2722, 2723, 2724, 2725, 2726, 2727, 2728, 2729, 2730, 2731, 2732, 2816, 2817, 2818, 2819, 2820, 2821, 2822, 2823, 2824, 2825, 2826, 2827, 2828, 2829, 2830, 2831, 2832, 2916, 2917, 2918, 2919, 2920, 2921, 2922, 2923, 2924, 2925, 2926, 2927, 2928, 2929, 2930, 2931, 3017, 3018, 3019, 3020, 3021, 3022, 3023, 3024, 3025, 3026, 3027, 3028, 3029, 3030, 3117, 3118, 3119, 3120, 3121, 3122, 3123, 3124, 3125, 3126, 3127, 3128, 3129, 3130.

The interface includes a top navigation bar with tabs for Tools, Measurements, Data Sources, Selection, Search, Time, Edit, Authentication, Help, and Smart Maps. A search bar is present with the text "1: 8735660". On the left, there is a "Map Content" sidebar with a "Layers" list containing items like "Boundary Data", "250K Mosaic FileNames", "SDR Mosaic FileNames", "MAP INDEXES", "CDNGI Map Mosaics", "CDNGI Imagery Mosaics", "CDNGI Imagery and Mapping Mosaics", and "Bing Maps". Below the layers list are several buttons: "Search ERDAS APOLLO Catalog", "Browse ERDAS APOLLO Catalog", "Clip-Zip-Ship", "Analyses", "Settings", "Overview", "Get Coordinate", and "Goto Coordinate". The bottom of the map shows coordinate information: "E: 19°29'0.36\" and "N: -21°23'15.85\". A scale bar at the bottom right indicates 0, 300, and 600 meters.

Abstract/Description (in English or French; 100 words max)

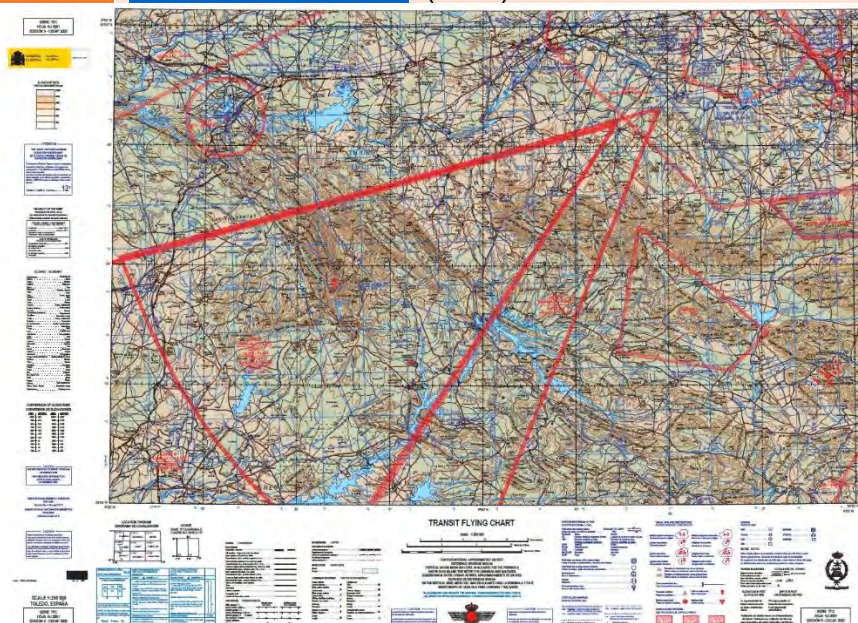

LFC is an aeronautical chart used for mission planning and VFR navigation. The scale, the cartographic projection (Lambert Conformal Conic) and the published geographical features are the required for a visual flight. Aeronautical information comes from both, AIP-Spain and CECAF. Altimetry has been generated by CECAF while planimetry and bathymetry come from different organisms like IGN, CEGET, IHM and CECAF. Elements that can be dangerous for low altitude navigation, obstacles higher than 62 meters high (200 feet), wind farms or power lines are highlighted. In the center of each grid of the map, there is a figure called Maximum Elevation Figure (MEF) indicating elevation in hundreds of feet. Above this altitude, the flight is considered safe from the point of view of obstacle clearance. There are nine sheets of LFC in paper format. The coverage of Sheet 8 is (34°58'N, 05°41'W) – (38°05'N, 00°12'W). Name of the Institution contact: Cartographic and Photographic Centre of the Spanish Air Force (CECAF), Cap. *The COVID-19 pandemic in Spain.
First Wave: from the first cases to the end of June 2020*

Type of material	Paper
Number of pages	160
Dimensions (mm)	260 x 365 mm
Author(s)	National Geographic Institute of Spain / Instituto Geográfico Nacional España (IGN)
Published by	National Centre for Geographic Information of Spain / Centro Nacional de Información Geográfica España (CNIG)
Date of publication	November 2021
Language(s) of the text	Spanish

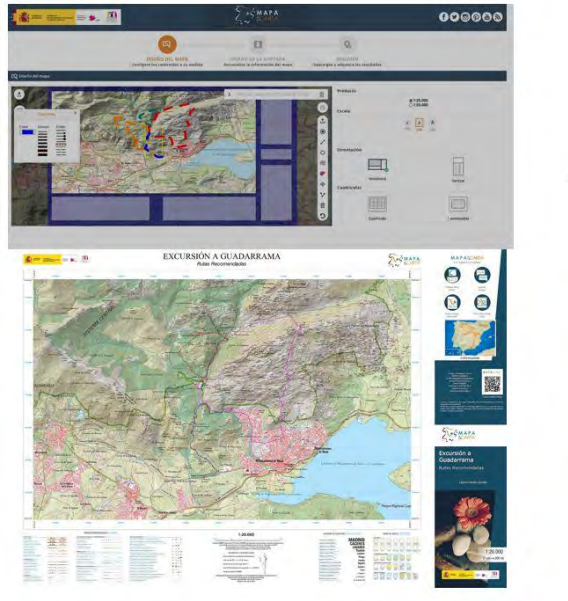

Abstract/Description (in English or French; 100 words max)

This monograph of the National Atlas of Spain presents a brief summary of the most relevant aspects of the coronavirus pandemic in Spain during the first half of 2020. It begins with a general introduction on the impact of the pandemic in the world and in the European Union. It then delves into the health and demographic aspects of the pandemic in Spain from January to July 2020. Finally, it addresses the consequences of the pandemic in Spain, with emphasis on territorial governance, economy, labour market, Treasury, transport, education and environment.

Language(s) of the legend	German
Abstract/Description (in English or French; 100 words max)	The product primarily shows the retreat of the Trift Glacier in the Bernese Alps, which were digitally recorded using aerial photos from swisstopo. In addition, the product is decorated with several information about the Trift Glacier, the current and former Trift Bridge and the SAC huts in the area which are presented on a scientific poster.

CHE_MP2

Swabian Route, Via Jacobi (Schwabenweg)

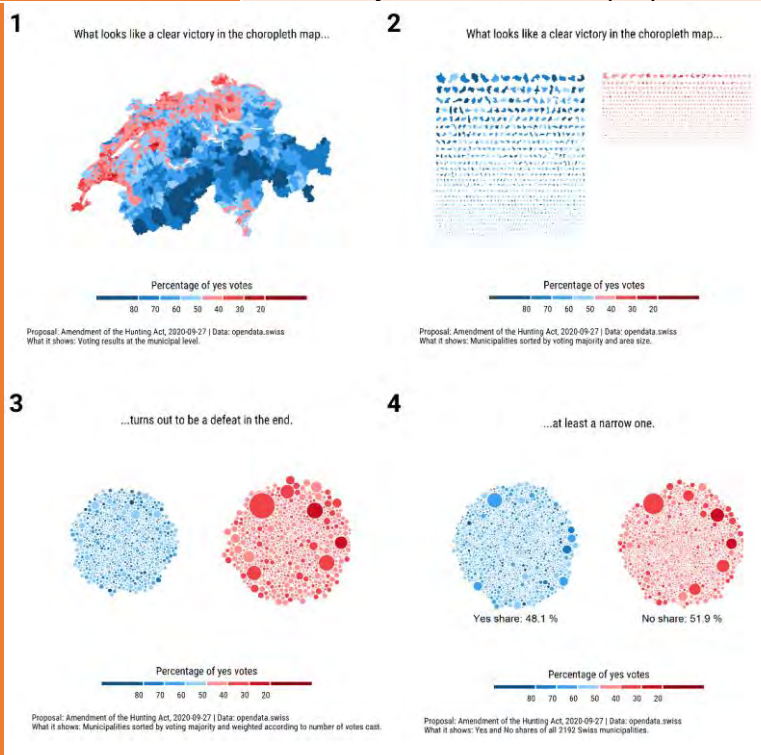

Type of material	Paper
Scale (if relevant)	1.65 000 (Side maps 1:15 000)
Dimensions (mm)	570mm x 880mm (110mm x 190mm when folded)
Author(s)	Florian Aliu, Davine Bachmann, Nando Brunner, Amélie Conz, Jan Griessen (4th Year apprentices of the Swiss federal office of topography swisstopo)
Published by	Swiss federal office of topography swisstopo
Date of publication	24 June 2021
Language(s) of the legend	German
Abstract/Description (in English or French; 100 words max)	This map focuses on the popular swiss part of the pilgrim's way of St. James, guiding Pilgrims and hikers down the path from the lake of Constance, passing by historic Villages to the famous Einsiedeln abbey. The map features a slightly nostalgic look while remaining a modern day product. It was created using Adobe Illustrator and its add-in MAPublisher, as well as Adobe InDesign. The geodata used in the map originates from swisstopo and the information about sights along the way has been collected from diverse internet sources.

CHE_DP1 *Don't trust choropleth maps. Evidence from Switzerland!*

Type	Animated non-interactive web map
File format (10 words)	Animated gif
Operating system	Any
License	MIT
Author(s)	David Zumbach
Published by	David Zumbach
Date of publication or most recent update	31 December 2020
Scale	-
Language(s) of the presentation	English
Abstract/Description (in English or French; 100 words max)	Using the example of a referendum in Switzerland, the map shows how easily choropleth maps can create a distorted picture of the actual balance of power in a political context and how quickly they can be misunderstood by the audience. The animation compares the spatial extent of a municipality with its population size, resolves the colour gradation of the map and finally leads to a bubble chart that accurately reflects the true proportions of the vote.

CHE_DP2 *swisstopo-App*

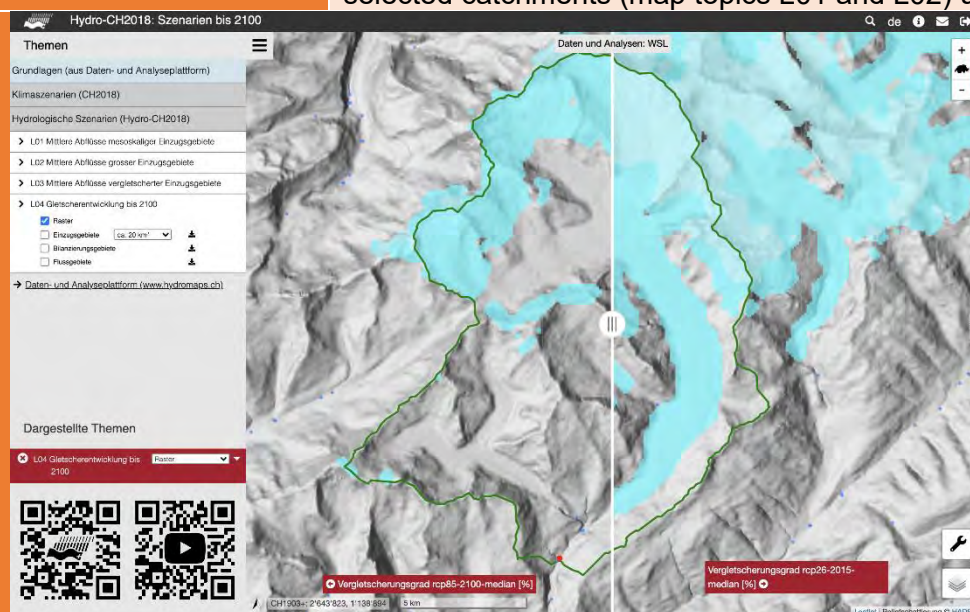

Type	Mobile Application
File format (10 words)	gpx, kml for export and import of tracks
Operating system	Android and iOS

Date of publication or most recent update	16 March 2021

Scale	No fixed scale
Language(s) of the presentation	English
Abstract/Description (in English or French; 100 words max)	The web platform www.hydromapsCC.ch presents research results of the Hydro-CH2018 and CH2018 projects in a form that is suitable for dealing with applied hydrological questions. The platform was developed by the producers of the Hydrological Atlas of Switzerland (HADES) and is structured analogously to the atlas's "Data and Analysis Platform". It presents hydro-climatic and hydrological scenarios for the 21st century. The platform currently includes precipitation and temperature scenarios, estimates of glacier development, and the resulting runoff scenarios for selected catchments (map topics L01 and L02) up to 2100.

Abstract/Description (in English or French; 100 words max)	Vector maps of Switzerland crafted in partnership between swisstopo and MapTiler upgrades the traditional high-

quality Swiss cartography to a new technology. Vector tiles bring sharpness on mobile devices, smooth interaction, rotated labels, personalization in content, language or colors. Powered by the official government data and high-quality open-data outside of the country, the maps can be easily integrated with web, mobile, and desktop applications. Maps are available from MapTiler.com reliable global infrastructure. Publicly available at swisstopo and on [MapTiler Cloud](https://MapTiler.com) Read the related [blog post](#)

CHE_DP5 *Castle Dossier Map - Switzerland and neighbouring countries.*

Type	Web Map
File format (10 words)	
Operating system	Any Operating system, tested on main browsers.
License	Poster and Video CC BY 3.0
Author(s)	Stefan Keller
Published by	Geometa Lab at Institute for Software, Eastern Switzerland University of Applied Sciences
Date of publication or most recent update	28 November 2020
Scale	N/A
Language(s) of the presentation	English
Abstract/Description (in English or French; 100 words max)	Scalable web map castles and palaces Switzerland and neighboring countries Liechtenstein, Germany (Baden-Württemberg, Bavaria), Austria, Italy with details containing picture, text description, etc. One of the most complete works including about 2200 objects thanks to a fusion of well-known crowdsourced open data projects Wikipedia, Wikidata, Commons (images) and OpenStreetMap. User interface and the content are in five languages: DE, FR, IT, RM, EN. The application shows innovative approaches to overcome network communication and generalization issues, by 1. splitting objects to pictograms and point raster symbols, 2. by encoding data into images (network-load

optimized algorithm) and by automated ranking (Wikidata QRank).

Castle Dossier Map
Switzerland and neighboring countries

- Scalable interactive map with details containing picture, text description, etc.
- In English, German, French, Italian, Rumantsch
- Fusion of well-known crowdsourced open data projects Wikipedia, Wikidata, Commons and OpenStreetMap
- Upper layer (violet pictograms) applies generalization utilizing Wikidata QRank project
- Middle layer (violet point raster symbols) contains a published network-load optimized algorithm

GBR_MP1		<i>York City Wayshowing: Pedestrian Wayfinding Map</i>
Type of material	vinyl	
Scale (if relevant)	1:1700	
Dimensions (mm)	1100 * 1215	
Author(s)	Momentum Wayshowing	
Published by	York BID & York City Council	
Date of publication	October 2020	
Language(s) of the legend	English	
Abstract/Description (in English or French; 100 words max)	<p>York City Wayshowing Scheme comprises a bespoke family of signs designed for the beautiful heritage city of York. Our pedestrian wayfinding map, with a colour palette based on local colours and finishes, is the core component of the scheme. The heads-up map and legend help engage, welcome, locate, orientate, and inform visitors so that destinations, attractions, and amenities can be found and routes to them planned. It enables a rich, complex, historic city to become more legible, accessible, and enjoyable. The map helps build understanding, encourages explorations and movement, and improves the experience for visitors to York.</p>	

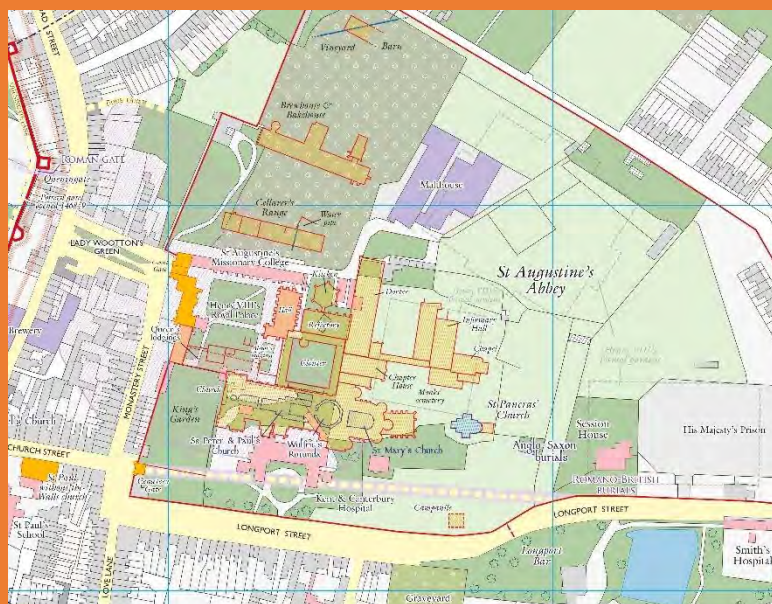

GBR_MP2

An Historical Map of Canterbury

Type of material	paper
Scale (if relevant)	1:2500
Dimensions (mm)	1000 * 890
Author(s)	Jake Weekes (historical information), Giles Darkes (cartography and project management). Original base-map digitising by Alfie Day.
Published by	The Historic Towns Trust, Oxford UK (project run in association with Canterbury Archaeological Trust and Canterbury Christ Church University)
Date of publication	March 2021
Language(s) of the legend	English

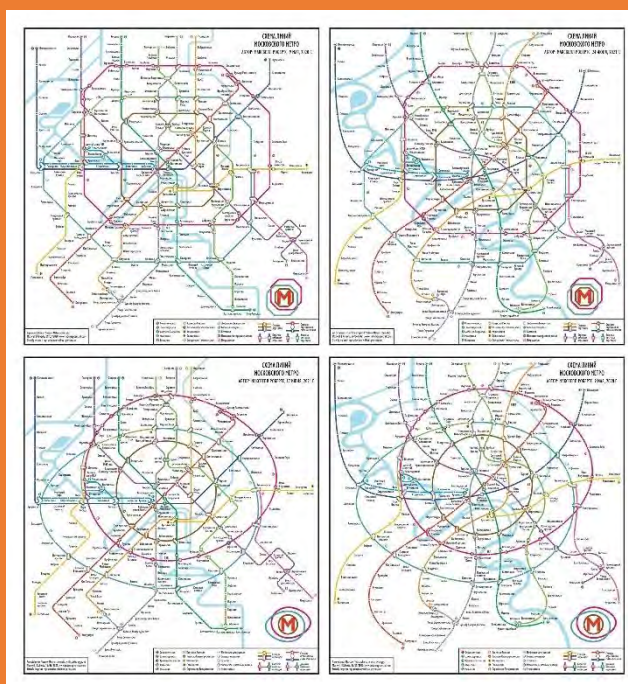

Abstract/Description (in English or French; 100 words max)

A full-colour map summarising the history of Canterbury from prehistoric times to the early 20th century. Against a background of a digitised OS plan of 1907, the map shows the main sites of historical interest, both extant and lost. The sheet reverse includes three phase-maps of Roman Canterbury with a short essay, and a comprehensive gazetteer of the city's historical buildings. The cartographic challenge was to show historically complex information — many sites remained of interest across the centuries — in a clear and accessible way. The map is aimed at a wide general audience.

GBR_MP3	<i>Exploring octolinear, curvilinear and hybrid schematics for depicting the new orbital lines of the Moscow Metro network.</i>
Type of material	paper
Scale (if relevant)	Variable
Dimensions (mm)	610 * 654
Author(s)	Maxwell J. Roberts

Published by	Maxwell J. Roberts
Date of publication	June 2021
Language(s) of the legend	Russian
Abstract/Description (in English or French; 100 words max)	For two decades, official Moscow Metro diagrams have comprised octolinear lines (horizontal, vertical, and 45° diagonals) except for the orbital Line 5, depicted as a circle. With the construction of two further orbital lines (11 and 14) the challenge is to harmonise these with Line 5, especially as avoidance of excessive topographical distortion prevents their depiction as perfect circles. These schematics comprise an exploration of octolinear/curvilinear construction applied to orbital versus radial lines. Design priorities were to simplify line trajectories and preserve relative spatial locations of stations. The results suggest continuing utility in curvilinear depictions of the orbital lines.

Published by	Collins (Harper Collins UK)

Date of publication	October 2019
Language(s) of the text	English
Abstract/Description (in English or French; 100 words max)	<p>This beautifully designed book presents unusual borders, enclaves and exclaves, divided or non-existent cities and islands. Shortlisted for the 2020 Edward Stanford Travel Writing Award's.</p> <p>Examples include:</p> <ul style="list-style-type: none"> • Campione d'Italia where Italian residents have to travel 15km through Switzerland to reach the nearest available Italian territory • Tomb of Suleyman Shah which is a tiny Turkish enclave within Syria which was moved closer to Turkey when Lake Assad was created but still stayed in Syria • Pheasant Island which for half a year belongs to the Spanish city of Irun, and the remaining half, to its French twin-town, Hendaye <p>These and many more instances are captured in this fascinating book full of strange geographical intrigue.</p>

GBR_AT3		<i>Atlas of the Invisible</i>
Type of material	Hard bound	
Number of pages	216	
Dimensions (mm)	195 * 255	
Author(s)	James Cheshire and Oliver Uberti	
Published by	Particular Books (UK)	
Date of publication	September 2021	
Language(s) of the text	English	

Abstract/Description
(in English or French;
100 words max)

In Atlas of the Invisible, award-winning geographer-designer team James Cheshire and Oliver Uberti redefine what an atlas can be. Transforming enormous data sets into rich maps and cutting-edge visualisations, they uncover truths about our past, reflect who we are today, and highlight what we face in the years ahead. With their joyfully inquisitive approach, Cheshire and Uberti explore happiness and anxiety levels around the globe; they trace the undersea cables and cell towers that connect us; they examine hidden scars of geopolitics; and illustrate how a warming planet affects everything from hurricanes to the hajj. Years in the making, Atlas of the Invisible invites readers to marvel at the promise and peril of data, and to revel in the secrets and contours of a newly visible world.

PolarFanzine#1

Author(s)	Danai-Maria Kontou
Type	Folded leaflet
Dimensions (mm)	293 * 420
Published by	Cartographymaster.eu
Date of publication	July 2019
Language(s) of the product	English

**Abstract/Description
(in English or French;
100 words max)**

The aim of the brochure and the main map is to inform and make aware the readers regarding the similarities and the differences of the polar regions in some main topics but also regarding the human impact on these two regions. The topics of interest on this project are the climate, the fauna, and the human impact. Arctic and Antarctica were almost the last unknown places explored in the world, early in the 20th century. Since then, human impact and aggressive activities always kept increasing.

Polar Origami

Author(s)	Danai-Maria Kontou
Type	paper
Dimensions (mm)	210 * 297
Published by	Danai-Maria Kontou
Date of publication	November 2020
Language(s) of the product	English

Abstract/Description (in English or French; 100 words max)
 The Polar Origami is craft cartographic project, and its purpose is to interactively and creatively inform the user about polar facts. For this craft to make sense, the user should cut and assembly the origami, which is based in the “ninja star origami”, by following the illustrated instructions on top of the sheet of paper. Once the origami is assembled, it can open and close by sliding the 8 sides. Each side represents one polar region, by closing and opening each side the user can either see the map or read facts about the Arctic or Antarctica.

Mount Everest 3D Map

Type of material	Paper
Scale (if relevant)	Not applicable
Dimensions (mm)	635 x 476
Author(s)	Tom Patterson
Published by	shadedrelief.com
Date of publication	8 December 2020
Language(s) of the legend	English

Abstract/Description (in English or French; 100 words max)

A high-oblique view of Mount Everest and vicinity from the west-northwest. The terrain derives from High Mountain Asia elevation data at 8-meter resolution that I supplemented with glacier textures extracted from a 2016 Landsat image. Unfortunately, the elevation data contained voids and artifacts. Problem areas included the north side of Pumori, the ridge between Lhotse and Nuptse, and the distant ridge to the right of the title. I had to touch up these places and others by cloning and painting in Photoshop. Labels and elevations derive from a variety of online and printed sources. <http://www.shadedrelief.com/Everest-3D-Map/>

Author(s)	Tom Patterson
Published by	shadedrelief.com
Date of publication	29 July 2020
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	<p>This map showcases bottom features of the North Atlantic Ocean, including abyssal plains, banks, canyons, seamounts, trenches, and the scar-like Mid-Atlantic Ridge. Above the waves, the map offers select coastal cities for reference. Blue Earth Bathymetry is the source of all topography shown on the map. It is an edited version of the GEBCO (General Bathymetric Chart of the Oceans) dataset. The 3D topography, rendered as plan oblique relief, depicts undersea features in partial profile with 1,100 percent vertical exaggeration. Mapped terrestrial areas derive from Natural Earth vector and raster data. The GEBCO Gazetteer of Undersea Feature Names was the source for ocean bottom labels. http://www.shadedrelief.com/atlantic/</p>

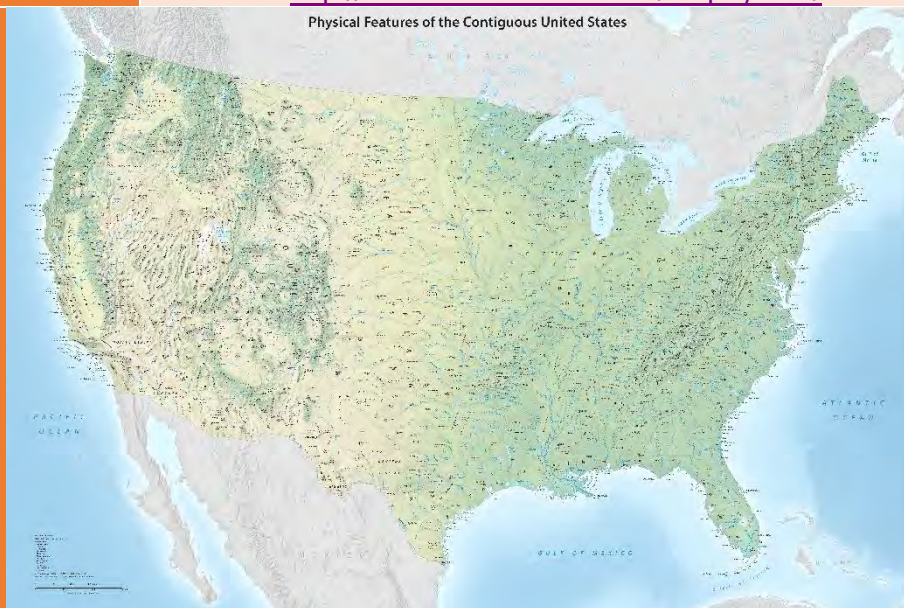

USA_MP3	<i>Physical Features of North America</i>
Type of material	Paper
Scale (if relevant)	1:7,500,000
Dimensions (mm)	1158 x 1194
Author(s)	Tom Patterson

Published by	shadedrelief.com
Date of publication	9 March 2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	<p>North America is an ideal continent for physical mapping. The irregular coast, varied terrain, and diverse environments form a cartographic mosaic of colors and textures. Besides being beautiful, these features also tell geographic stories. The cordillera running along the entire Pacific coast gives evidence of the theory of plate tectonics. And looking south from Canada's arctic islands to Panama's rain forests, we see the influence of latitude and elevation on natural vegetation. I made this map during the winter of 2020-21 to keep busy during the pandemic. It is comprised of freely available geospatial data.</p> <p>http://www.shadedrelief.com/north-america/</p>

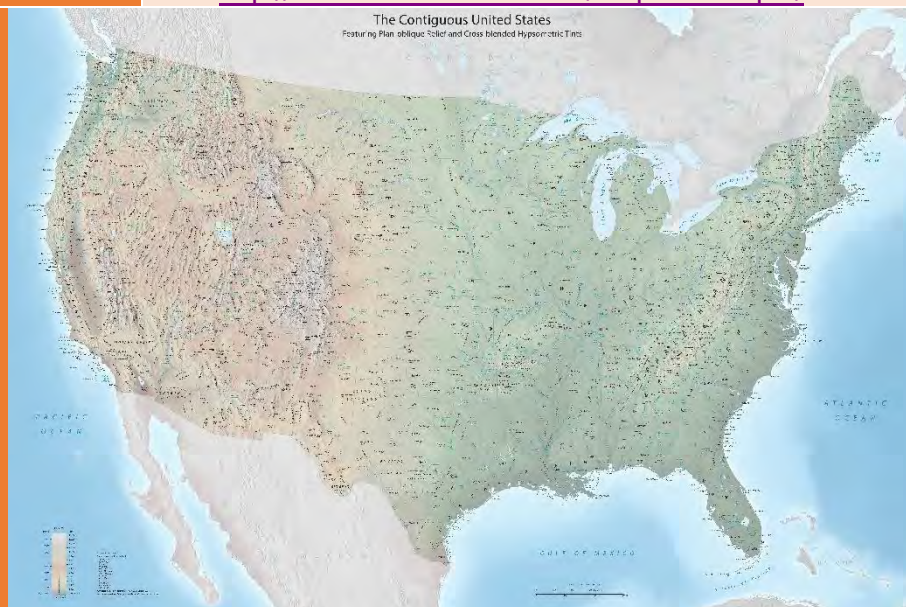

USA_MP4	<i>Physical Features of the Contiguous US</i>
Type of material	Paper
Scale (if relevant)	1:4,380,000
Dimensions (mm)	1143 x 762
Author(s)	Tom Patterson
Published by	shadedrelief.com
Date of publication	11 May 2020

Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	Explore the United States coast to coast with this map showcasing physical landscape features—mountains, plains, rivers, lakes, etc. Map colors reflect natural environments across the continent from the forested east to the snowcapped Rockies to the desert southwest. It includes a smattering of cities and faint state lines for reference. With abundant physical features everywhere, a challenge was selecting what to show on the map. I scoured atlases, US Geological Survey topographic maps, and online sources to identify intriguing features. A draft posted on Twitter had 35,000 views in 24 hours, which provided me with valuable feedback. http://www.shadedrelief.com/us-physical/

USA_MP5 <i>The Contiguous United States Featuring Plan-oblique Relief and Cross-blended Hypsometric Tints</i>	
Type of material	Paper
Scale (if relevant)	1:4,420,000
Dimensions (mm)	1143 x 762
Author(s)	Tom Patterson
Published by	shadedrelief.com
Date of publication	27 May 2020
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	This map of the 48 contiguous US states features plan oblique relief, a terrain rendering technique that yields three-dimensional mountains. Higher elevations have vertical offset. The map also employs cross-blended hypsometric tints to represent elevation zones. They are the usual colors found on elevation maps but with a major difference: arid lowlands are brown instead of green. We don't want to have Death Valley looking like a jungle, do we? Originally released in 2007, this 2020 update

has lighter and brighter colors, many more place name labels, and a new title. <http://www.shadedrelief.com/us-plan-oblique/>

Prince William Sound, Alaska

Type of material	Paper
Scale (if relevant)	1:250,000
Dimensions (mm)	1118 x 914
Author(s)	Tom Patterson
Published by	shadedrelief.com
Date of publication	6 December 2019
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	As a cartographer and admirer of Alaskan landscapes, I have always been fascinated by the intermingled islands, fjords, glaciers, and mountains of Prince William Sound. Making a map of it turned out being more laborious than I had ever imagined. The culprit: climate change. Although much of the data that went into making the map was of recent vintage, glaciers in the region have melted noticeably these last few years. Columbia Glacier, for example, lost another one kilometer of its length during the summer of 2019. Given the need for constant updates, consider this map as a snapshot in time. http://shadedrelief.com/pws/

Abstract/Description (in English or French; 100 words max)	<p>You are looking at North America's icy heartland with a telephoto lens from an altitude of 206 kilometers—one half as high as the International Space Station. I rendered this panorama to showcase a wild landscape where human development is minimal. It is a rare day with no clouds. The sprawling Malaspina Glacier with its concentric rings of ice, rubble, and meltwater is front and center. I started this project in 2017 and then put it aside for four years. However, accelerating climate change brought newfound urgency to my mapping. I wanted to map this beautiful glacier while it still exists. http://www.shadedrelief.com/malaspina/</p>

The Essential Geography of the United States of America, Edition 2, Version 3.1

Type of material	Paper
Scale (if relevant)	1:4,000,000
Dimensions (mm)	1278 x 912
Author(s)	Dave Imus
Published by	Imus Geographics
Date of publication	2021
Language(s) of the legend	English, Spanish, and French
Abstract/Description (in English or French; 100 words max)	Rather than treating geography as a field of academic investigation, this work treats geography as a genre of aesthetic appreciation. It explores the art of making the basic tapestry of land, water and humanity understandable and visually appealing to a broad audience. Employing manual-digital practices that observe Imhofian principles of clarity, each line has been rendered and each type label has been placed by eye. Inspired by botanical painting, the terrain image uses photo editing techniques to blend four original shade images: standard, generalized, slope and elevation. The result is a clear presentation of an aesthetic subject: basic geography.

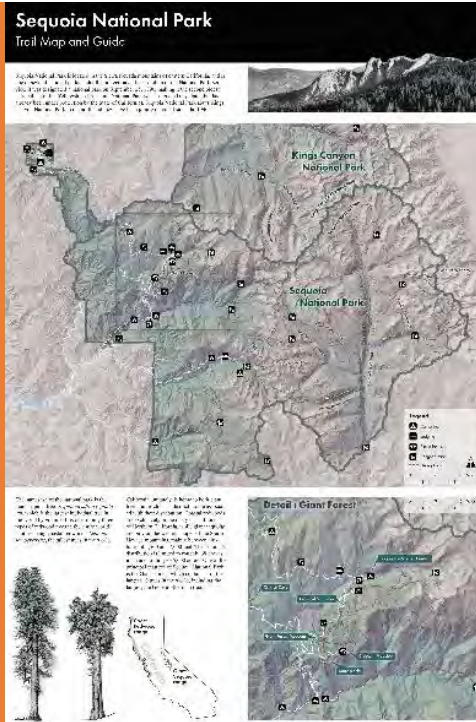

USA_MP9 *2020 Population Distribution in the United States and Puerto Rico*

Date of publication	2021	
Language(s) of the legend	English	
Abstract/Description (in English or French; 100 words max)	<p>In response to a graduate seminar assignment prompt to design a tourism map for any location within California, this brochure was created for visitors arriving at Sequoia National Park. The design format uses the style of the well-known National Park Service templates devised by Massimo Vignelli. Given the variety of park users and differing interests, the design content includes a full park map with hiking trails, a detail of the major sights, and multi-media details to introduce the unique megafauna that lends the park its name. The shaded relief maps were inspired by the work of Swiss cartographer Eduard Imhof.</p>	

USA_MP11 *Large-scale Restoration of Public Lands on the Colorado Plateau*

Type of material	Paper
Scale (if relevant)	1:543,000
Dimensions (mm)	914.4 x 1219.2
Author(s)	Stephanie Smith
Published by	Grand Canyon Trust
Date of publication	9 June 2021
Language(s) of the legend	English

Abstract/Description (in English or French; 100 words max)

This map captures the muted tones of the Colorado Plateau desert that fills every canyon and horizon. With a desaturated palette with minimum outlines and shading a simplistic approach allows the areas to shine. Hypsometric tinting combined with aerial imagery over a multi-directional hillshade create a realistic yet artistic shaded relief. The background features outside the focus area are desaturated with low opacity that fades to white. The focus area is highlighted with a subtle drop shadow and high opacity. The streamlined legend focuses on the full landscape but directs the reader's eye to each individual conservation area.

Date of publication	September 2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	This map captures my experience, simultaneously spatial and immersive, of this evocative, multi-dimensional place—rocky peaks, dry scrublands and forests, and unexpected pockets of relict rainforest all squeezed into a corner of the island between ocean and farmland. By compressing these already-dramatic contrasts into a single view, the "worldview" (as I call it and similar works) heightens the empowering feeling of having an entire “world at my fingertips.” My yearning for that sensation includes a protective impulse, signaling my distress at the ecological vulnerability of this special world-apart from civilization that is at the same time increasingly up against it.

USA_MP19		<i>Landforms of Michigan</i>
Type of material	Paper	
Scale (if relevant)	Approximately 1:820,000	
Dimensions (mm)	838.2 x 939.8	
Author(s)	Daniel P. Huffman	
Published by	Daniel P. Huffman	
Date of publication	2021	
Language(s) of the legend	English	
Abstract/Description (in English or French; 100 words max)	This map is a love song for my Great Lakes homeland; a chance to better learn its grammar. It's the map I wish I'd had when I was growing up in west Michigan, showing in great detail the landscape that surrounded me. While I spent a great deal of time carefully preparing the terrain representation, much of the work went into the toponym research. Many of these valleys and plains and moraines do not have official federal names, so I had to pore through old maps to find consensus on common names. I also judiciously coined some of my own.

National Park Road Trip Atlas

Type of material	Paper
Number of pages	20
Dimensions (mm)	215.9 x 279.4
Author(s)	David B. Sherman
Published by	David B. Sherman
Date of publication	3 June 2021
Language(s) of the text	English

Abstract/Description (in English or French; 100 words max)

Earlier this year, we took a 24-day family road trip, visiting a dozen U.S. National Parks and driving over 8,000 kilometers. To give the kids a sense of direction and progress on the long driving days, I created an atlas of maps covering every day that we'd spend more than an hour in the car. Designed to be accessible to my 5-year-old but with enough information to occupy my 10-year-old, the maps are meant to be colored, annotated, marked up, and otherwise defaced along the journey!

USA_AT3 *Southern Journey: The Migrations of the American South, 1790–2020*

The *After the Fire* map is an interactive, comprehensive resource for Oregon residents recovering from wildfire. Created in response to the devastating 2020 fire season in Oregon, USA, this statewide service is now continually maintained and updated by the Oregon State University Extension Service Fire Program. The digital mapping tool, guide, and resource list are intended to help affected landowners understand, assess, and respond to post-fire hazards. Following a wildfire, a map is required to attain federal emergency funding, and the *After the Fire* map helps landowners prioritize steps to take and helps them begin to implement the process of recovery. Abstract/Description (in English or French; 100 words max)
We are not surprised when maps show the southeastern corner of the United States standing apart in politics, religion, health, economics, and opinion. The South, after all, has differed in fundamental ways from the rest of the country since the nation's founding. That difference has been fed by constant movement, by restless journeys to, across, and from the South from the eighteenth century to the twenty-first. The migrations of the South weave throughout American history, indigenous, enslaved, citizen, and immigrant people moving among one another, their paths

tracing patterns both bold and intricate. Video:

USA_DP6 2020 Census Demographic Data Map Viewer	
Type	Web map: https://www.census.gov/library/visualizations/2021/geo/demographicmapviewer.html
File format (10 words)	Web-browser based application
Operating system	Device agnostic; web-browser based application
License	Not applicable
Author(s)	U.S. Census Bureau
Published by	U.S. Census Bureau
Date of publication or most recent update	12 August 2021
Scale	Multi-scale
Language(s) of the presentation	English
Abstract/Description (in English or French; 100 words max)	The 2020 Census Demographic Data Map Viewer is a web map application that includes state-, county-, and census tract-level data from the 2020 Census. The application includes data related to population, race, Hispanic origin, housing, and group quarters. The map automatically switches from state data to county data and tract data as you zoom in to more detailed scales. Abstract/Description (in English or French; 100 words max)	On January 22, 2020, one day after the US reported its first COVID-19 case, Johns Hopkins University Center for Systems Science and Engineering (CSSE) launched the first global real-time coronavirus surveillance dashboard. It provides a geospatial visualization of COVID-

19 cases for more than 3,500 locations. All underlying data are publicly available in a GitHub repository. The entire system has gained more than 205 billion requests in its first year, with the highest daily requests surpassing 4.5 billion. This dashboard is considered the leading resource for the public, policymakers, and research community, providing the most up-to-date information on the COVID-19 pandemic.

USA_EP1 <i>Statistics in Schools: Understanding the U.S. Population</i>	
Author(s)	U.S. Census Bureau
Type	Poster
Dimensions (mm)	1219.2 x 914.4
Published by	U.S. Census Bureau
Date of publication	9 December 2019
Language(s) of the product	English
Abstract/Description (in English or French; 100 words max)	The Statistics in Schools program of the U.S. Census Bureau provides data, tools, and activities that educators can incorporate into their lessons to help teach statistics concepts and data analysis to students. This wall map was designed for display in high school classrooms across the U.S. in the leadup to the 2020 Census. It depicts population density by county for the United States and Puerto Rico. It also includes a proportional circle map depicting population growth from 1920 to 2017, a line graph

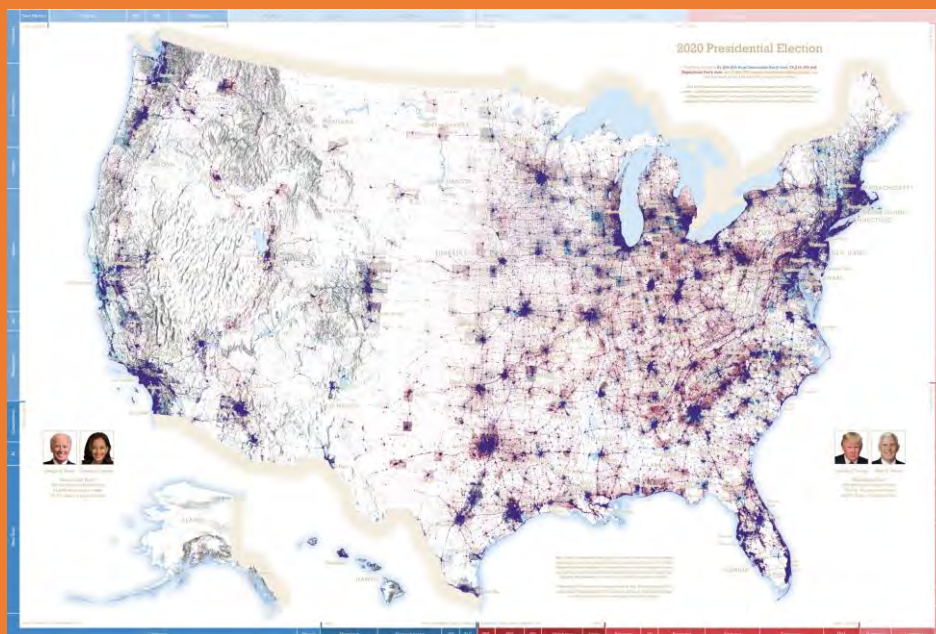

showing the historical change in census population from 1790 to 2010, and other supporting graphics.

MAPS ON PANELS

USE_MP1	2020 Presidential Election
Type of material	Paper (laminated)
Scale (if relevant)	1:6,000,000 (main map)
Dimensions (mm)	914 x 609
Author(s)	Kenneth Field
Published by	Esri
Date of publication	25 June 2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	This map contains 81,268,924 blue Democratic Party dots, 74,216,154 red Republican Party dots, and 2,898,325 orange dots representing others; one dot for each of the 158,383,403 people who voted in the 2020 US Presidential election. Dot positions are randomised in populated space and blend to give a sense of the predominant voting pattern through the mixing of blue, red, and purple hues. The border illustrates states proportional to the electoral college votes they contribute, and in order of margin of victory (%) from highest partisan support at bottom centre to the marginal states at top.

USE_MP2	Where is the Nearest National Park?
Type of material	Print

Scale (if relevant)	Not relevant
Dimensions (mm)	685.88 x 685.88
Author(s)	Emily Meriam
Published by	Esri
Date of publication	13 April 2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	This map was designed in the style of USA National Park posters from the 1930s-40s. A Voroni diagram (Thiessen polygon) was created to show proximity and distance “As the crow flies” in ArcGIS Pro with the latest National Park Service boundaries. To make the land background, aerial imagery was exported to Adobe Illustrator where a” Cut-out” effect was applied to complete the look and feel. The image was then georeferenced back in ArcGIS Pro where the layout was finished. All font and map elements were designed with a vintage style giving viewers that familiar connection to the past.

USE_MP3	Where are the Wettest Regions on Earth?
Type of material	Print
Scale (if relevant)	Not relevant
Dimensions (mm)	685.8 x 863.6

Author(s)	Emily Meriam
Published by	Esri
Date of publication	18 May 2021
Language(s) of the legend	English
Abstract/Description (in English or French; 100 words max)	The WorldClim 2.1 image service provides downscaled estimates of global climate variables as monthly means over the period of 1970-2000. While designing the default palette for the layer, the cartographer became curious about the global monthly precipitation events. So, in ArcGISPro a Zonal Statistics Analysis was performed using a delineation boundary of the most commonly used hydrologic unit, the Global Water Provinces. The map first shows annual mean precipitation followed by 12 monthly mean maps, all highlighting the top five wettest water provinces.

Scale	Not applicable
Language(s) of the presentation	English
Abstract/Description (in English or French; 100 words max)	The practice of Redlining by the Home Owners Loan Corporation (HOLC) was used to delineate and grade the relative desirability of U.S. neighborhoods in the 1930s. Even 80 years later, the social and environmental disparities between high-graded (A, B) and low-graded (C, D) neighborhoods, whose original assessments were largely driven by class- and race-based prejudice, remain stark. As a result of Redlining, there have been long-lasting impacts on the home values, city services, education, crime, and life expectancy of residents. This StoryMap examines the legacy of Redlining through a lens of four U.S. cities, investigating the correlation between HOLC grades and environmental factors, such as: urban heat islands, tree coverage, impervious surfaces, and topography. Combined with historical urbanization patterns, these policies have had a dramatic effect on the opportunities, health, and well-being of residents, and continue to demand greater scrutiny and discussion. Published by	Esri
Date of publication or most recent update	28 April 2021
Scale	Global

Language(s) of the presentation

English

Abstract/Description (in English or French; 100 words max)

This Monthly Satellite Precipitation Estimates (IMERG) dataset is a time-enabled (June 2000-Present) image service of precipitation accumulation rasters sourced from IMERG which integrates information from NASA's Tropical Rainfall Measuring Mission (TRMM) and Global Precipitation Measurement (GPM) satellites. The layer's default symbology was styled by a cartographer in ArcGIS Pro using Raster Functions - Remap and Colormap. Nuance and subtly was carefully built in by combining cream-green-blue. As the user animates through time, the movement of water around the globe is a powerfully shown, while simultaneously the beauty and choreography of nature is displayed. The Playground Problem

Author(s)	Lauren Scott Griffin
Type	Paperback book
Dimensions (mm)	203.2 x 254
Published by	Esri Press
Date of publication	25 May 2021
Language(s) of the product	English

**Abstract/Description
(in English or French;
100 words max)**

Using a colorful, easy-to-follow comic book story with fun in-book activities, *The Playground Problem* takes readers ages 6 through 10 on an adventure where they learn about spatial analysis by applying spatial thinking and spatial problem-solving skills. Written by Dr. Lauren Scott Griffin and illustrated by artist Fred Folger, this hybrid graphic narrative/activity book teaches young readers about mapping, data visualization, distance, compass directions, mathematical relationships, spatial analysis, spatial overlay, and spatial reasoning.

The Locators: Adventure in South America

Author(s)	Kyle Bauer, Colleen Conner
Type	Paperback book
Dimensions (mm)	190.5mm x 234.95mm
Published by	Esri Press
Date of publication	6 July 2021
Language(s) of the product	English
Abstract/Description (in English or French; 100 words max)	<i>The Locators: Adventure in South America</i> is the story of two kids and a parrot finding and protecting several endangered animals in South America. Based on real-world scenarios, readers will find themselves solving problems by using maps based on actual location data within the graphic narrative. Using different maps, applying critical and spatial thinking, and following clues, readers can help the Locators on every step of the journey by completing the illustrated activity at the end of each chapter, fostering reading comprehension skills.

Author(s)	Kenneth Field
Type	eBook
Dimensions (mm)	Not applicable
Published by	Esri Press
Date of publication	31 August 2021
Language(s) of the product	English
Abstract/Description (in English or French; 100 words max)	<p>Thematic maps all too easily display different truths. Using 101 maps, graphs, charts, and plots of the 2016 United States presidential election data, this book explores the rich diversity of thematic mapping and the visual representation of data. It details well-known techniques and shows how to design effective maps and graphics. It also explores innovative and fascinating alternative ways of making maps of empirical data to excite and inspire. Each example illustrates a different approach to visualising the same data, and all lead to different maps and different ways of seeing different shades of truth.</p> <p>*Note – because this publication is an eBook it is available for ICE as a review copy for electronic display. To download a review copy please use the following link: http://www.vitalsource.com/redeem When prompted, use the following code: SGA3ACC78X7Z2842M2MF This code MUST NOT be shared, and the eBook MUST NOT be made publicly available. USE_OC1	<i>Screwed: 2020 Presidential election</i>
Author(s)	Kenneth Field
Type	Materials: Wood, brass screws, enamel paint
Dimensions (mm)	1:7,000,000 (main map)
Published by	Kenneth Field
Date of publication	20 January 2021
Language(s) of the product	English
Abstract/Description (in English or French; 100 words max)	A bas-relief of the 2020 presidential election results using butcher block as the base, inlaid states painted by winning party, with screws driven into the surface. Screw gauge (diameter) and height indicate turnout, and the screw heads are painted in a range of dark to light reds or blues to indicate share of vote. To finish the map, an epoxy resin filled vignette for the coastline and lakes was added, a title plinth with a play on words, and several layers of varnish finished the work off. It's a physical, multivariate 3D map of the 2020 presidential election results.

Denver West, Colorado:
A fully automated 1:100,000-scale map product prototype

Type of material	Paper
Scale (if relevant)	1:100,000
Dimensions (mm)	30 in high x 36.85 in wide (762mm x 936mm) *Note: attempting to reduce width to 35inches wide (889 mm)
Author(s)	Andrew Stauffer
Published by	<u>United States Geological Survey</u>
Date of publication	December 2021
Language(s) of the legend	English

Abstract/Description (in English or French; 100 words max)

The National Geospatial Program will be expanding a public-facing on-demand map generation application that allows users to generate customized topographic maps where The National Map data is available. The next phase of development will focus on a 1:100,000-scale map product that uses 1:24,000-scale or better data as a source. This demonstrates the first time the US Geological Survey will produce a digital topographic map series beyond the 1:24,000-scale US Topo series. The Denver West, Colorado map demonstrates prototype work on data generalization and cartographic design for a US Topo-like map at a 1:100,000 scale.

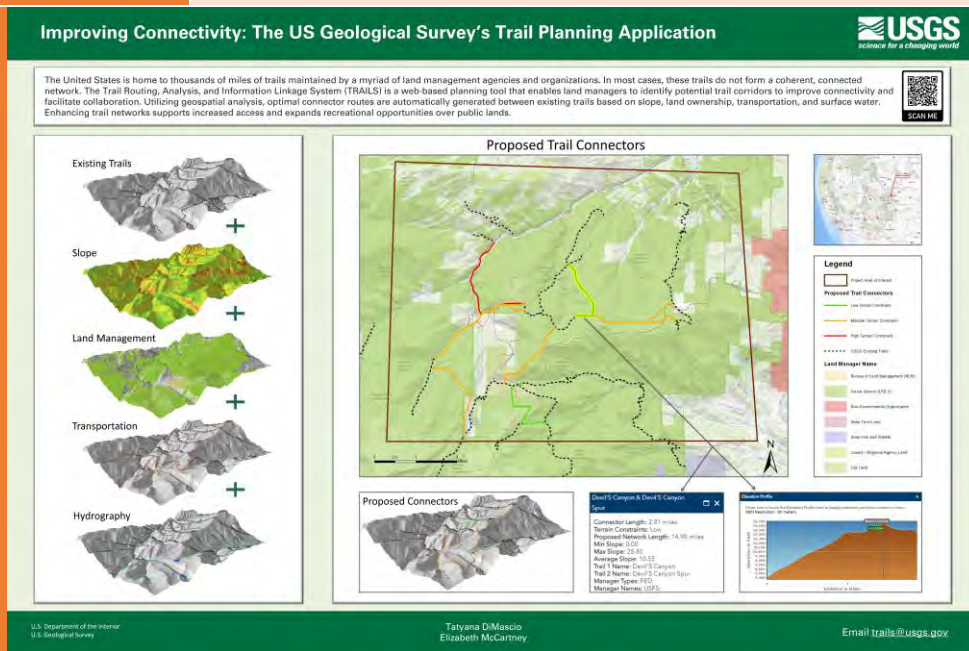

USU_MP2 *Improving Trail Connectivity: The US Geological Survey's Trail Planning Tool*

Type of material	Paper
Scale (if relevant)	N/A
Dimensions (mm)	889mm x 610mm
Author(s)	Tatyana DiMascio and Elizabeth McCartney
Published by	United States Geological Survey
Date of publication	December 2021
Language(s) of the legend	English

Abstract/Description (in English or French; 100 words max)

The United States is home to thousands of miles of trails maintained by a myriad of land management agencies and organizations. In most cases, these trails do not form a coherent, connected network. The Trail Routing, Analysis, and Information Linkage System (TRAILS) is a web-based, advance planning tool that enables land managers to identify potential trail corridors to improve connectivity and facilitate collaboration. Utilizing geospatial analysis, optimal connector routes are automatically generated between existing trails based on slope, land ownership, transportation, and surface water. Enhancing trail networks supports increased access and expands recreational opportunities over public lands.

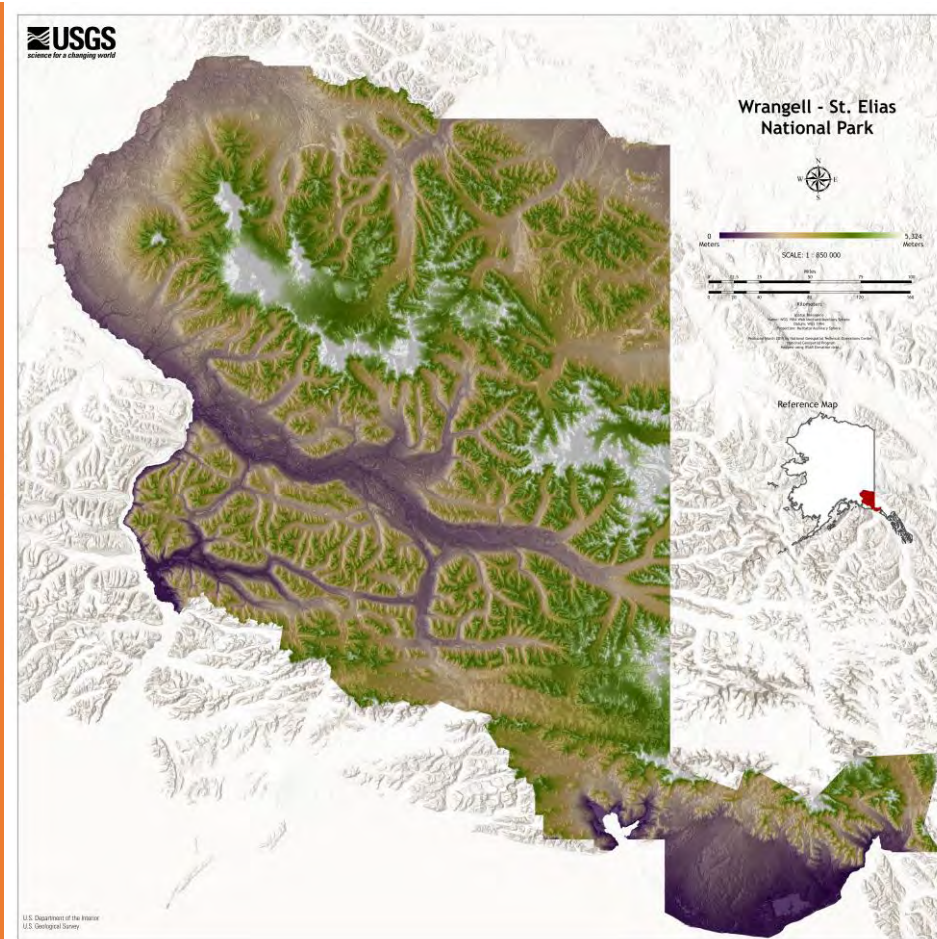

USU_MP3 *NHDPlus High Resolution (NHDPlus HR) Stream Flow Estimates of the Conterminous United States*

Type of material	Paper
------------------	-------

Abstract/Description
 (in English or French;
 100 words max)

Map depicting Wrangell – St Elias National Park highlighting the quality of newly gathered Interferometric Synthetic Aperture Radar (IFSAR) elevation data overlaid by 10-meter resolution satellite imagery. IFSAR can produce clear, sharp image maps of haze and cloud-covered areas. The radar signal strikes the terrain at an oblique angle which accentuates landscape details. Topographic features, such as subtle faults and folds, may be more clearly seen on radar imagery than on conventional aerial photographs or satellite images. The IFSAR data used in this map was acquired to meet a resolution of 5 meters or less.

USU_MP5 *The Arctic Research & Policy Act Region (ARPA): Alaskan Mainland - Map*

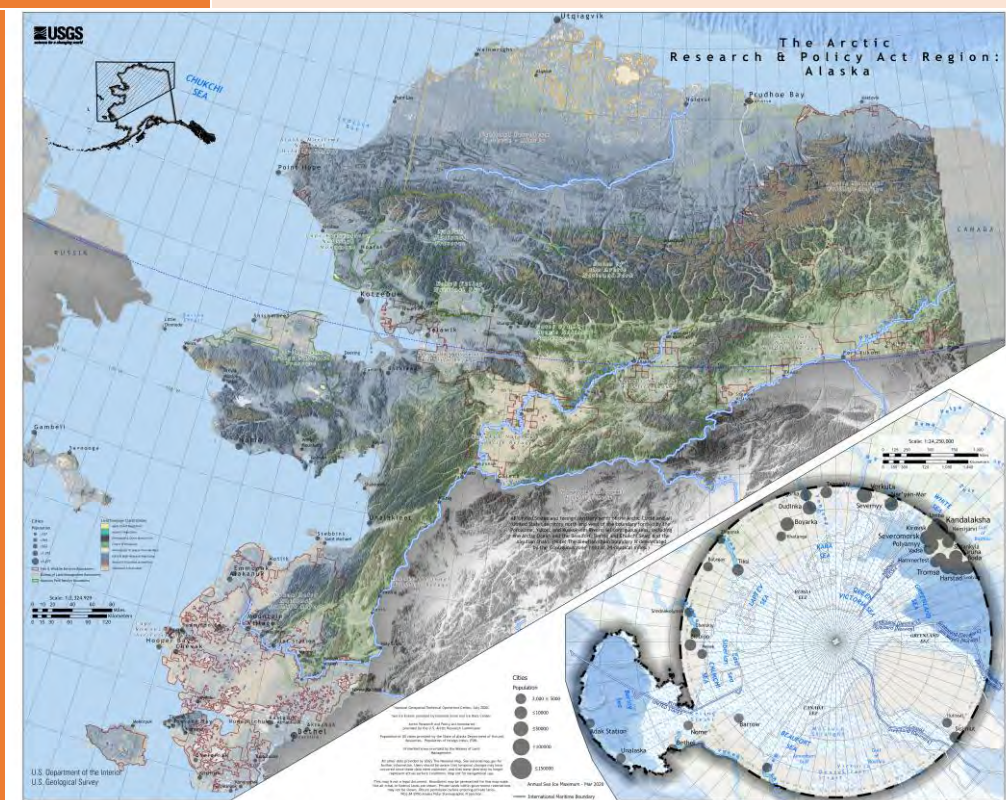

Type of material	Paper
Scale (if relevant)	Multiple
Dimensions (mm)	711.2 mm x 558.8 mm
Author(s)	Chris Richmond, Bill Marken, Phil Rufe & Dee Williams
Published by	United States Geological Survey
Date of publication	08/2021

Language(s) of the legend

English

Abstract/Description (in English or French; 100 words max)

This map details the ARPA boundary as it relates to terrestrial features of Arctic Alaska lying north and west of the Yukon and Kuskokwim Rivers. It conveys key components of Arctic geospatial information including detailed city/village location and relative population size; land cover classification; tree-line extent in juxtaposition to the ARPA boundary and Arctic Circle; delineation of conservation areas & National Petroleum Reserve-Alaska. The lower right corner contains an inset of the full ARPA boundary through the circumpolar Arctic to display: the locations and relative population size of major Arctic cities; the maritime limits of Arctic nations' exclusive economic zones.

USU_MP6 California Congressional District 08 Federal & Tribal Lands

Type of material	Paper
Scale (if relevant)	1 : 900 000
Dimensions (mm)	711.2 mm x 914.4 mm
Author(s)	Chris Richmond, Phil Rufe, Bill Marken
Published by	United States Geological Survey (USGS)
Date of publication	05/2021
Language(s) of the legend	English

**Abstract/Description
(in English or French;
100 words max)**

Map detailing California's 8th Congressional District using USGS Congressional District map templates along with authoritative sources for federal and tribal Lands. Sources include an official national inventory of U.S. terrestrial and marine protected areas that are dedicated to the preservation of biological diversity and to other natural, recreation and cultural uses. This inventory includes the best available aggregation of federal land and marine areas provided directly by managing agencies, coordinated through the Federal Geographic Data Committee Federal Lands Working Group.

MAPS ON PANELS

ITA.a		Covid-19 in the Province of Trento	
Type of material	Paper		
Scale (if relevant)	1:1.000.000		
Dimensions (mm)	420 x 297 mm x 2		
Author(s)	Tiziano Brunialti, Nicola Gabellieri, GeCo		
Published by	Associazione Italiana di Cartografia; Centro Geocartografico di studio e documentazione (GeCo) dell'Università di Trento		
Date published	2020		
Language(s) of the legend	Italian		
Abstract/Description (in English or French; 100 words max)	The map on the left shows the representation of accesses for pneumonia in the Emergency Rooms of the Province of Trento: the location of each health unit is expressed with a pie chart that shows swabs performed and absolute number of accesses. A histogram shows the temporal trend of the number of accesses. The map on the right shows the pandemic trends at the municipal level in March-June 2020. The polygons of the municipalities show the percentage of active cases on the total population; the size of the centroid of the polygon indicates the absolute number of active cases.		

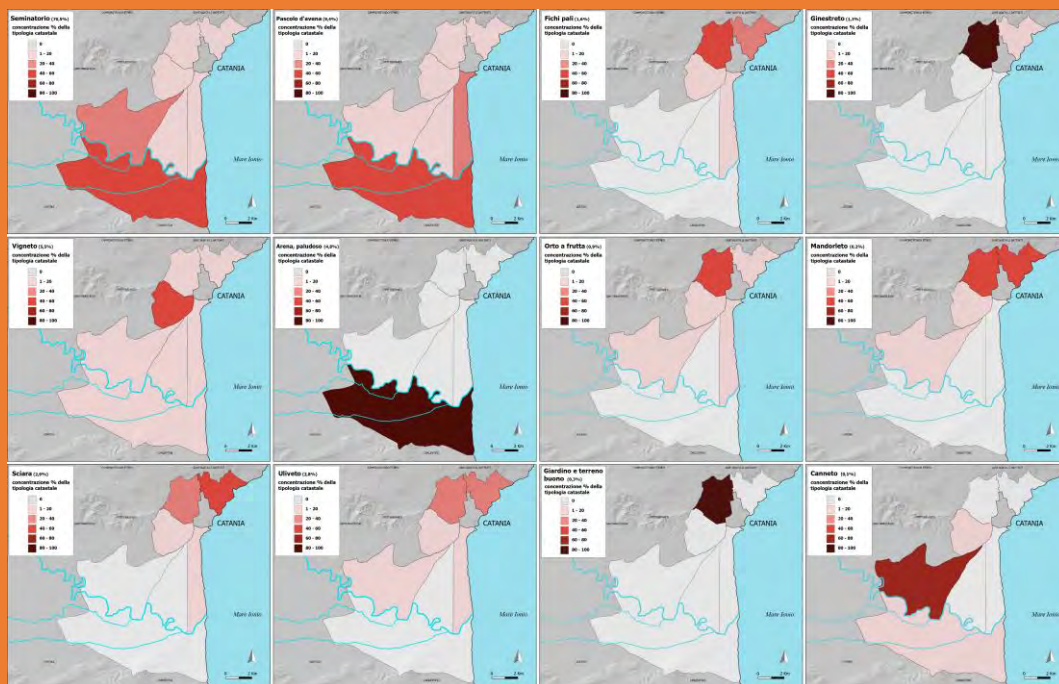

ITA.b *Representing Territory. Mid-Nineteenth-Century Land Use and Crop Types in Sicily: A Digital Geohistorical Approach to the Descriptive Cadastral Source*

Type of material	Paper
Scale (if relevant)	-
Dimensions (mm)	240 x 150 mm x 2
Author(s)	Giannantonio Scaglione
Published by	Centro Geo-cartografico di studio e documentazione (GeCo) dell'Università di Trento - Associazione Italiana di Cartografia
Date published	2020
Language(s) of the legend	Italian

Abstract/Description (in English or French; 100 words max)

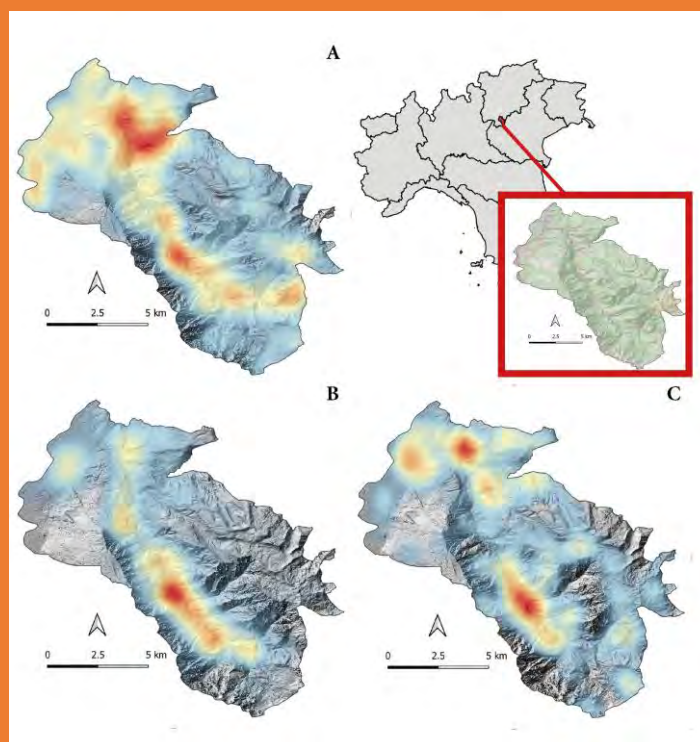

The georeferenced digital theme-based maps represent the different land use and crop types in rural Sicily. They have been drawn based on the registers of the 1838 Land Registry, using descriptive data that refer to non-urban areas retrieved from the Contribuzione Fondiaria del Comune di Catania (Land Contribution of the Municipality of Catania, Sicily) of 1843. The latter is a useful source that was produced for financial purposes, to recreate the features of the rural space of the municipality of Catania.

ITA.c *Heat map of places names distribution in historical maps (A: 2007; B: 1853-61; C:1901-05). The case study of Rovereto-Valli del Leno (Province of Trento, Italy)*

Type of material	Paper
Scale (if relevant)	1:200.000

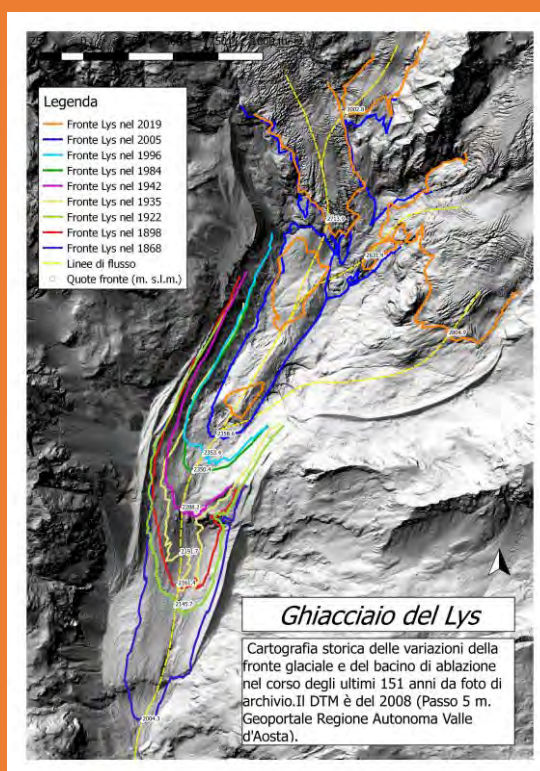

Dimensions (mm)	21 x 22 cm
Author(s)	Nicola Gabellieri
Published by	ASITA; Centro Geo-cartografico di studio e documentazione (GeCo)
Date published	2019
Language(s) of the legend	none
Abstract/Description (in English or French; 100 words max)	The map is part of a broader research aiming at analyzing and safeguarding of historical place names of the Provincia di Trento registered in the historical maps. Different sources (A: <i>Carta tecnica provinciale</i> , 2007; B: Hapsburg Cadaster, 1853-61; C: <i>Karte der Grafschaft Tirol</i> [...], 1801-05) have been digitised and georeferenced using a GIS software, and place names have been vectorised as point vector and transcribed in a geodatabase. The map shows place names distribution for each sources using the “heat map” function. Epistemologically, place names distribution could be used with other sources to assess changes in practiced and dwelled spaces during time.

ITA.d *Lys Glacier. Dyachronic cartography of the terminus variations*

Type of material	Paper
Scale (if relevant)	1:25000
Dimensions (mm)	420 x 297 mm
Author(s)	Andrea Marco Raffaele Pranzo

Published by	Associazione Forte di Bard
Date published	2020
Language(s) of the legend	Italian
Abstract/Description (in English or French; 100 words max)	The map accounts for the trends of the Lys glacier terminus (Monte Rosa Massif, NW Italy) along the last century and a half. The background is represented by the DTM of the valley, obtained from the Valle d'Aosta Regional Cartographic Portal. The colored lines are produced by employing an indirect monophotogrammetric technique that uses old and recent digitalized photos processed in QGIS through the "WSL Monoplotting Tool", a device created by the Swiss Federal Institute for Forest, Snow and Landscape Research. These lines follow the lower extent of the ice in each year. The numbers on the map refer to the calculated a.s.l. altitude of the glacier terminus.

ATLASES

POL.a	<i>The Global North-South Atlas. Mapping Global Change.</i>	
Type of material	atlas	
Number of pages	180	
Dimensions (mm)	250 x175 mm	

Author(s)	Marcin Wojciech Solarz
Published by	Routledge
Date of publication	November 5, 2019
Language(s) of the text	English
Abstract/Description (in English or French; 100 words max)	<p>This atlas deconstructs the North–South divide which was established by the 1980 Brandt Line, and advocates the need to redraw the global map to be fit for the 21st century. A range of colorful maps and charts demonstrate the ways in which the world has changed over the last 2,000 years. The atlas analyzes the genesis and characteristics of the Brandt Line, before going on to discuss its validity through the centuries, and demonstrating the many philosophies of development that exist or may exist. The book concludes by proposing new schemes of categorization between developed and developing countries.</p>
